

filmoplast® P 90 Plus

Special, high bond-strength, acid-free, adhesive paper tape

filmoplast P 90 Plus offers especially high bonding strength with high tensile strength and is ideal for reinforcing the joint between the book cover and book body.

filmoplast P 90 Plus is particularly thin (just 50 g/m²) and is therefore hardly noticeable. Its high flexibility makes it ideal for sticking in the fold.

The practical dispenser separates the silicone coated backing paper from the filmoplast P 90 Plus as it is pulled out of the box – just tear it off and stick it down.

Product features:

- High ageing resistance
- High tensile strength
- White, woodfree, special paper
- Acid-free, pH approx. 7.5
- Special high bonding strength – immediate bonding
- Can be removed with water or acetone
