

FIVE WORST EXCUSES FOR NOT USING ILSCO.

Believe Us, After 100 Years, We've Heard 'Em All.

1 I didn't know ILSCO made compression connectors.

Don't worry about it, now you know. ILSCO manufactures 736 different types of compression connectors, for every conceivable job.

2 I thought ILSCO only made mechanical connectors.

Wrong again. See #1. Doesn't it figure that the world's leading supplier of mechanicals would also make compression connectors?

3 I don't use ILSCO tools.

No problem. Every connector we make is UL listed and CSA certified for use with most tools made. No one else can say that.

4 I needed a specially made connector.

No excuse. We make specials, too. And chances are, we'll do it quicker than anyone else.

5 My distributor doesn't carry ILSCO.

If your auto dealer only carried pink cars, would you buy one? Show him this ad and ask him for ILSCO. If he still doesn't get the connection, call 1-800-776-9775 for the ILSCO distributor nearest you.

...Making The Connection.
Easy
