

Real Experience. Real Training. Real Results.<sup>SM</sup>

**OSHA General Safety Programs  
DOT HM-172.704 Training**

<b>Applicability:</b>	This standard applies to employees involved in shipping and packaging hazardous materials and to all modes of transportation of these materials, over the road, rail, aircraft, or vessel.
<b>Prerequisites:</b>	None
<b>Frequency and Duration:</b>	This program requires 4 hours to complete and refresher training is required every three years.

**Purpose and Overview:**

Safety Training Services, Inc. has developed a comprehensive training program that encompasses all aspects of the training requirements for "Hazardous Materials Employees" under the DOT hazardous materials regulations. This program covers:

- Overview of HM-172.704.
- Hazardous materials table.
- Shipping papers.
- Labeling of hazardous materials.
- Packaging and marking.
- Loading and segregating materials.
- Placard requirements.
- Safety training overview.
- DOT Emergency Response Guide.
- Properties of hazardous materials.
- DOT classifications of hazardous materials.
- Basic emergency response actions.

**Training Materials: Each participant will receive copies of the presentation materials and a certificate of completion at the conclusion of the session.**
