

D3DQA

Watertight Door with Mechanical Seals

This fast-acting watertight door is ideal for openings with frequent traffic that need to be quickly and easily sealed in the event of flooding.

Because the D3DQA is engineered with mechanical seals, no air pressure or power is needed; and maintenance requirements are minimal.

Every door is custom built to exacting dimensions for new or existing construction. For existing openings, frame is mounted to building with expansion anchors; for new construction, the frame is poured in place.

COMPLETE FLOOD PROTECTION WITH THE TURN OF A HANDLE

Simply close the door and turn the handle $\frac{1}{4}$ turn to securely seal the door on all four sides. The standard model protects to 25' head (higher heads are available).

APPLICATIONS — THE D3DQA AT WORK...

The D3DQA is ideal for Water Treatment Facilities, Sewage Treatment Plants and Pumping Stations; as well as mechanical and equipment rooms in any critical facility.

- ▶ Compression gasket provides maximum protection with minimum maintenance
- ▶ No need for compressed air
- ▶ Provides watertight seal on all four sides of door
- ▶ Appropriate for either new or existing construction

PRODUCT SPECIFICATIONS

D3DQA
