

Rail and metro leaders confirmed for CBTC WORLD CONGRESS 2014

A host of rail and metro experts from across the world are confirmed as speaking at the 5th annual CBTC World Congress incorporating SmartMetro – the original and world leading event for over 300 metro network experts. These experts will be leading two days of expert insight, practical case studies, in-depth discussion, technology launches, workshops, site visits and networking in London between the 4-6th November 2014.

CBTC World Congress confirmed speakers include: Terry Morgan (Chairman, Crossrail), Mike Brown (Managing Director, Transport for London), Joubert Flores (Director, Metro Rio), Richard Wong (Principal Fellow of Systems, SMRT), Jeremy Long (CEO European Business, MTR Corporation) and many more.

“With increasing populations and growing passenger demands in an increasingly urbanised world, metros and urban rail systems are under more pressure than ever to offer a reliable, comfortable and high capacity service to the passenger. With evolving IT and the digital revolution these metros must not only exploit the potential of CBTC to drive reliability and efficiency but, create intelligent integrated networks to improve service and remain competitive. CBTC needs to be at the heart of an integrated, smarter, cost-effective network. The 5th annual CBTC World Congress and SmartMetro showcase provides the definitive platform for global metros to achieve this aim.”

– Alex Williamson, Managing Director, Global Transport Forum

Created with the help of a steering committee including RATP, NJ Transit, Metroselskabet and Keolis, this is the definitive platform to share best practice and drive towards an intelligent next generation metro system and is now open for business.
