How to Use Fresh Cab® In and Around Your Home

Step 1: How Do I Use Fresh Cab?

Simply distribute pouches around any indoor/enclosed area where you are having rodent problems. Pay particular attention to areas like walls and other surfaces that may serve as runways as well as tucked-away places they can nest without being discovered (closets, corners, attics and basements)

Step 2: How Much Fresh Cab Do I Need?

General guidelines are dependent on the type of space you are using Fresh Cab in and where you have the rodent problem.

- Mouse prone areas, use 1 pouch per 125 sq. feet placed at area entrance for protection. Replace when the scent is no longer strong to the nose.
- Known infested areas, use 1 pouch per 8 sq. feet of floor space placed at area entrance for up to 30 days of maximum protection.

Examples of places to use Fresh Cab and how much to use in each space:

- **RV:** Use 3 pouches for up to 30 ft. Place near water tank, drains, slide-outs and cushions. In addition, place a pouch in each storage compartment below to protect against nesting in those areas.
- **Garage:** Use 4 pouches for up to a double garage. Place near doors and in corners. Replace every 30-45 days
- **Home:** Use 1 in an entryway, pantry, or closet. Use in mouse prone areas like vents that open to the outside (i.e. dryer vent, attic vent, etc.). Place a pouch under the sinks and behind appliances (rodents like to travel along pipes)
- **Auto:** Use 1 in the trunk, 1 under each seat, and 1 under the hood if in storage (be careful to remove pouch under hood before driving). Replace when scent has diminished.
- **Drop Ceilings, sub-floors, crawl spaces:** Use 1 pouch per 8 sq. feet, replace in 30 days to prevent re-infestation.
- **Storage Sheds:** Use 4 pouches, place in corners, behind stored items, by entry points and in hard-to-reach places where rodents tend to nest.

Step 3: Where Should I use Fresh Cab Rodent Repellent?

Place Fresh Cab pouches anywhere you are having a problem with rodents, as well as areas you would like to protect from them. The table below shows the most common areas satisfied customers are using Fresh Cab to get rid of rodents in and around their homes.

Fresh Cab [®] Home Use		
In The Home	Around The Home	Garage/Storage
Basements/Crawl Spaces	Under Decks	Automobiles
Attics	Under Hot Tubs, Fountains	Lawn Tractors
Pantries	Patio Furniture	Snowmobiles
Under Sinks	Inside Grill	Storage Containers
Closets	Potting Sheds	Snow Blower
Behind Appliances	Pump Houses	Trailers
Pet Food Areas	Tool/Storage Sheds	Hunting Gear
Dryer Vent	Greenhouse/Pool House	Strollers
Entries	Storage Lockers	Motorcycles

Prevention Tips

- Mice can squeeze through a hole the size of a pencil eraser, and rats can squeeze through a hole the size of a half dollar! Prevent rodents from entering the home by checking inside and outside the house for gaps or holes.
- Place steel wool in any holes and seal with silicone caulking (rodents can easily chew through spray foam)
- Eliminate possible nesting sites outside the home. Elevate hay, woodpiles, and garbage cans at least 1 foot off the ground. Move woodpiles far away from the house (100 feet or more is best). Get rid of old trucks, cars, and old tires that mice and rats could use as homes. Keep grass cut short and shrubbery within 100 feet of the home well-trimmed.
