

Software Release Notes

Part Number: SW90139
Description: OZSCR1x00 Embedded Bootloader Firmware
Release Number: 1.3
Release Date: 10/12/2011

New Features:

- Added a new "VERIFY_CRC" command – this command is sent by the SCC Programming Tool after loading the application image. The bootloader compares its calculated CRC against the one sent by the downloader, and if they match, the bootloader will report success and program the CRC and image SIZE into FLASH.
- At startup the bootloader now checks the image SIZE to see if a valid application is loaded. If so, it will jump to the application, if not, it will wait for a new download from the SCC Programming Tool.

Bug Fixes:

- None

Compatibility Notes:

- This version of the OZSCR1x00 Bootloader must be used with SCC software SW90142 Rev 1.6 or newer.
- This version of the OZSCR1x00 Bootloader must be used with OZSCR1x00 firmware SW90126 Rev 1.8 or newer.
