### **Retail Management Solutions makes biometric identification standard on Star-Lite and Star-Plus point-of-sale systems**

*First POS vendor to independent pharmacies to recommend fingerprint log-in security for all installations*

OLYMPIA, Wash. – Retail Management Solutions, the national leader in point-of-sale systems for independent pharmacies, has added biometric security to its full point-of-sale systems for pharmacies.

The new feature adds an unobtrusive fingerprint scanning pad near the keyboard of each cash register, enabling pharmacy employees to accomplish nearly instant one-touch login to use the register.

“This can be much faster and more secure than keying in access numbers or swiping identity badges,” explains Brad Jones, president and CEO of Retail Management Solutions. “It provides secure identification that isn’t subject to being left at home, shared with other employees or misplaced.”

The biometrics identification will now be a standard shipping feature of the company’s Star-Plus and Star-Lite POS systems, and it can be added to existing registers from those two series.

“This provides another way we enable independent community pharmacies to smoothly, cost-effectively add the information handling systems and control procedures that keep them competitive with chain and big-box stores,” Jones said.

With unmatched control and visibility of their business, retailers can focus on what they do best – increasing sales and customer satisfaction.
