

New Jersey, Statewide Small Business Direct Install

Northern New Jersey

"Lime is one of seven contractors under contract to TRC providing services for the Direct Install component of New Jersey's Clean Energy Program. Lime has been one of the leading contractors in delivering customers into this program. They have demonstrated a consistent commitment to the Program and have built a professional team, which has been a valuable resource to TRC in its implementation of this Program."

Francis X. Reilly, Jr.
Senior Vice President
TRC Energy Services
C&I Market Manager

Program Results

Projects Installed: 1,000
Total kWh Savings: 29,513,808
Total Therm Savings: 348,047

Lime Energy is providing program management and implementation services for New Jersey's Statewide Small Commercial & Industrial Direct Install Energy Efficiency Retrofit Program. This program includes municipalities and is one of the state's most wide-ranging Demand Side Management programs ever.

Lime is the exclusive provider for the Northeast region and has completed 409 municipal projects and 591 commercial projects, and delivered \$4,400,000 in kWh savings and \$382,851 in Therm savings. This program encompasses electric and natural gas measures and includes customers up to 200 kW.
