# Get your construction projects done faster & on budget!

Google Apps lets you collaborate with your team. From project manager to foreman to engineer – even subcontractors that might not be on Google – share files among them, allow them to edit those files and simply **get work done**. Easily work from your mobile device so that you have access to *anything* whether you're in the office, at a job site, or even on the road between the two.

Other benefits include:

|					
Marking up blueprints	Reporting & Pre/Post Project Checklists	Collaborate with Project Management	Easy access to permit plans offsite & onsite	Unlimited Storage for all file types up to 5TB	Remote visual inspections & site surveys via Hangouts

The ability to work remotely, with unlimited storage space and advanced admin tools is something every construction company needs to be successful in the industry. To ensure enterprise-level security when migrating your current systems to SaaS cloud based systems, it's necessary to have the following:
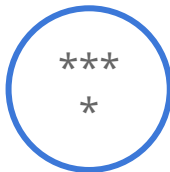

- Encryption of your data in transit and at rest
- Data Portability and no vendor lock in
- Enterprise Integration via open interface
- Complete compliance by protecting your unstructured data just like your structured data (EHR)

eDiscovery Capabilities	Ability to Use 2 Factor Authentication	Password Policy Implementation	Security & process compliance including ISO-27001, SSAE16	SLA on Availability	Backup and Data Integrity	Ownership of your data	Proactive Auditing

*Meet your needs for **email, collaboration and document storage**:*

Google's Drive For Work
  - Gmail, Calendar, Unlimited Cloud Based Storage, Word Processing, Spreadsheets & Presentations
  - Vault: eDiscovery and Compliance
  - Mobile Device Management with simple admin interface
  - Hangouts & Messaging

FlashPanel Tool

General Audit Tool - Proactive and reactive auditing capabilities

Spanning Backup services

Work with Cloudbakers to make sure your migration is done right the 1st time and is manageable & maintainable.
