**OSHA General Safety Programs
Lockout / Tagout Training
Satisfies 29 CFR 1910.147**

Applicability:	All employees who service and maintain machines and equipment in which the unexpected energization or startup of the machines or equipment or releases of stored energy could endanger other employees.
Prerequisites:	None
Frequency and Duration:	This training program requires 2 hours to complete and shall be provided to all employees affected by the energy control program.

Purpose and Overview:

Safety Training Services, Inc. will conduct a training program that satisfies the OSHA Control of Hazardous Energy Sources Standard (29 CFR 1910.147) to ensure that the purpose and function of an energy control program are understood by employees and that the knowledge and skills required for the safe application, use, and removal of energy control devices are acquired by applicable employees. The training will include the following:

- The recognition of applicable hazardous energy sources, the type and magnitude of the energy available in the workplace, and the methods and means necessary to isolate and control energy sources.
- Basic steps to perform Lock Out Tag Out procedures.
- Know common types of energy isolating devices.
- The purpose and use of the energy control procedure.
- Prohibitions relating to attempts to restart or reenergize machines or equipment that are locked out or tagged out.

When Tagout systems are used, participants will also be trained in the application and limitations of tags.

Training Materials: Each participant will receive copies of the presentation materials, and a certificate of completion will be awarded at the conclusion of the session.
