Complete Portable Crushing Spreads

Lower Initial Investment

- No permanent structures required.
- Limited site preparation.
- Pre assembled and tested, minimum installation costs.
- Completely self contained.
- Quick start up of production on site.
- Reduced mobilization costs.
- Easy de-mobilization.
- Ability to “pre-train” operators
- Reduced engineering costs
- “Off the Shelf” spares

Good recovery of investment at time of disposal.

- Can be up to 50% of acquisition cost of equipment

Skid Mounted Crushing Plants

Modular Feed Systems

ELRUS Mining – With You All The Way

Design

Test Run

Installed & Working

The Perfect Solution For Your Operation.

- Plant sizes up to 1,000 TPH.
- Quick to mobilize and set up.
- Lower capital cost, pre-engineered.
- Wheels, skids and tracks.
- Life cycle – First in. Last out. Haul road material, pre-crush for mill.
- Increase capacity in existing operations.
- Emergency processing.
- Operating in severe climates.
- Conveying and stockpiling.
- Barge and shiploading.

Problem: Gyrotory crusher is down! Could be months to repair.
Solution: ELRUS portable jaw crushing plants on site and working in under a week.
