

“Spring” Nursery Benches

- Supplied in kit form to minimise the transport costs.
- Made from heavy duty galvanised (internal & external) steel tube 25.4mm OD x 1.6mm thick.
- Special sized 75mm x 25mm x 4mm diameter galvanised mesh used on all benches.
 - Allows pots to sit on mesh right up to the edges of the bench, without falling over.
 - Mesh snaps easily over steel tubing, holding it tight (no fasteners).
- Available in lengths of 2350mm, 1750mm and 1180mm.
- Heights:
 - 750mm – single layer benches
 - 150mm and 750mm – double layer benches
 - 150mm, 750mm and 1350mm – triple layer benches
- Standard widths are: 300mm, 525mm, 775mm, 1150mm and 1225mm.
- Continuous length and special bench kits made to order.
- 2 Tier, 3 Tier and shade covered 3 Tier benches are also available as standard.
- Single layer and Double layer benches can be supplied with a 10 degrees sloping top shelf.

Nursery & Horticultural Equipment

“Spring” Nursery Benches

“Spring Benches” can be assembled in a few minutes without the need for any bolts, screws or other fasteners. The various tubes simply slide into the appropriate sockets to create a strong assembly. Even after twenty years the benches can be disassembled simply by pulling them apart, providing a smear of petroleum jelly has been applied inside the fittings before assembly.

Many specials have been designed and manufactured over the years. With our diverse design and large, well-equipped manufacturing facility we can provide benching and material handling equipment to suit any of your special needs.
