

TOSHULIN VTL

**YOU'LL RUN RINGS AROUND THE COMPETITION.
THEN DRILL THEM FULL OF HOLES.**

More Tool Life... More Spindle Power... More Value... Rigid TOSHULIN Technology. Legendary TOSHULIN Precision.

It's no secret that longer tool life translates into tremendous cost savings, higher quality parts and greater customer satisfaction. And you won't find a Vertical Turning Lathe that delivers more stabilizing rigidity — and longer tool life — than a TOSHULIN.

TOSHULIN's massive cast cross rail — the backbone for accuracy, alignment and stability of the cutting head — combined with a state-of-the-art live spindle, ensures longer, more reliable operation with significant savings in setup time. When you're machining difficult materials — TOSHULIN VTLs extend tool life up to 10, 15, even 20%!

TOSHULIN reliability and cost savings are available directly to you through Pilsen Imports, the experts in installation, support and service. Contact Pilsen today for more information and customer testimonials.
