

Easy and quick to apply

- The base surface should be dry, clean, firm, absorbent and smooth. Mark the width of the length on the wall and plumb.
 
- Use nonwoven adhesive in a ratio of 1:10 for pasting. Use with a pasting machine – no soaking time required or
 
- Use the wall adhesion technique – no soaking time required.
 
- Where the edges of the print are cut cleanly, butt the edges together, or
 
- With overlapping lengths of wallpaper, cut the white margins up to the image when dry. Then align the lengths on the wall where they overlap. Make a cut through both layers for a clean join.
 
- Firmly press down the lengths of wallpaper with a foam rubber roller.
 
- Immediately remove any leaking adhesive with a damp sponge or cloth.
 
- Cut off excess wallpaper in the corners with a wall-papering palette knife and a Stanley knife or using scissors.
 
- Once the image has been completely stuck down, wipe it all over with a damp cloth.
 
- When you come to redecorate, the wallpaper can be dry stripped leaving no traces.

ERFURT

DIGITAL NONWOVEN

Individual design instead of standard design – with PVC-free digital nonwoven wallpapers from ERFURT, it is now possible to approach wall design with wallpapers from a purely creative standpoint, free from any environmental concerns.

ERFURT is the specialist for paintable wall coverings and is, according to GfK*, by far the best-known and most popular wallpaper brand in Germany. We consciously avoid the use of PVC and softeners in the production of our wall coverings. ERFURT-Digital nonwoven is hot roll-pressed from pure nonwoven material, which hugely increases the durability of its surface.

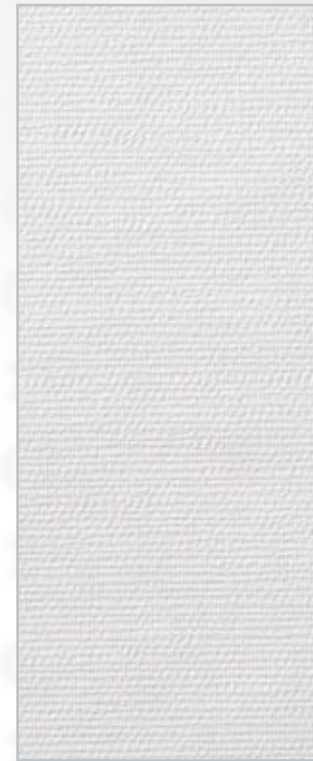

Painters, decorators, exhibition stand builders and shop-fitters, as well as DIY-experts, will all be interested in a personalised wallpaper that is fundamentally easy to use. ERFURT brand products stand out precisely on account of the fact that they are geared toward the user. The wall covering can be hung using conventional nonwoven adhesive, either by the wall pasting technique or with a pasting machine. When it comes to redecorating, ERFURT-Digital nonwoven can be simply stripped dry from the wall.

The range comprises four textured and two smooth nonwoven wallpapers. For ease of handling and to guarantee the stability of the embossing, ERFURT-Digital nonwoven is supplied in a width of 0.75 m and in 40 m long rolls. ERFURT-Digital nonwoven smooth wallpapers are also available in a commercial width of 1.5 m and in 50 m long rolls.

Latex (eco-friendly digital printing) and UV inks can be used as well as eco-solvent and solvent inks for printing.

To simplify the print production processes, ERFURT-Digital nonwoven carries a Color Alliance certified coating. This provides print technicians with a high level of production reliability and reproducibility.

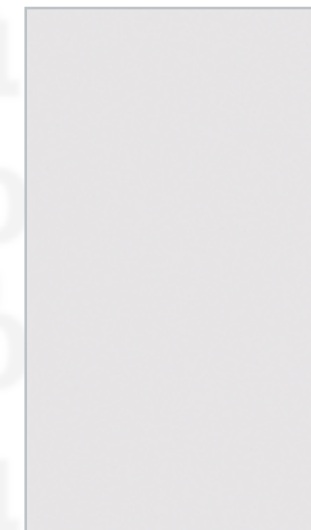

With ERFURT wallpapers, you will be offering your customers the credibility, knowledge, expertise and customer orientation of a strong wallpaper brand combined with your expertise as a digital printing service provider.
