

The Cloud lets you focus on creativity, not toolset!

Media-centric companies need to be able to work well with people – no matter where they are, the devices or software they use, or what language they speak. As a progressive organization, it's also important to have tools that allow creative teams to work the way they want, when they want. With Google Apps, all your information is available to you, anywhere and at anytime.

Other benefits include:

Brand Consistency
with Google Drive

Reporting

Real-time Project
Checklists

Real-time support
during presentations

Unlimited Storage
for all file types
including .eps & .mov

Collaborating
via Hangouts
(Mobile enabled)

The ability to work remotely, with unlimited storage space and advanced admin tools is something every media & advertising company needs to be successful in the industry. To ensure enterprise-level security when migrating your current systems to SaaS cloud based systems, it's necessary to have the following:

- Encryption of your data in transit and at rest
- Data Portability and no vendor lock in
- Enterprise Integration via open interface
- Complete compliance by protecting your unstructured data just like your structured data (EHR)
