

# FRANK LOADER CHANGEOVERS WILL NEVER BE A HANDFUL AGAIN.

**SAVE 1/2 HOUR EVERY TIME  
YOU CHANGE OVER USING THE  
PLANET AUTO PHASE™ SYSTEM.**

- No need to jump chains or split gears, the AutoPhase System utilizes one of the world's most reliable servo motors to automatically synchronize the input conveyor and filling head components with the push of a button.
- With one to four axis control, precise, nearly instantaneous count changeover is performed directly from the keypad.
- Unlimited counts and configurations are standard and come programmed to meet your specifications. Packages such as 4 over 3 or 4 layers of 10 with one layer of 9 on top can be loaded automatically upon selection from the operator keypad.
- Chainless, sprocketless drive system reduces spare parts and maintenance costs.
- For more information about the Planet AutoPhase System, call us today at (513) 984-5544.
