

Experience Enterprise Mobility Powered by the Cloud

Microsoft Enterprise Mobility Suite Envisioning and Demonstration

Between BYOD, anytime/anywhere access and personal SaaS apps, today's mobile workforce blurs the boundaries of work. Businesses must keep fostering these productivity enhancements, by enabling mobility and ensuring security. This is where DynTek and Microsoft's Enterprise Mobility Suite can help.

The Microsoft Enterprise Mobility Suite is a cloud-based mobile management system built around the user identity

- Employee productivity—anywhere, on any device
- Authenticated access to apps and data
- Remote device management across platforms

The Enterprise Mobility Suite (EMS) provides you with:

- **Hybrid identity** enabled by Azure Active Directory Premium
- **Mobile device management** enabled by Windows Intune
- **Data protection** enabled by Azure Rights Management Service

Create Your Own Enterprise Mobility Suite Experience

DynTek, a Microsoft Cloud Partner, will help you leverage the Enterprise Mobility Suite to deliver the power of cloud productivity – all while saving time and money. Microsoft and DynTek invite you to join us for a complimentary in-person or online Microsoft Experience Center demo that provides hands-on, real-world experience with the Microsoft Enterprise Mobility Suite. Orchestrated through a series of day-in-the-life scenarios, we will review:

• Business Experience

- o Mapping your current business objectives and priorities to mobility management
- o Analyzing return on investment and key benefits, as well as challenges and potential roadblocks

• Financial Experience

- o Review current licensing to discover technologies you already own
- o Review integration with Office 365 licensing
- o Review promotional licensing and deployment offers

• Technical Experience

- o Planning for Enterprise Mobility Suite Proof-of-Concept
 - Azure Active Directory
 - Windows Intune
 - Azure Rights Management Service
- o Planning for Enterprise Mobility Suite Implementation
 - Review of the Active Directory infrastructures
 - Review process for creation of user accounts in Microsoft Azure Active Directory
 - Review process and technology requirements for Active Directory Synchronization and Password Sync integration
 - Installation and configuration of Directory Synchronization (DirSync) services
 - Installation and configuration of Active Directory Federation Services for Single Sign On (if desired)
 - Installation and configuration of System Center Configuration Manager (if required)
 - Intune Tenant Provisioning
 - Azure Tenant Provisioning
 - Activation of Sync'd accounts in Intune

Azure Active Directory Premium

Directory as a Service
