

SERVICE & PARTS

Supporting Critical Facilities for Over 50 Years

Presray has been among America's most trusted providers of protective doors and barriers since 1955. No other company brings more experience — or provides a broader offering of solutions — to address the evolving requirements for the nuclear industry.

We are also dedicated to supporting and servicing not just our products but just about any other doors and hatches used in nuclear power plants.

Whether you need to retrofit a higher rated door panel, upgrade access and security systems or simply repair worn out hardware, think of Presray when you need to get the job done.

PRESRAY SERVICES AND INSTALLS...

- ▶ Fire-Rated Doors
- ▶ Air and gas-tight doors
- ▶ Blast and ballistic doors and windows
- ▶ Spent Fuel Pool Gates
- ▶ NUPIC-approved vendor and fully certified for the nuclear industry

Our People Make The Difference.

Unlike most of our competitors, Presray has its own testing and training facility. This gives us a huge advantage when it comes to service and parts because our culture of testing, training and verification creates engineers and technicians who have seen it all.

Our Quality Assurance Program and our service personnel are qualified and certified to solve any problem and to handle anything from simple scheduled maintenance to complicated retrofits of security and access systems.

Make Presray Your Preferred Vendor for Service and Parts

Whether you need routine scheduled service and inspections or an experienced partner to handle emergency repairs of your fire and ballistic doors and hatches, Presray has the experience and knowledge to be a valuable resource.

Be sure to ask about our service contracts and our standby, emergency repair capabilities.
