Hazardous Waste Operations
40-Hour Hazardous Waste & Emergency Response [Technician Level]
Satisfies 29 CFR 1910.120 (e)

Applicability:	All employees (including managers and supervisors) who work at a hazardous waste site in which there exists a possibility of exposure to hazardous substances.
Prerequisites:	None
Frequency and Duration:	This training program requires 40-hours to complete, and refresher training is required annually.

Purpose and Overview:

Safety Training Services, Inc. has developed a comprehensive training program that encompasses all aspects of hazardous waste operations. This training covers:

- Know the government agencies involved in Hazardous Materials.
- Know basic labeling and identification technics.
- Know the basic hazard and risk assessment techniques.
- Know how to select and use proper personal protective equipment provided to the first responder at the operations level, Technician Level and Employee training requirements (29 CFR 1910.120 [e]).
- Understand basic hazardous material terms.
- Understand how to use various sources of information for Hazardous Materials (SDS /DOT-ERG)
- Know how to perform basic control, containment, and/or confinement operations within the capabilities of the resources and personal protective equipment available.
- Site characterization and analysis.
- Appropriate site control procedures.
- Engineering controls, work practices, and personal protective equipment for employee protection.
- Monitoring procedures and requirements.
- Procedures for handling drums and containers.
- Decontamination procedures.
- Procedures for emergency response by employees at uncontrolled hazardous waste sites.

Training Materials: Those attending this training program will receive (1) a training manual that includes a detailed script keyed to overhead graphics, and (2) the U.S. Department of Transportation's Emergency Response Guidebook. A certificate and wallet card will be awarded to the student upon successful completion of the training program.
