

enVista – Business Technology Strategies

“With a unique understanding of business information technology needs, we create technology strategies yielding optimal returns with a trusted partner who values your business.”

CONSULT

In partnership with our clients, we consult, create strategies and optimize information technology processes that lead to a lower total cost of ownership (TCO).

- CIO Leadership
- Strategy and Analysis
- Operational and Security Assessments and Audits
- Process Optimization
- Compliance and Regulatory Planning (Sarbanes-Oxley, HIPAA, PCI)
- Program and Project Management
- Capacity Management

IMPLEMENT

Our certified consultants will complement your internal information technology resources with the design and implementation of all types of information technology projects or staffing requirements, allowing you to focus on improving overall information technology and business operational efficiencies.

- Cloud Service (Community, Dedicated, Private)
- Procurement
- Design, Architect and Plan Technology Environment(s)
- Deployment (On-Premise)
- Project Lead
- Consulting/Staffing
- Security Solutions
- Wireless Solutions
- Supply Chain Infrastructure Solutions (RF)
- Virtualization Solutions

OPERATE

Our clients save an average of 30% on information technology infrastructure costs by utilizing our on-demand information technology hosting platform and operational services in a compliant and secure manner.

- Support Desk
- 24/7/365 System Monitoring and Network Management
- Data Center/Hosted Services
- Security Management
- Data Management
- Backup / Storage Management
- Capacity Management
- Application Hosting and Support

enVista has been providing expert and reliable technology services to the nonprofit and corporate sectors since 1999. As an Information Technology consulting and services company, we provide services from strategy to cloud hosting services within our SAS-70 Type II data center (SSAE-16). Our proprietary Consult, Implement and Operate (CIO) methodology, combined with our comprehensive services, enables clients to leverage one service provider across all technology requirements.

How Can We Help?

Is your company an emerging business that needs comprehensive technology solutions built from the ground up?

**If so, you may need outside support because of limited resources.*

Have you experienced rapid growth or made numerous acquisitions?

**If so, the IT environment may be outgrown or fragmented and in need of cohesive plan to meet business objectives.*

Is there a poor perception of the IT organization within your company?

**This may be due to an inefficient and ineffective IT operation. An IT Assessment can identify gaps between business needs and capabilities, as well as provide recommendations and resources to close the gaps.*

Client Testimonial

"enVista has been the IT extension of our business for several years. They present a high degree of technical aptitude and troubleshooting combined with a very customer-centric experience and cost-efficiencies that any business would want from a true IT partner."

Tony Baumgartner, Executive Vice President
DQE, Inc.

"We were looking to find a provider who could cover our complete system's needs. enVista's team approach was the most impressively efficient model that combined a solid transition plan with personalized customer service. Response times are at least as good if not better than much larger firms. Their calm, efficient approach and excellent technical know-how have made our transition both seamless and painless."

Allen R. Wilkie, President
Knopf Automotive, LLC

Key Technologies & Partners

Client Engagements

CONSULT

Business Challenge:
Multiple acquisitions requiring full gap analysis to standardize on single platform.

Solution:
The project involved requirements gathering, design, development, implementation and support of multiple project phases.

IMPLEMENT

Business Challenge:
Resource constrained business with too many IT projects.

Solution:
Required multiple IT resources with all skills sets including: VMWare, Citrix, Barracuda, and cloud services.

OPERATE

Business Challenge:
IT costs continued to rise while equipment became obsolete and costly to manage.

Solution:
Hybrid cloud solution utilizing our secure data center and virtualizing all desktops.
