Order Sheet Upload Manual

You now have the opportunity to order several **dissolved or dried 3' and 5' oligos** at the same time.

1. In the Excel file choose Scale, Purification, Dissolved or Dry, and Concentration. These specifications apply to all oligos on the sheet.
2. Give a name for each oligo, this can be a combination of letters, numbers or special characters.
3. Provide your sequence under 5'-3' sequence and choose 3' and/or 5' modifications from the drop down menu.
4. Once you have finished entering your oligos, click on the "Upload sheet" tab. You should see your entered data. Now go to save as and save the "Upload sheet" as a Text (tabulator separate) (*.txt) file.
5. At this point you will need to login to your Webshop account and press "Order sheet upload". When finished uploading you will see a list of your oligos.
6. From here you can continue to your "Cart" and approve your order as usual.

The SingleTubeOrderSheet.xlsx file can be downloaded in the Webshop on the "Order sheet upload" page.
