

Enterprise Mobility Proofs-of-Concept and Production Deployments

Enable a mobile strategy your end users will love, while also maintaining the security, flexibility, and control that IT needs.

Microsoft
System Center

Windows Server 2012

Microsoft Azure

DynTek, a Microsoft Gold Certified Partner and National Solution Provider, offers Enterprise Mobility Proofs-of-Concept and Production Deployments to make it easier than ever to move mobile users to the cloud.

In the course of these consulting engagements, DynTek's certified Microsoft engineers will provide a comprehensive overview of the Azure Enterprise Mobility Suite, which incorporates Azure Active Directory Premium, Windows Intune and Azure Rights Management, along with supporting technologies such as System Center Configuration Manager. Also included is a review of your organization's current environment, a road map for business requirements and solution alignment, and the demonstration of a Proof-of-Concept or Production Deployment.

You will experience what Microsoft's cloud infrastructure can do -- delivering technologies that enable BYOD Mobile Device Management, Integrated Multifactor Identity and Rights Management, Application Deployment Management and more. All without the headache of expensive renewal and maintenance costs or the limitations of a physical data center. You'll gain insight into the extensive management capabilities provided by Microsoft System Center and the Enterprise Mobility Suite, delivering effective and efficient management of both on-premises and remote users and devices.

Additionally, you'll learn how Azure Infrastructure as a Service can help you extend your IT services and capabilities, increasing your agility and enabling you to quickly build, deploy and manage your Cloud-enabled, dynamic infrastructure.

Get started today and realize the benefits and value that a cloud infrastructure can bring to your organization.

Drive more business value with the Microsoft Azure Enterprise Mobility Suite:

1. Enable your users to be productive across the broad array of devices they love with access to the applications they need.
2. Unify your IT environment with a common identity across on-premises and the cloud, and deeply integrated capabilities for mobile device management (MDM).
3. Protect your data with a comprehensive set of access control and data protection capabilities.

Proof-of-Concept: 5 Days

- Interactive Planning Sessions around System Center 2012 R2, Intune and Azure
- Installation and Configuration Microsoft Azure Active Directory Premium and Intune
- Analysis of your current infrastructure to plan for future implementation
- Review of enterprise features such as Azure Backup, Azure Storage, BYOD Management and other key features
- Installation and Configuration of System Center Configuration Manager 2012 R2
- System Center Management and Device Management Road Map Planning
- Overview of Azure Infrastructure as a Service
- Knowledge Transfer and Cross Training to client's team

Production Deployment: 10 Days

- Interactive Planning Sessions around System Center 2012 R2, Intune and Azure
- Installation and Configuration of Microsoft Azure Active Directory Premium and Intune
- Analysis of your current infrastructure to plan for future implementation
- Review of enterprise features such as Azure Backup, Azure Storage, BYOD Management and other key features
- Installation and Configuration of System Center Configuration Manager 2012 R2
- System Center Management and Device Management Road Map Planning
- Overview of Azure Infrastructure as a Service
- Asset management planning
- Compliance Baseline Design
- Mobile Device Application Deployment, Data Management, (remote wipe) And Device Access (direct access and workplace join)
- Multi-factor Authentication and Application Proxy
- Knowledge Transfer and Cross Training to client's team

DynTek -- Microsoft Platform Solutions

DynTek has developed industry based methodologies to address the Analysis, Design, Proof-of-Concept, Project Planning, Full Scale Deployment and Operations of a broad range of Microsoft® based solutions. We create solutions that focus on helping our customers realize the greatest value from their existing Microsoft software investment.
