Celebrating 60 Years of Excellence

## SEPTEMBER 2009 NEWSLETTER

### *INTRODUCING OUR NEW RAILING SELECTIONS!*

General Woodcraft has now expanded its assortment of railing systems. These durable railings complement any design to complete "the deck of your dreams".

#### TRADITIONAL IPE RAILING SYSTEM

Available with "Flat" or "Sculpted" Top Rail

#### CUSTOM IPE RAILING SYSTEM

Create any design you desire with a nearly limitless number of customizable options including numerous accessories.

#### VINYL RAILING SYSTEM

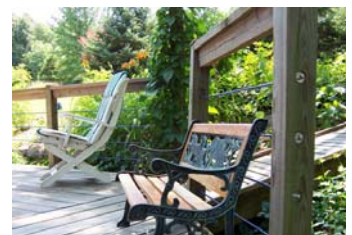

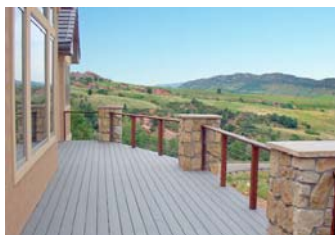

Low maintenance, long lasting and affordable option

#### COMPOSITE RAILING SYSTEM

Elegant, traditional complementary option. Enjoy the sturdy look of solid wood with the easy care of a composite material.

#### CABLE RAIL SYSTEM

The ultimate railing choice where clear sight lines and sleek design are the objective

# SEPTEMBER 2009 NEWSLETTER

It is with great pleasure that we announce the addition of **Connie Eckman** to the General Woodcraft team. Connie has nearly 20 years of experience in the Premium Hardwood Decking industry and offers a wealth of knowledge and expertise to clients. Connie makes her home in Danville, Virginia and will be representing Mataverde® Premium Hardwood Decking throughout the South, East and Midwest U. S. markets.

## Green Corner

### Eco-Friendly Products

*Signature Custom Cabinetry is not only one of our most respected supply partners; Signature craftsmen build the finest, high quality cabinetry that maintains its beauty for generations.*

#### **Plywood:**

Much attention has been given to the issue of formaldehyde and its use in wood products. Through the use of Pure Bond and Eco-Bind resins, Signature has reached its goal of 100% urea formaldehyde free adhesives in all their veneer core plywood cabinetry for standard wood species.

#### **Cabinet Interiors and Drawer Boxes:**

The finishes used in their pre-finished cabinet interiors are 100% free of formaldehyde gases, hazardous air pollutants and volatile organic compounds (VOC's) resulting from a roll coated application and a UV curing process.

#### **Exterior Cabinet Finishes:**

In the past several years Signature has reformulated all of these finishes resulting in much lower VOC emissions. Over the past 3 years they have demonstrated their ability to reduce these numbers by more than 15%, while increasing total production by 39% over the same period.

#### **KCMA Certification:**

Environmental stewardship is a core value at Signature. It was no surprise that at the time of their certification, they were one of only 6 companies to receive this status after the initial review.
