FREQUENTLY ASKED QUESTIONS:

IS MY FISH OIL SUPPLEMENT IFOS™ CERTIFIED?

The only way to tell if a product is truly IFOS™ certified is to look up its lot-specific **Consumer Report** and view the testing results. To find out if a product has passed the IFOS™ standards for contaminants, stability and omega-3 potency, follow these simple steps

1 **Find the lot or batch number on the product label. It should look similar to this: "Lot No. 1234"**

2 **Visit the Consumer Reports page on the IFOS™ website**

3 **Search by product name, company name or batch/lot number. Or, simply scroll down the page to view all companies that have IFOS certified products**

4 **Find the name of the company who makes the product and click on it to view the list of products that have been tested**

ACME

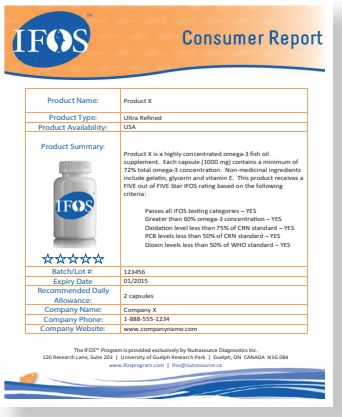

Product Name	Batch/Lot	Expiry Date
ACME Fish Oil +	1234	31/01/2017
ACME Fish O-Mega	4567	31/01/2017

5 **Find the name of the product and click on it to display all the lots of that product that have been tested**

6 **Click on the batch/lot number that matches the one shown on the product label.**
This will open the product's Consumer Report as a PDF file

ACME

Product Name	Batch/Lot	Expiry Date
ACME Fish Oil +	1234	31/01/2017

7 **You can now view, print or save the Consumer Report which contains all the testing results for that product**
