GCC Servicing Systems Helps AmeriFirst Home Mortgage Transition Government Loan Servicing In-House

SOUTHFIELD, Mich., Oct. 31, 2011 – [GCC Servicing Systems](#), a provider of [mortgage servicing technology](#) and solutions, today announced that Kalamazoo, Mich.- based [AmeriFirst Home Mortgage](#) has chosen to transition its government loans in-house to be serviced on GCC's [G/SERV](#) platform.

The mortgage banker is an existing GCC client and has served its borrowers for more than 25 years through more than 30 branches in nine states. Recently, the lender opted to bring its FHA and VA loan servicing in-house from a sub-servicer due to dissatisfaction in the overall servicing process. The lender will now service the loans on GCC's G/SERV platform, which fully automates the essential monthly investor accounting and reporting as well as default reporting for the government loans. AmeriFirst can now oversee the handling of loans from beginning to end with the attention to detail and high level of service their borrowers expect.

"Our past experience in working with GCC has been crucial to our success in seamlessly servicing loans and making our servicing process more efficient," said Mark Jones, president of AmeriFirst. "We had originally outsourced our FHA and VA servicing needs as those loans require specialized expertise, yet quickly became aware that we could do a much better job internally. By bringing our government servicing in-house and working with GCC, we knew we had dedicated resources and an expert partner to help us handle the volume and loan type with behind the scenes knowledge and maintenance."

"AmeriFirst has been a valued client for many years and we are pleased to help them make this transition," said Glenn Liebowitz, president of GCC. "GCC enables lenders such as AmeriFirst to service all loans in-house while continuing to provide the personal, attentive service essential to its borrowers. The G/SERV platform gives servicers control over their loans, business processes and borrower outreach while not incurring the issues associated with outsourcing."

About GCC Servicing Systems

GCC Servicing Systems is a mortgage servicing software technology and service provider that cost-effectively automates all aspects of loan servicing and data management. The company was founded in 1977 as a mortgage service bureau and was known as Glenn Computer Corporation until 2003. Today, GCC Servicing Systems customers include mortgage servicing departments of banks, credit unions and mortgage companies with 500 to one million loans. Based in Southfield, Michigan, the company's mortgage servicing solutions, superior customer support and cutting-edge technology, G/SERV, are available 24 hours-a-day, seven days-a-week, 52 weeks-a-year.
