**Hazardous Waste Operations
24-Hour Hazardous Waste & Emergency Response [Operations Level]
Satisfies 29 CFR 1910.120(q)(6)(ii)**

Applicability:

All employees who initially respond in a defensive fashion to releases or potential releases of hazardous substances for the purpose of containing the release from safe distances, keeping the release from spreading and preventing exposure.

Prerequisites:

None

Frequency and Duration:

This training program requires 24-hours to complete, and refresher training is required annually.

Purpose and Overview:

Safety Training Services, Inc. offers a thorough course in hazardous materials training at the first responder operations level. After attending this course, the participant will:

- Know the government agencies involved in Hazardous Materials.
- Know basic labeling and identification technics.
- Know the basic hazard and risk assessment techniques.
- Know how to select and use proper personal protective equipment provided to the first responder at the operations level.
- Understand basic hazardous material terms.
- Understand how to use various sources of information for Hazardous Materials (SDS /DOT-ERG)
- Know how to perform basic control, containment, and/or confinement operations within the capabilities of the resources and personal protective equipment available.
- Know how to implement basic decontamination procedures.
- Understand the relevant standard operating procedures and termination procedures.

Training Materials: Those attending this training program will receive (1) a training manual that includes a detailed script keyed to overhead graphics, and (2) the U.S. Department of Transportation's Emergency Response Guidebook. A certificate and wallet card will be awarded to the student upon successful completion of the training program.
