

# JSCAPE MFT Server

## Managed File Transfer Server Gain Control of your File Transfers

### SECURE FILE TRANSFER

Protect data in transit and at rest using government grade encryption and secure file transfer protocols.

### PLATFORM INDEPENDENCE

Supports all major platforms including Windows, Linux, Solaris, Mac OS X and UNIX.

### REGULATORY COMPLIANCE

Achieve PCI-DSS, HIPAA, SOX and GLBA compliance requirements.

### AUTOMATION

Automate scheduled and event driven processes and file transfers between trading partners.

### CENTRALIZATION

Unify all services, users and processes into a single easy to manage solution.

### HIGH AVAILABILITY

Synchronize server configuration data in real-time to one or more failover servers.

### UDP FILE TRANSFERS

Accelerate your file transfers up to 100x using AFTP (Accelerated File Transfer Protocol).

- Supports all major file transfer protocols including FTP/S, SFTP, SCP, HTTP/S, WebDAV and AFTP.

- Web based client interface allows users to easily transfer and share files with zero software installation.

- Detailed logging and reporting modules providing visibility into all current and historical file transfer activity.

## Multiple Protocols, Thousands of Users, One Server to Rule Them All

Say goodbye to the headache of managing multiple disparate file transfer services and ad-hoc scripts. JSCAPE MFT Server is a platform independent managed file transfer solution that centralizes all of your file transfer processes, users and services into a single secure and easy to manage application.

## System Requirements

Operating System:	Windows (32/64 bit), Linux (32/64 bit), Solaris, Mac OS X, UNIX
Disk Space:	100MB
