

Yellow Dot - New Program Kickoff!

[ERH Parish Health Ministry](#) is bringing the Yellow Dot program to Ohio.

Yellow Dot is a program that will help First Responder Emergency Personnel obtain medical information about the person involved in an accident or other emergency involving their vehicle. This will help to ensure appropriate and timely medical interventions during that first “golden hour” after an accident or emergency situation.

A Yellow Dot sticker is placed in the rear window of a vehicle to alert responders that a completed medical form along with a recent picture is in the glove compartment.

Packets are available for free to partnering churches by contacting your ERH Parish Health Ministry Coordinator.
