

## Sample Profile

*We asked Dr. Palmer of All About Eyes in Georgetown, TX to read chapter one of this eBook and then put together a practice profile and requirements description. (Just like we hope you will do!) She came up with a great example that we had to share. Check it out!*

# Lori Palmer, OD

## All About Eyes - Georgetown, TX

I run a **single location practice** where I am the **sole** practitioner. I have a staff of **3 employees** that manage the front desk duties, and I **do not** have a practice management and EHR solution. My staff **isn't technical**, and unfortunately, I **do not have the IT expertise** nor the bandwidth to add an additional resource for IT needs.

Because of this, I am looking for a solution that is going to be **easy to use** and that doesn't require me to maintain a server setup in my practice. I need something that I can **implement quickly** without a huge investment in hardware. I like to **work from home** sometimes, so it would be a big benefit if I could access the system anywhere.

# Selecting a Practice Management & EHR Solution

*(The Ultimate Guide for Optometry)*

On top of learning how to create a practice profile, our eBook will discuss your practice needs, different technology options, and total cost of ownership.

Read our eBook before you start shopping for a practice management and EHR software!
