**OSHA General Safety Programs  
Occupational Noise Exposure Training  
Satisfies 29 CFR 1910.95**

<b>Applicability:</b>	Applies to employees exposed to occupational noise in which hearing protection may be required.
<b>Prerequisites:</b>	None
<b>Frequency and Duration:</b>	This training program requires 2 hours to complete.

**Purpose and Overview:**

Safety Training Services, Inc. will conduct a training program that satisfies the OSHA Occupational Noise General Industry Standard – (29 CFR 1910.95) to ensure that the purpose and function of a hearing protection program are understood by employees and that the knowledge and skills required for the safe application and use of noise reduction devices are acquired by applicable employees. The training will include the following:

- Understanding the OSHA Standard 1910.95
- The recognition of applicable hazardous noise sources.
- Understanding hearing loss / damage and what a Standard Threshold Shift (STS) is.
- Types and magnitude of the noise reduction devices available in the workplace.
- The methods and means necessary to protect an employee's hearing.
- The purpose and use of the noise and hearing conservation equipment.

**Training Materials: Each participant will receive copies of the presentation materials, and a certificate of completion will be awarded at the conclusion of the session.**
