Mobile Access to Secure Enterprise Chat

MindLink Mobile brings the power of persistent Enterprise Chat, Presence and Instant Messaging to BlackBerry, Android and iPhone users.

The pace of business is increasing. In this new business environment, you need the most productive medium for rapid decision making throughout the business. We call this **Business Critical Collaboration.** Email isn't good enough anymore. **Enterprise Chat is the collaboration tool for the agile, real-time company of today.**

MindLink Mobile is the only **Enterprise chat** application that allows teams to coordinate and exchange vital information rapidly, persistently, securely and compliantly across the business.

MindLink Mobile is tailored to deliver only **the most critical information and notifications** whilst you're on the go through advanced **filtering & alerting options.**

MindLink Mobile is fully integrated into your existing business processes. Providing the necessary visibility of information from numerous sources – line-of-business applications or external news sources – in one simple and streamlined

Key Features

- Prioritise your workflow by Selecting a subset of your desktop groups and contacts when mobile
- LiveStream brings multiple conversations into one single overview
- Custom notifications allow you to decide how and when you want to be alerted
- All past group message history is persistent, stored and searchable
- MDM support for added security e.g. SECTOR, Good etc.
- Enterprise features – #hashtags, @mentions, critical IM, room and user links

Key Benefits

- Collaborate on-the-move for faster, more informed decision making
- Reduce information overload through advanced filtering and alerting
- Access all conversations via any mobile device whilst away from the office
- Quickly locate key contacts and check their availability for instant messaging
- Easily retrieve the information by reviewing or searching past conversations
