

**MARKETING
BENCHMARKS**

from **7,000+**
Businesses

Good inbound marketing
takes work, but how much
more work will it take to
tip the scale?

If I increase my blogging
frequency from once a
month to twice a week,
what impact will I see?

This report will dive into how you can **increase both traffic and leads** by improving a variety of different marketing assets--- think web pages, blogging, landing pages, Twitter & more.

By dissecting each benchmark by target market (B2B vs. B2C) and company size, you'll walk away with an idea of what it takes to get **the results you seek.**

ABOUT THIS STUDY

This study is based on real results from HubSpot's 7,000+ customers.

In order to get you comparable data to support your marketing investment decisions, HubSpot analyzed the relationships between key inbound marketing activities and the volume of traffic and leads that correlate with those activities.

They specifically looked at website pages, landing pages, blogging, Twitter reach, and Facebook reach.

ABOUT THE DATA

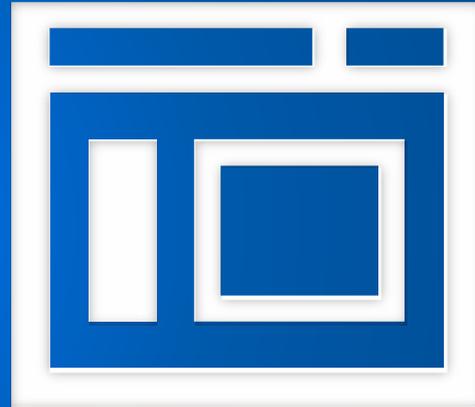

The graphs in this presentation provide index numbers for either traffic and lead volume. HubSpot used index numbers to standardize results across the 7,000 businesses and make them more comparable for you.

(If you're curious, the index numbers are based on a base level of 100 times the ratio to the base value.)

Finally the underlying growth was calculated using median values of HubSpot's customer base.

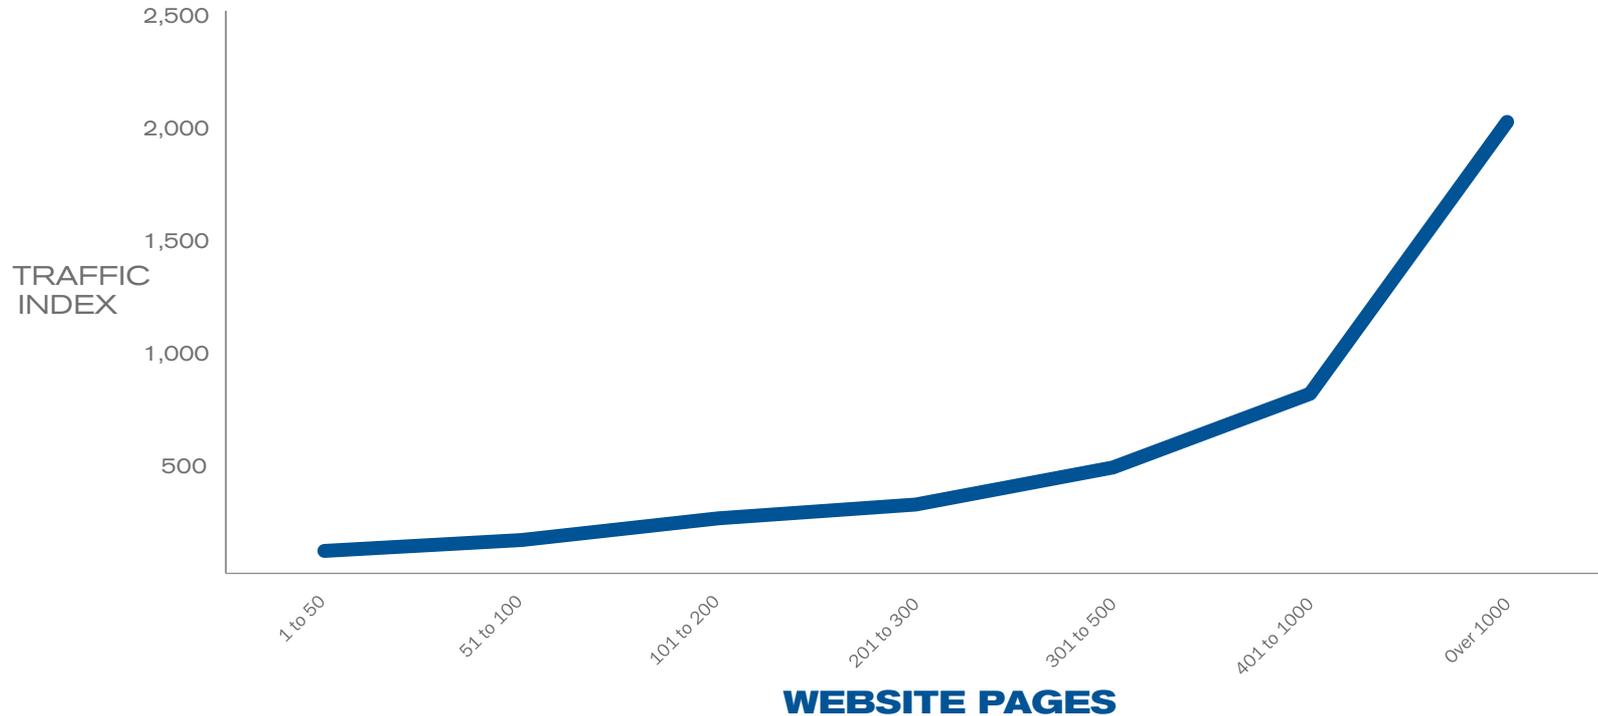

CONTENT IMPACT

How will increasing the
amount of content
impact my
incoming traffic?

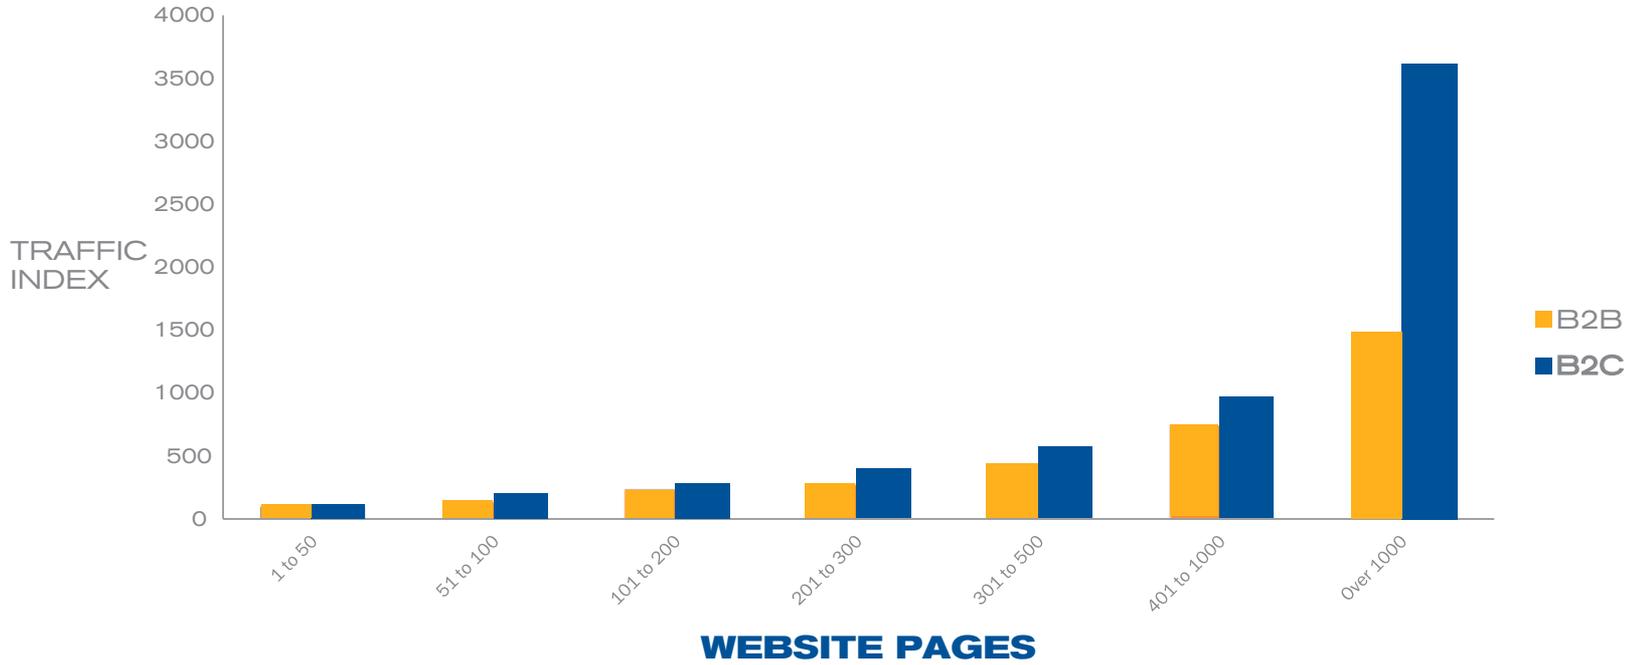

IMPACT OF WEBSITE CONTENT ON **INBOUND TRAFFIC**

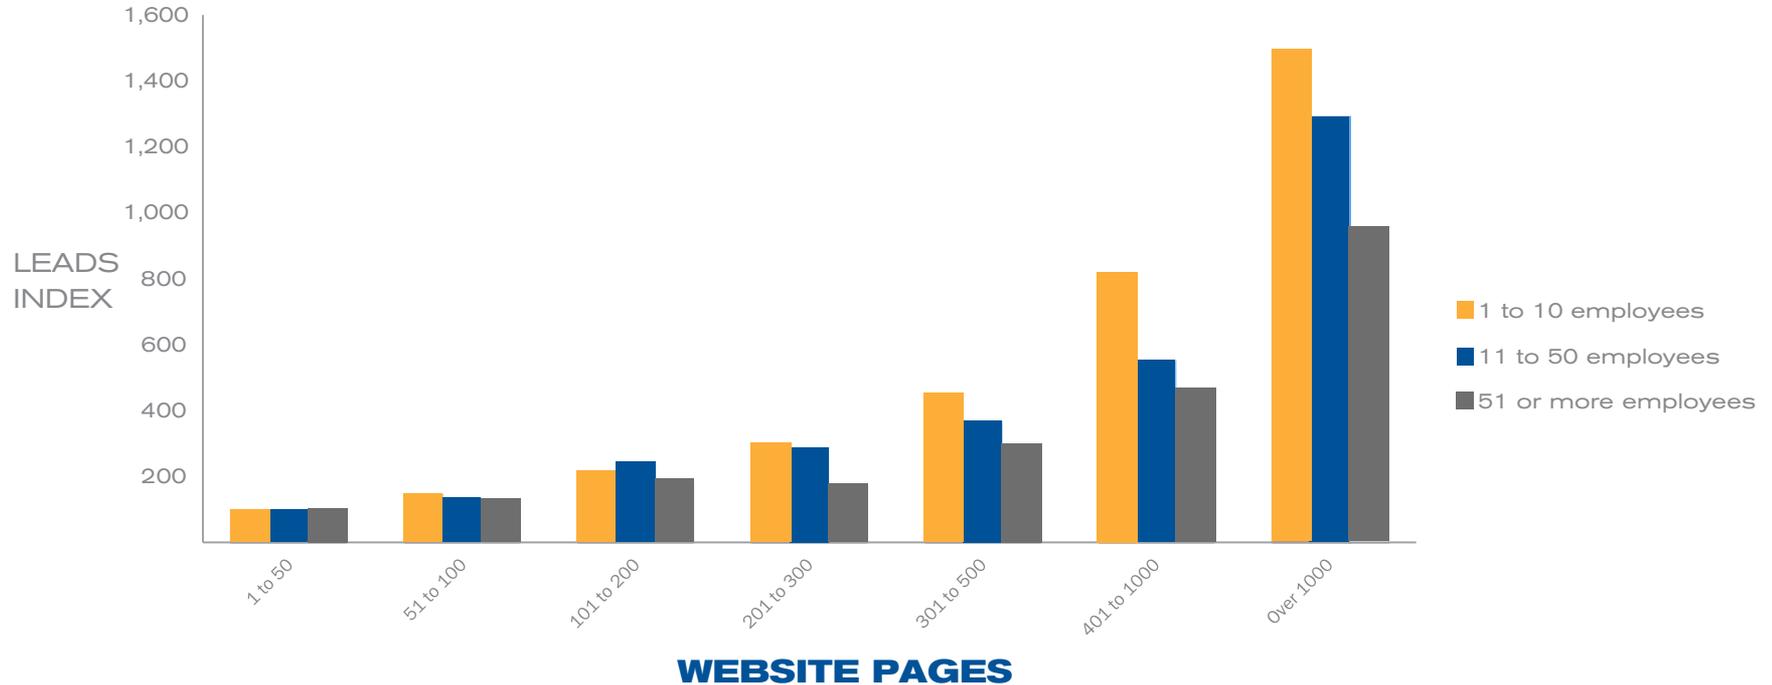

IMPACT OF WEBSITE CONTENT ON **INBOUND TRAFFIC** FOR B2B & B2C COMPANIES
