WELCOME TO YOUR MEASURING GUIDE

Living in a highly active hurricane area means six months out of every year is spent on **high alert**. Every new developing tropic disturbance out in the Gulf of Mexico or Atlantic Ocean has the potential to be a Hurricane Andrew, Katrina, or Charlie.

Thankfully, storms of these magnitudes don't hit land every season; enough damage is caused by weaker and more frequent storms than most homeowners realize. Protecting both your home and business from the high winds storm prone states have come to know should be top priority and one of the best ways to do that is with the use of impact windows.

Keep in mind as you consider protecting your home or business with impact windows that for full protection and full insurance discounts, ALL openings of your structure need to be covered by an approved hurricane protection method.

Using our DIY Impact Window Pricing Kit is as easy as 1 - 2 - 3!

1. **Read through this guide.**
2. **Take and record your window opening measurements on the Window Sizing Chart**
3. **Input measurements, style, and window grade into the calculator**

That's it!

Our easy to use online Window Pricing Calculator will calculate the price of both standard and premium impact windows based on your measurements. This tool will also guide you in what styles and the number of windows that will fit in your opening.

Let's get started!

IMPACT WINDOW OPTIONS

WINDOW TYPES

Single Hung • Double Hung • Casement • Fixed/Picture • Horizontal Roller Sliding Glass Door

STANDARD IMPACT WINDOWS

- Come in an aluminum frame
- Are a single plane
- Has clear glass
- And are impact resistant to meet code requirements of Florida Building Code

PREMIUM IMPACT WINDOWS

- Comes in both vinyl and aluminum frames
- Are insulated
- Has energy efficient coating
- Offers various tints to choose from
- Choice of additional insulation by Arson gas
- And are impact resistant to meet Florida and Miami-Dade County Building Codes

STEP 1

MEASURE THE WIDTH

From inside the home, measure the width from drywall to drywall in 3 places;

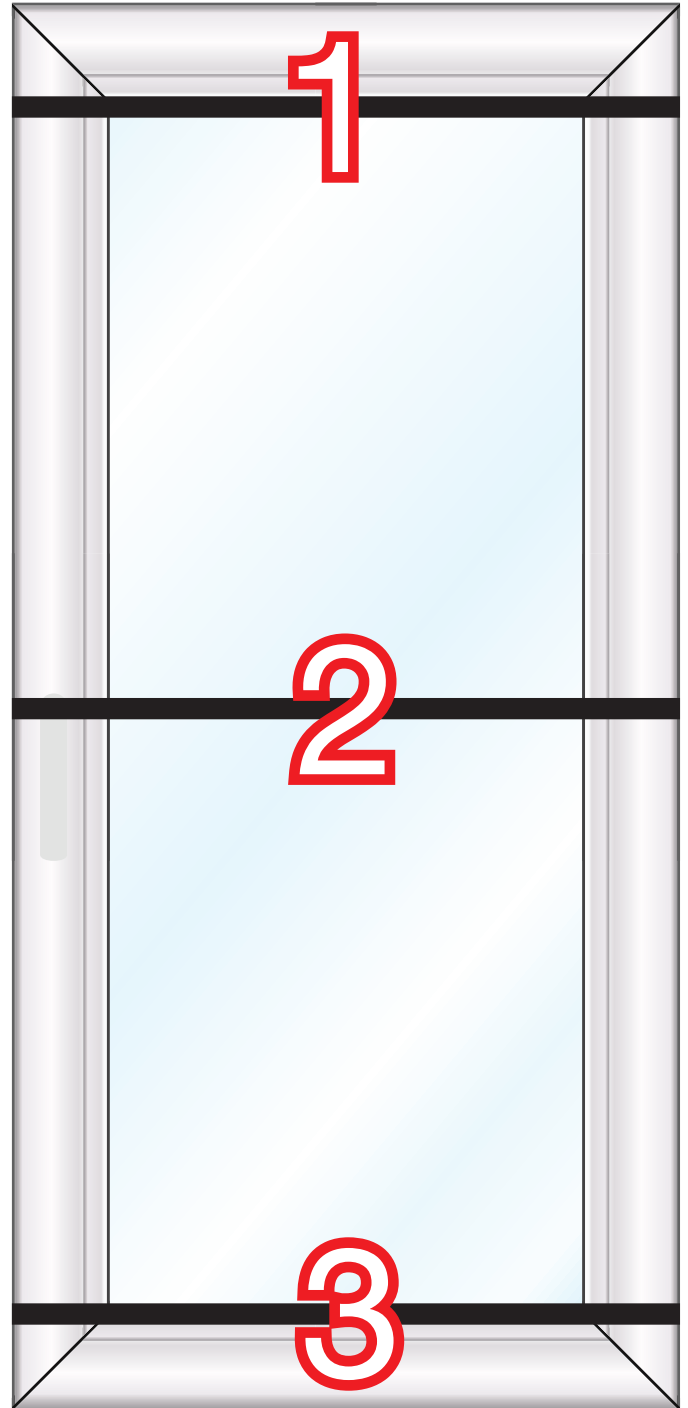

TOP, CENTER, BOTTOM.

The *smallest* of these measurements will be your **DRYWALL OPENING WIDTH.**

Always specify width first, height second!

Use the space below for your notes and use your final calculations on the **Window Sizing Chart.**

Notes:

STEP 2

MEASURE THE HEIGHT

From inside the home, measure the height from the drywall at the head of the opening to the top of the sill (usually a marble sill) in 3 places;

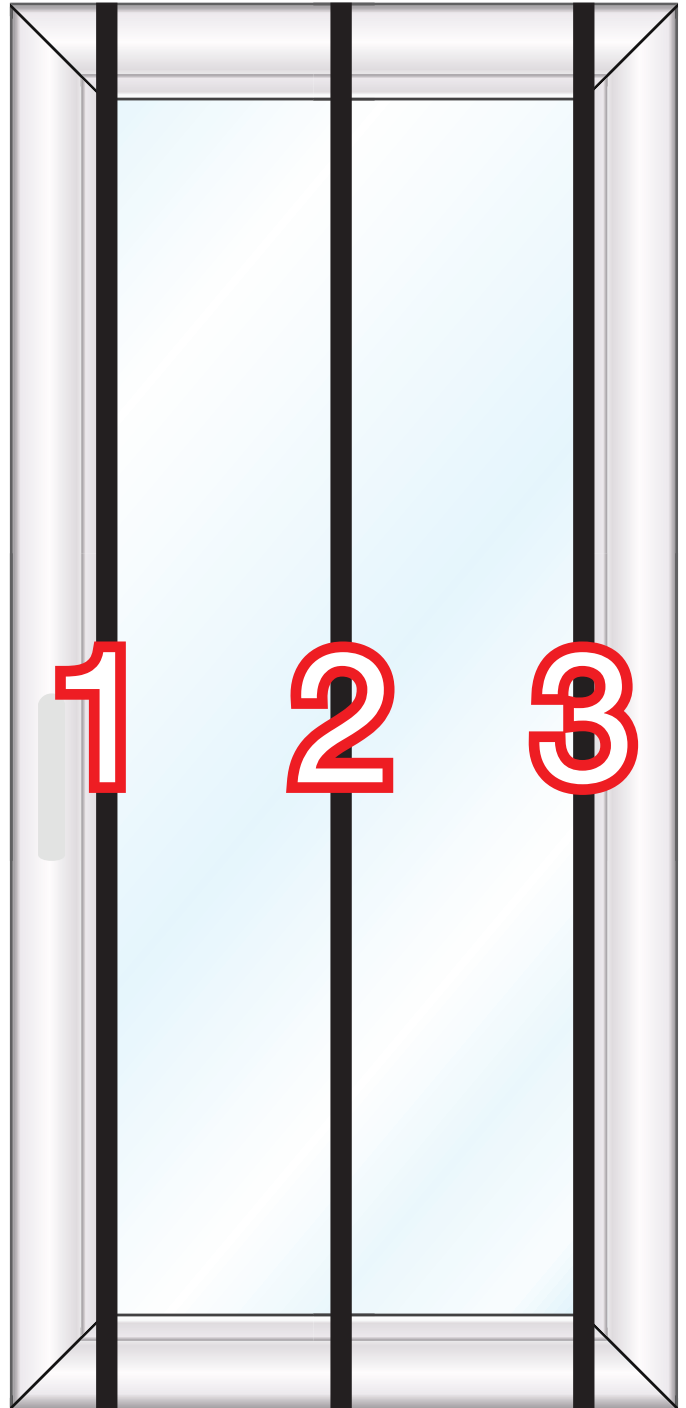

LEFT SIDE, CENTER, RIGHT SIDE.

The smallest of these measurements will be your **DRYWALL OPENING HEIGHT.**

Always specify width first, height second!

Use the space below for your notes and use your final calculations on the **Window Sizing Chart.**
