10 HOME ORGANIZATION TIPS: ONE FOR EVERY SPACE

From small to large organization tasks, your home is always in need of some cleaning or decluttering. But those long to-do lists can be overwhelming and intimidating for busy families.

So Cook has you covered with this list of one task to complete for each space in your home or yard. At Cook Portable Warehouses, our website, blog and more are the places to find helpful tips, tricks and ideas to organize your spaces!

What makes more sense than Cook, the leader in durable and versatile storage solutions like portable utility buildings, garden sheds and more, being the place to find every organizational tip under the sun!

And keep checking the [Cook blog](#) for an in-depth look into what you can do to spruce up every room, place and space in your home!

MAIN ROOMS

Kitchen: Take advantage of your wall space by installing some basic hooks for hanging towels, oven mitts and aprons to keep those things off your countertops. This ensures that everything is accessible and out of the way! Or hang a shower organizer inside the door under your sink to hold cleaning products. Living/Family Room: Streamline the look of your living space by cutting down on the knick knacks on your tables and entertainment center. But add small touches to make the room still feel homey. Use a magazine basket for reading materials or create a picture wall with your framed shots!

Home Office: Go through the papers you have on top of your desk, in drawers and filing cabinets. First, recycle those things you don't need and convert what you can into an electronic version. Then, consider what you really need to have at your fingertips and what papers, folders, etc. can be put away neatly into shelves and drawers.

Bedrooms: Think about the items that you have on top of your nightstand and how much you use them on a daily basis. Only keep your stuff like an alarm clock, lamp or jewelry box and move less used items into a drawer. Use alligator clips on the side of your bedside table to hold cord chargers.

SMALLER PLACES

Bathrooms: Go through all those things that tend to pile up like bath products, medicines and other extras that you just don't need anymore. Throw away any expired medical items, cleaning products, etc. and reorganize your space in a smart way. Organize medicines by category such as digestive, nasal, mouth/throat and allergy. [Learn more Simple Ways to Organize your Bathroom.](#)

Laundry Room: If you have extra built-in shelving in your laundry room, fold clothes, sheets or towels and put them into containers labeled by room. Then, you can delegate a family member to pick up those things and put them away.

Closets: Use the tabs from soda cans to double your hanging space. Slide the tab to the base of the hanger hook and then add another hanger! Shower curtain rings are another great way to store multiple items on one hanger. Both methods allow you to keep your outfits together and ready for the next day!

OTHER AREAS

Garage: There are plenty of inexpensive items that you probably already own that can be repurposed in your garage area. For example, use old muffin/cupcake tins as a hardware bin to hold loose fasteners, screws, nails and other electrical parts. You can even attach the tin underneath a shelf so it easily pivots out when you need something. [Learn more tips for Smartly Organizing your Garage.](#)

Yard: When you are replacing your potted plants each season, put an empty plastic pot in the hole first. Then, your pots with flowers or plants can be easily switched out depending on the season. Using packing peanuts at the bottom of large flower pots is less expensive, makes them easier to move and helps with drainage.

Portable Shed: If you are still in need of a better organizational structure in your home, garage, yard or anywhere else, adding a Cook Portable Warehouse could be the answer. Cook buildings can be easily integrated into your existing personal style and the exterior and interior can be customized to your needs.
