The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of DOI and the science needs of its land and resource management bureaus. The U.S. Geological Survey also works in collaboration with other Federal, State, and Tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues pertaining to the water, land, geologic, and biological resources of the Nation.

The 2010 Budget continues science programs that generate relevant, objective information for land managers and for communities throughout the Nation.

Geographic research, investigations, and remote sensing.—The USGS Geography Program seeks to observe the Earth at various scales using remote sensing to understand the human and environmental dynamics of land change. The Geography Program also provides scientific information to describe and interpret America's landscape by mapping the terrain, monitoring changes over time, and analyzing how and why these changes have occurred. The knowledge gained through these activities is used to model the processes of change and to forecast future changes. The National Geospatial Program is focused on improving geospatial data access, integration, and applications through implementation of The National Map and the National Spatial Data Infrastructure (NSDI). Partnerships with other Federal, State, and local agencies; the private sector; and academia are the keystone for accomplishing this mission.

Geologic hazards, resources, and processes.—The national program of onshore and offshore geologic research and investigations produces: 1) information on natural hazards of geologic origin such as earthquakes, volcanic eruptions, landslides, and coastal erosion; 2) geologic information for use in the management of public lands and in national policy determinations; 3) information on the chemistry and physics of the Earth, its past climate, and the geologic processes by which it was formed and is being modified; 4) geologic, geophysical, and geochemical maps and analyses to address environmental, energy and mineral resource, and hazards concerns; 5) environmental, hazards, energy and mineral resource assessments; and 6) improved methods and instrumentation for detecting and monitoring hazards, disseminating hazards information, and conducting assessments.

Water resources investigations.—The USGS water resources programs produce data, analyses, assessments, and methodologies to support Federal, State, Tribal, and local government decisions. This information is used by decision-makers to minimize loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; effectively manage water resources for domestic, agricultural, commercial industrial, recreational, and ecological uses; protect and enhance water resources for human health, aquatic health, and environmental quality; and, contribute to wise physical and economic development of the Nation's resources for the benefit of present and future generations. These programs work cooperatively with other Federal agencies, States, and other entities to leverage Federal resources to meet their mutual water information needs.

Biological research.—The national program of biological research: 1) conducts biological resources inventory and monitoring; 2) provides scientific information for the management of biological resources; and 3) predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats. The program conducts the high priority biological research needed by DOI's land management bureaus and operates the Cooperative Research Unit program, which provides research and information to resource managers, and trains natural resource professionals in partnership with university and State scientists.

Enterprise information.—The USGS enterprise information program supports bureau-level activities and investments in the areas of information technology, information security, information management, information policy and standards, and information science. As the primary vehicle for planning and executing the broad information goals and objectives of the USGS, the program provides bureau-level information policies, infrastructure, and services needed to support the bureau's scientific mission; creates an integrated information environment within the USGS; ensures that the bureau meets legislative and administrative information

management mandates; and provides the basic foundation for easy discovery, access, acquisition, and use of USGS data and information.

Global change.—USGS provides critical science, monitoring, and predictive modeling of information related to our changing climate and its effects on the landscape and the Nation's resources. The knowledge and information that results from this program helps policy makers, resource managers, and citizens make informed decisions about the management of the landscapes for which they have responsibility and on which they live.

Science support.—Science support provides for bureau-wide management; executive direction and coordination; administrative, human resources, and business information systems management; and financial and personnel systems support provided by DOI's National Business Center.

Facilities.—This activity finances: 1) rental payments and operation and maintenance for properties; and 2) deferred maintenance and capital improvement.

Reimbursable program.—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

Ecological Services.—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help make the listing of species under the Endangered Species Act unnecessary and protect and recover those species that are listed. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

National Wildlife Refuge System.—The Service maintains the National Wildlife Refuge System consisting of 550 refuges, waterfowl production areas in 205 counties that are managed by 37 wetland management districts, and 49 coordination areas. The National Wildlife Refuge System administers this network of roughly 96 million acres of land and more than 78,000 square miles of waters to conserve and restore fish, wildlife, plants, and

RESOURCE MANAGEMENT—Continued

their habitats, within the United States for the benefit of present and future generations of Americans.

Migratory Bird Management, Law Enforcement, and International Affairs.—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 900 species of birds. Grants and partnerships are key to these programs, such as the Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protections laws, and works in partnership with international, state, and tribal counterparts to conserve wildlife resources. This activity also supports the Service's International Affairs program.

Fisheries.—The Fisheries Program consists of 70 national hatcheries, nine Fish Health Centers, seven Fish Technology Centers, 65 Fish and Wildlife Conservation Offices, and a Historic National Fish Hatchery. Working with partners, the Fisheries Program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American Public.

General operations.—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all fish and wildlife programs. The funds also support the National Conservation Training Center, and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths and Territories through a formula-based apportionment, and to Tribes through national competitive award processes. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern, thereby avoiding the costly and time-consuming process that occurs when habitat is degraded or destroyed and species populations plummet. This year, new funding is proposed for incorporating strategies to address the impacts of climate change on fish and wildlife into State Wildlife Action Plans. The new funds will also support fish and wildlife climate change related adaptation actions included in the state plans.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities. Emphasis is placed on acquiring important fish and wildlife habitat necessary for the conservation of endangered and threatened species; nationally important wetlands; and additions to existing national wildlife refuges. The program includes projects that use alternative and innovative conservation tools, such as easements, and projects that include the input and participation of the affected local communities and stakeholders.

The Landowner Incentive Program provided cost-shared, competitive grants to States, the District of Columbia, territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These State, Tribal, and territorial programs provided technical and financial assistance to private landowners all across the country to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008.

This grant program has been superseded by the State Wildlife Grant program. The account last received an appropriation in 2001 and has been canceled.

Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for conservation, recovery, and monitoring projects for species that are listed, or species that are candidates for listing, as threatened or endangered. Grants are also awarded to States and U.S. territories for land acquisition in support of Habitat Conservation Plans and species recovery efforts in partnership with local governments and other interested parties to protect species. The Fund is partially financed by permanent appropriations from the General Fund of the U.S. Treasury in an amount equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts and amounts equal to Lacey Act receipts over \$500,000. The actual amount available for grants is subject to annual appropriations.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to

counties in which Service fee lands are located. If the net revenues are insufficient to make full payments according to the formula contained in the Act, direct appropriations are authorized to make up the difference.

RECREATION ENHANCEMENT FEE PROGRAM, FWS—Continued

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 200 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. FLREA authorizes this program through 2014.

The Federal Aid in Wildlife Restoration Act, now known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program and a firearm and bow hunter education and safety enhancement program that provides grants to the States.

The budget proposes a new grant program, funded with discretionary appropriations—not excise tax receipts, to support ongoing, expanded, and new State, Territory, and Tribal hunter, angler, or wildlife conservation management programs. The new grant program will place special emphasis on non-traditional participants (i.e., urban, minority, and Tribal youth).

The Federal Aid in Sport Fish Restoration Act, now known as the Dingell-Johnson Sport Fish Restoration Act (as modified by the Wallop-Breaux and other amendments), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment, and certain other sport fish related products.

Since 1992, the Sport Fish Restoration Account has supported coastal wetlands grants pursuant to the Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646). Additional revenue from small engine fuel taxes was provided under the Surface Transportation Extension Act of 1997 and again by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users, enacted for 2006 and beyond.

The Coastal Wetlands Planning, Protection and Restoration Act is funded through the Dingell-Johnson Sport Fish Restoration Act, which requires an amount equal to 18.5 percent of net deposits into the Sport Fish Restoration and Boating Safety Trust Fund, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101-233).

The Clean Vessel Act authorizes the Secretary of the Interior to make grants to States, in specified amounts as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. The Dingell-Johnson Sport Fish Restoration Act, as amended, provides for the transfer of funds from the Sport Fish Restoration and Boating Trust Fund to the Sport Fish Restoration Account for use by the Secretary of the Interior to carry out the purposes of this Act and

for use by the Secretary of Homeland Security for State recreational boating safety programs (46 USC 13106(a)(1)). The Sportfishing and Boating Safety Act of 1998 authorizes the Secretary of the Interior to develop national and state outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources, as well as to make grants to states for developing and maintaining sewage disposal facilities and other boating facilities for recreational vessels.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat and provision of access for public use.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program and provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

It also funds the operations of the United States Park Police. Funds within this appropriation are used to support the cooperative effort for restoration of the Everglades and are available for two years. Within this appropriation, repair and rehabilitation funds are also available for two years, to provide the flexibility needed to carry out this project program, in which typical projects include, but are not limited to, facility, campground, and trail rehabilitation; roadway overlay and/or reconditioning; bridge repair; wastewater and water line replacement; and the rewiring of buildings. The repair and rehabilitation program includes funding to implement an automated facility management software system and to conduct comprehensive facility condition assessments.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support NPS land acquisition activities and provide grants to States for the purchase of land for recreation activities. The Federal Land Acquisition Program provides funds to acquire certain lands, or interests in lands, within authorized park boundaries for inclusion in the National Park System to preserve nationally important natural and historic resources. Funds are also used for matching grants for the purchase of Civil War Battlefield lands. The State Assistance Program provides grants for a wide array of State recreation projects as well as for acquiring lands, or interests in lands, for outdoor recreation purposes. Funds are also included for the National Park Service to manage and coordinate the Federal Land Acquisition and State Assistance Programs.

Outer Continental Shelf Oil Lease Revenues. The Gulf of Mexico Energy Security Act of 2006 (P.L. 109-432) allows a portion of the revenue collected from oil and gas leasing activities in qualified areas just becoming available for leasing in the Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund (LWCF) and distributed to states in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Omnibus Appropriations Act, 2009 (P.L. 111-8) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration.

Recreation Fee Program.—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005, and authorizes this program through 2014. By law, up to 80 percent may be retained by the collecting park and the remainder retained for discretionary, Servicewide use by the National Park Service Director. Also by law, up to 15 percent of proceeds may be used for administration, overhead, and indirect costs related to the program, and net proceeds are to be used for high-priority visitor service or resource management projects throughout the National Park System. Proceeds from the sale of the America the Beautiful passes, which allows access to all public lands that charge fees for a year, are to be distributed between the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with Public Law 108-447.

Deed-restricted parks fee program.—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

Transportation systems fund.—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105-391.

Educational expenses, children of employees, Yellowstone National Park.—Revenues received from the collection of short-term recreation fees to the park are used to provide education facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

Payment for tax losses on land acquired for Grand Teton National Park.—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. The Historic Preservation Fund provides Preserve America grants that help States and local communities demonstrate sustainable uses of historic assets and sites through heritage tourism. The Historic Preservation Fund also provides Save America's Treasures matching grants to help restore historic sites and collections, including significant documents, objects, manuscripts, photographs, works of art, journals, still and moving images, sound recordings, historic structures, and sites that document and illuminate the history and culture of the United States of America.

Park concessions franchise fees.—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105-391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

Concessions improvement accounts.—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

Park buildings lease and maintenance fund.—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105-391.

Operation and maintenance of quarters.—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

Delaware Water Gap, Route 209 operations.—Fees collected for use of Route 209 within the Delaware Water Gap National Recreation Area by commercial vehicles are used for management, operation, and maintenance of the route within the park as authorized by Public Law 98-63 (97 Stat. 329), section 117 of Public Law 98-151 (97 Stat. 977) as amended by Public Law 99-88 (99 Stat. 343), and section 702 of Division I of Public Law 104-333 (110 Stat. 4185). The appropriation was reauthorized in fiscal year 1997 by Public Law 104-333 and in fiscal year 2006 by Public Law 109-156.

Glacier Bay National Park resource protection.—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of Public Law 104-333 (110 Stat. 4185).

Filming and photography special use fees.—The National Park Service is authorized to retain fee receipts that are collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Activities authorized for funding include acquisition of emergency response equipment to prevent harm to aquatic park resources from permittees and studies to quantify the impact of permittees' activities on wildlife and other natural resources of the park.

Contributions to U.S. Park Police annuity benefits.—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85-157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the De-

partment of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

This appropriation funds a program to consolidate fractional interests in Indian lands. Funds will be used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), the American Indian Probate Reform Act of 2004 (P.L. 108-374), and other authorities.

GIFTS AND DONATIONS, BUREAU OF INDIAN AFFAIRS—Continued
in furtherance of any program authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Appropriations for the Bureau of Indian Affairs (except the Revolving Fund for Loans Liquidating Account, Indian Loan Guaranty and Insurance Fund Liquidating Account, Indian Guaranteed Loan Financing Account, Indian Direct Loan Financing Account, and the Indian Guaranteed Loan Program account) shall be available for expenses of exhibits.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any *federally recognized* tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

Appropriations made available in this or any other Act for schools funded by the Bureau shall be available only to the schools in the Bureau school system as of September 1, 1996. No funds available to the Bureau shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau school system as of October 1, 1995. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1146 of the Education Amendments of 1978 (25 U.S.C. 2026)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter schools operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula. Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account will be used to meet final transition responsibilities of the United States. Outlays from numerous on-going infrastructure construction projects in the Republic of Palau and the other two entities will continue as provided by the Compacts of Free Association and appropriation laws and will be reported as Trust Territory expenditures until such time as the activities cease.

The peoples of the Marshall Islands and the Federated States of Micronesia approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, Public Law 108-188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office's focus in assisting the Secretary and the Congress is to target resources toward developing solutions for the Department's most serious management and program challenges, and toward high-risk areas vulnerable to fraud, waste, abuse and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and the Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results about which Americans care most.

Tribal trust funds are deposited into a consolidated account in the U.S. Treasury pursuant to: (1) general or specific acts of Congress; and (2) Federal management of Tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to the respective Tribal groups for various purposes, under various acts of Congress, and are subject to the provisions of Tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

Commencing with 2000, most Tribal trust funds, including special funds, managed by the Office of the Special Trustee for American Indians were reclassified as non-budgetary. Ownership of these funds did not change, nor did the Federal Government's

management responsibilities; changes were made for presentation purposes only. Some Tribal trust funds will remain budgetary, in either this Tribal Special Fund or the Tribal Trust Fund presented later in this section. Most of the assets of these funds are in investments held outside Treasury.

The following accounts are included in the Tribal Special Fund: Tribal Economic Recovery Fund; Three Affiliated Fort Berthold Trust Fund; Standing Rock Trust Fund; Papago Cooperative Fund; Ute Tribe Trust Fund; Pyramid Lake Indian Reservation Trust Fund; San Luis Rey Water Authority Trust Fund; Cochiti Wetfields Solution; and Southern Arizona Water Rights Settlement Act. More detailed information on specific account data is provided in the budget justification for the Office of the Special Trustee for American Indians.

The Indian Gaming Regulatory Act, as amended by the 1998 Interior and Related Agencies Appropriation Act (P.L. 105-83), established the National Indian Gaming Commission as an independent agency within the Department of the Interior. The Commission monitors and regulates gaming activities conducted on Indian lands. Operating costs of the Commission are financed to the greatest extent possible through annual assessments of gaming operations, regulated by the Commission. The Native American Technical Corrections Act of 2006 (Public Law 109-221) included a provision replacing the previous fee limitation contained in the Indian Gaming Regulatory Act with a maximum of 0.08 percent of the gross gaming revenues of all gaming operations subject to regulation under Indian Gaming Regulatory Act.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 et seq.) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources

and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a departmentwide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 19jj *et seq.*). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The Budget reflects the receipts, transfers, and mandatory spending by the Department of Interior associated with the civil and criminal settlements resulting from the 1989 *Exxon Valdez* oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and Alaska State natural resource trustee agencies to restore the natural resources and services damaged by the spill. The *Exxon Valdez* Oil Spill Trustee Council consists of 3 State and 3 Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The original civil settlement with the Exxon Corporation included a re-opener provision valid from September 2002 to September 2006, which provided an opportunity for the Trustee governments to claim up to an additional \$100 million for natural resource injury that could not have been known or anticipated at the time of settlement. In late 2006, the Trustee governments issued a demand letter for \$92 million to the ExxonMobil Corpor-

ation, as well a comprehensive restoration project plan for the clean up of lingering oil.

The civil settlement and interest earned to date total roughly \$1 billion, of which \$132 million remains, outside the Treasury. The balance is managed on behalf of the Trustee Council by the State of Alaska, (*Exxon Valdez Investment Fund*), with funds earmarked for future habitat acquisition and protection and for marine research and ecological monitoring in the spill zone.

Fire Operations.—This activity funds the Preparedness and the Fire Suppression Operations subactivities. The Preparedness subactivity funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning. The Fire suppression operations subactivity funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected, and consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. Funding requests reflect the historical 10-year average of suppression expenditures, adjusted for inflation. The Budget completes the development of a system that allocates fire preparedness resources (e.g., firefighters and equipment) effectively across geographic areas. The Administration intends to implement important reforms within DOI and the Forest Services wildland fire management program that strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

Other operations.—This activity funds programs designed to reduce the risk of damage resulting from catastrophic wildland fires. Hazardous fuels reduction, fire facilities construction and maintenance, post-fire rehabilitation of burned areas, applied research, and grants to rural fire departments are funded in other operations. The hazardous fuels reduction activity includes the planning, all operational aspects, and monitoring of treatments to reduce fuel loads and promote ecosystem health in forests and rangelands. Methods for fuels reduction include prescribed fire, mechanical, and chemical treatments or a combination of methods. In FY 2010, all hazardous fuels project funding will be allocated using the Hazardous Fuel Prioritization Allocation System, which ranks and prioritizes allocations based on factors such as fire risk, efficiency of treatments, and effectiveness of treatment. The fire facilities program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and hazardous fuels reduction. Facilities funded in this activity include crew quarters, warehouses, fire caches, dispatch centers, fire stations, engine storage, and aviation bases. The burned area rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire-adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions.

The joint fire science activity funds the Department's share of the Joint Fire Science program, an interagency partnership to sponsor applied research to assist field managers in fire suppression, fuels treatment, and post-fire rehabilitation. The rural fire assistance program provides support through cost-shared grants to local and rural fire departments that are often the first responders to wildfires on Interior lands.

WILDLAND FIRE SUPPRESSION CONTINGENCY RESERVE FUND
(Legislative proposal, not subject to PAYGO)

For necessary expenses for transfer to "Wildland Fire Management" for emergency fire suppression operations of the Department of the Interior, \$75,000,000, to remain available until expended: Provided, That amounts in this paragraph may be transferred and expended only if all funds appropriated for emergency fire suppression operations under the heading "Wildland Fire Management" have been fully obligated: Provided further,

That amounts are available only to the extent the President has issued a finding that the amounts are necessary for emergency fire suppression operations.

The Budget reflects the President's commitment to wildfire management and community protection by establishing a new Wildland Fire Suppression Contingency Reserve Fund that will provide up to \$75 million for the Department of the Interior's emergency fire suppression operations. These funds will be available after the fully funded ten year average of suppression costs adjusted for inflation, \$370 million, is exhausted. Amounts in the Contingency Reserve Fund would only be available after the issuance of a finding by the President that additional funds for fire suppression operations are necessary. This Contingency Reserve Fund, coupled with reforms to the Department of the Interior's wildland firefighting programs, minimize the need for the Department of the Interior to transfer funds from non-fire programs to pay for firefighting when their appropriated suppression funds are exhausted. It will also lead to improved wildfire operations and promote safe, cost-effective, and accountable results from investments made in managing fire on landscapes.

The Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the National Business Center (NBC). Activities financed through the fund include information technology and security, Departmental news and information, and safety and health initiatives. NBC hosts the Department's administrative systems, including: the Federal Personnel and Payroll System (FPPS); Federal Financial System (FFS); and the Interior Department Electronic Acquisitions

WORKING CAPITAL FUND—Continued

System (IDEAS); and the Financial and Business Management System (FBMS). NBC also provides accounting, acquisition, aircraft, central reproduction, communications, supplies and health services. NBC has expanded payroll services to other agencies as one of the Government-wide payroll providers selected by OPM. Through the National Indian Program Training Center, a component of DOI University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal government employees. The proposed language would expand access to the NIPTC resources, allowing the Center to collect fees for additional services on a reimbursable basis from local, state and tribal governments.

The National Drug Intelligence Center's (NDIC) mission is to provide strategic intelligence and assistance to the drug control, public health, and law enforcement and intelligence communities of the United States in order to reduce the adverse impact of drug trafficking, drug abuse, and other drug-related criminal activity. In addition, NDIC provides timely support to law enforcement authorities and the intelligence community by conducting document and computer exploitation of materials collected in Federal, State, and local law enforcement activity associated with investigations and operations.

NDIC is organized into two operating divisions: the Intelligence Division and the Intelligence Support Division. The Intelligence

Division is comprised of three sections: Information Collection Section (ICS), Intelligence Analysis Section (IAS) and the Intelligence Operations Section (IOS). These sections provide timely strategic domestic drug intelligence assessments focusing on the production, consumption, and trafficking of illicit drugs, document and media exploitation support and developing, coordinating, and collecting data to satisfy Standing Intelligence Requirements (SIR) and project specific Priority Intelligence Requirements (PIR).

NDIC prepares strategic analytical studies on the trafficking of illegal drugs and on related illegal activities. NDIC also produces strategic money laundering reports that help implement anti-money laundering initiatives. NDIC reports address the methods wholesale-level traffickers use to launder drug proceeds. NDIC supports the National Money Laundering Threat Assessment and the National Money Laundering Strategy—interagency projects that enhance the nation's ability to counter international money laundering.

NDIC produces intelligence reports that provide timely, predictive analysis of the threat posed by illicit drugs in the United States. These products address needs at the national, state, local, and tribal levels. NDIC also produces Strategic Threat Assessments which are analytical studies of major drug threats impacting the United States and include the following:

—Geographic Assessments provide strategic overview of the illicit drug threats in the US or specific jurisdictions in relationship to regions within the Organized Crime Drug Enforcement Task Force region, High Intensity Drug Trafficking Area, state, city, border region, etc.

—Organizational Assessments are intelligence products that examine key organizational trafficking threats operating in the United States and their methods of operation.

—Current Intelligence Reports are quick turnaround reports on issues of immediate importance.

NDIC provides real-time support to the law enforcement and intelligence communities by conducting document and media exploitation of materials associated with investigations. NDIC has developed a methodology that allows analysts to quickly organize and assimilate important information in documents and electronic media seized during drug raids. By using this methodology and the Real-time Analytical Intelligence Database (RAID) and HashKeeper software, which were developed in-house, NDIC analysts can organize and assimilate significant amounts of evidence to reveal associations, assets, and methods of drug traffickers to assist criminal investigations and prosecutions. The information is also used to help NDIC analysts better understand the trafficking of drugs in the United States.

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology. This centralized fund, under the control of the DOJ Chief Information Officer, will ensure that investments in information sharing technology are well-planned and aligned with the Department's overall information technology (IT) strategy and enterprise architecture, and that all DOJ components are able to operate in a technologically unified environment, particularly with respect to preventing terrorist attacks on the United States. The current major initiatives/projects are described below.

Joint Automated Booking System.—The Joint Automated Booking System (JABS) is a Department of Justice information sharing project that provides data to the FBI's Integrated Automated Fingerprint Identification System (IAFIS) through an automated process for the collection and transmission of fingerprint, photographic, and biographical data. The mission of JABS is to: (1) improve the booking process through automation; (2) enable agencies to share and exchange arrest information; and (3) maintain a federal offender tracking system.

Justice Consolidated Office Network (JCON) Office Automation.—JCON provides a reliable and robust common office automation platform for several Departmental components. The cornerstone of the project is the JCON Standard Architecture, which defines the IT computing framework, including networked workstations, servers, and printers; a common set of core applications (e-mail, word processing, etc.); and a basic set of system administration tools.

Litigation Case Management System.—This project will develop a common framework for the processes and systems that support litigation case management. The implementation of a common solution for litigation case management systems will provide for: (1) more accurate reporting on case loads and activity across the United States.; (2) operational efficiencies and greater information sharing; (3) long term cost savings by eliminating redundant systems and investments.

JCON S/TS Program.—The JCON Secret/Top Secret (S/TS) Program provides a seamless, Department-wide IT infrastructure for electronically sharing, processing, and storing classified information. JCON S/TS is a reliable, secure system which allows attorneys, intelligence analysts, law enforcement staff, and managers to exchange classified electronic data within and between components on a real-time basis.

Law Enforcement Information Sharing Program.—The Law Enforcement Information Sharing Program (LEISP) is a Department-wide strategy to facilitate the sharing of information about terrorism, criminal activity, and threats to public safety. LEISP will implement the information technology tools needed to facilitate timely, appropriate, and secure sharing of information across the law enforcement community.

Unified Financial Management System.—The Unified Financial Management System will allow the Department of Justice to streamline and standardize business processes and procedures across all components, providing secure, accurate, timely, and useful financial and procurement data to program managers, and to produce component and Department level financial statements.

Resources are requested to support the Department of Justice's law enforcement wireless communications program, including efforts to make more efficient use of radio spectrum as required by 47 U.S.C. 903(d)(1). Wireless communications efforts will address communications shortcomings in key strategic locations, such as along the northern and southern land borders, and in cities or regions that are potential targets for terrorism. Requested resources will be allocated to operations and maintenance requirements; investment in new, more efficient infrastructure and subscriber equipment; promotion of communications interoperability by Federal law enforcement and homeland security personnel; support of existing legacy land mobile radio systems; and management and operating requirements of the Wireless Program Management Office.

The Communications Assistance for Law Enforcement Act (CALEA) of 1994 authorized the Attorney General to reimburse telecommunications carriers for costs associated with modifying digital equipment installed before January 1, 1995, in order that court-authorized wiretaps may be performed.

The Omnibus Consolidated Appropriations Act of 1997 (P.L. 104-208) extended eligibility for reimbursement to telecommunications equipment manufacturers and providers of support services. In addition to direct appropriations to the Fund, Congress authorized Federal agencies with law enforcement and intelligence responsibilities to transfer to the Fund unobligated balances

that are available until expended, upon compliance with Congressional notification requirements.

With the appropriations provided in 2001, total funding for the program has reached \$500 million, the authorization level provided in the Act.

The Office of the Federal Detention Trustee (OFDT) is mandated to direct detention programs and improve and coordinate detention activities for the Departments of Justice and Homeland Security. The Federal Detention Trustee (the Trustee) reports to the Deputy Attorney General on detention activities, policy, and forecasting of appropriations. The Trustee's primary responsibility is to ensure operational effectiveness and the efficient expenditure of appropriated funds so that the Federal agencies involved in detention provide for the safe, secure, and humane confinement of persons in the custody of the United States Marshals Service (USMS). The Trustee's role encompasses the care of Federal detainees in private, State, and local facilities, and includes housing, subsistence, transportation, medical care, and medical guard service. The Trustee also manages the Justice Prisoner and Alien Transportation System (JPATS) and strives to ensure equality among participating agencies while allowing unimpeded prisoner transportation operations.

For 2010, the Trustee will continue to work with State and local governments and private service providers to maintain adequate detention capacity to house detained individuals charged with Federal offenses awaiting trial or sentencing. The Federal Government utilizes various methods to house detainees. For example, detention bed space for Federal detainees is acquired at the lowest cost to the Government through: (1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility. This is mostly paid for in the Federal Bureau of Prisons' (BOP) Salaries and Expenses account; (2) Intergovernmental Agreements (IGAs) with State and local jurisdictions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and, (3) Private performance-based contract facilities, where a daily rate is paid. Based on anticipated growth rates in the Federal detention population, over three-quarters of the USMS's federally detained population will likely be housed in State, local and private facilities.

In an effort to reduce detention costs, the Trustee has implemented efficiencies such as the e-Designate program which automates the sentencing-to-commitment process and accelerates the movement of prisoners from detention to Bureau of Prisons (BOP) facilities. The Trustee's office also facilitated the establishment of Regional Transfer Centers and Ground Transfer Centers to further reduce the time from sentencing to incarceration by accelerating the movement of prisoners to a designated BOP facility and by increasing alternatives to detention programs.

As a key strategy to expand the President's e-government initiative, OFDT has also developed DSNetwork, a multifaceted, full-service Internet site designed to meet various detention services needs. DSNetwork is a consolidated detention services site which allows for automated processing of IGAs (eIGA), provides a facility locator and a Detention Services Schedule, posts detention facility review information, allows agencies to maintain an automated multi-year acquisition plan for long-range planning, and collects and maintains procurement data for agencies to use to assess bed space availability. DSNetwork reduces lengthy and cumbersome workload by transitioning from paper-based processing toward automation and is significantly improving interaction between government agencies and service providers. This web-based, Internet accessible tool provides timely, accurate, and comprehensive detention information on a secure, centralized site (<https://www.ofdt.net>).

Additionally, OFDT developed a Quality Assurance Program (QAP) based on Federal Performance-Based Detention Standards (FPBDS). The elements of the QAP include: Quality Assurance Reviews (QAR) — annual reviews of contracted private detention facilities and identified state and local IGA detention facilities — which produce corrective action plans for any noted deficiencies; a Facility Review Management System, which automates the QAR process; and, a Contract Monitoring Instrument (CMI), which is an automated tool that government representatives can use to monitor the performance of a facility on a more frequent basis, thus ensuring a consistent approach to monitoring non-Federal detention bed space. The QAP data is collected and provided through the DSNetwork to detention agencies and facility providers with the underlying goal of improving the safety, security and treatment of federal detainees.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. Also by statute, the OIG reports to the Attorney General, Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decisionmakers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and Congress and of vital importance to the Department.

The United States Parole Commission makes decisions to grant or deny parole to Federal and D.C. prisoners serving sentences of one year and a day or more, sets conditions of parole, supervises parolees and mandatory releasees, recommittees parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976.

In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective parole supervision program through U.S. and District of Columbia probation officers and through research studies that evaluate the effectiveness of parole programs. The U.S. Parole Commission has responsibility for parole and parole revocation hearings, and supervision of District of Columbia parolees, and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105-33).

The Federal Government is represented in each of the 94 judicial districts and the District of Columbia Superior Court by a U.S. Marshal. The primary missions of the U.S. Marshals Service (USMS) are protection of the Federal judiciary, protection of witnesses, execution of warrants and court orders, and custody and transportation of unsentenced prisoners. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

For 2010, \$134.3 million in program increases are requested for immigration enforcement.

Reimbursable program.—Federal funds in 2010 are derived from the Administrative Office of the U.S. Courts for the court security program, the Office of the Federal Detention Trustee for the housing and transportation of USMS prisoners in non-Federal facilities, the Assets Forfeiture Fund for seized assets management, the Organized Crime Drug Enforcement Task Force Program for multi-agency drug investigations, and the Office of National Drug Control Policy and the Centers for Disease Control for security services. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund, into which forfeited cash and the proceeds of sales of forfeited property are deposited. Authorities of the fund have been amended by various public laws enacted since 1984. Under current law, authority to use the fund for certain investigative expenses shall be specified in annual appropriation acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the fund. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Organized Crime Drug Enforcement Task Force (OCDETF) Program consists of a nationwide structure of nine regional task forces that combine the resources and expertise of its seven member Federal law enforcement agencies, in cooperation with State and local investigators and with prosecutors from the U.S. Attorneys Offices and the Criminal and Tax Divisions, to target and destroy major narcotic-trafficking and money-laundering organizations. The task forces perform the following activities:

Investigation.—This activity includes the resources for direct investigative, intelligence and support activities of the task forces, focusing on the disruption and dismantlement of drug trafficking and money laundering organizations by various organized crime enterprises. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, and U.S. Immigration and Customs Enforcement.

Prosecution.—This activity includes the resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle drug trafficking and money laundering organizations in their entirety, most notably the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys, and the Department of Justice's Criminal Division and Tax Division.

At the request of the Attorney General, the OCDETF member agencies, with input from the intelligence community, developed the Consolidated Priority Organization Target (CPOT) List, which identifies those significant international drug trafficking and money laundering organizations most responsible for the illegal drug supply to the United States. In FY 2008, the CPOT list included 54 international targets. As of January 15, 2009, OCDETF had identified 663 OCDETF investigations that are targeting components of CPOT-listed organizations. The CPOT strategy seeks to incapacitate the foreign-based organization heads, their

domestic transportation and smuggling systems, their regional and local distribution networks, and their financial operations, thereby interrupting the flow of drugs into the United States and diminishing the capacity of the CPOT organizations to reconstitute themselves. The strategy aims to ensure that OCDETF funding is being used as effectively and efficiently as possible. In addition to CPOTs, OCDETF also prioritizes cases linked to Regional Priority Organization Targets (RPOTs), whose drug activities have a significant impact on the particular drug threats facing one or more of the nine OCDETF regions. OCDETF's commitment to pursuing priority targets is evident from the steady increase in the percentage of cases linked to these targets. During 2008, 15 percent of OCDETF's active investigations were linked to a CPOT, while 20 percent were linked to RPOTs.

In 2008, OCDETF initiated 1,064 new cases, a nearly 5 percent increase over the number initiated in 2007. OCDETF district and regional coordination groups are working to ensure that only those investigations that meet the standards established for OCDETF cases are approved and the quality of these new investigations clearly reflects OCDETF's commitment to pursue the most significant drug trafficking and money laundering organizations.

The mission of the FBI is to protect the United States from terrorist and foreign intelligence activities; to uphold the law through the investigation of violations of Federal criminal law; to provide leadership and assistance to Federal, State, local, and international law enforcement agencies; and to perform these responsibilities in a manner that is responsive to the needs of the public and is faithful to the Constitution of the United States.

Protecting America in the current challenging national security and criminal environment requires that the FBI refocus its priorities; realign its workforce to address these priorities; and improve management policies and operating procedures to enhance flexibility, agility, effectiveness, and accountability. The FBI's revised strategic priorities are, in order:

—Protect the United States from terrorist attack,

- Protect the United States against foreign intelligence operations and espionage,
- Protect the United States against cyber-based attacks and high technology crimes,
- Combat public corruption at all levels of government,
- Protect civil rights,
- Combat transnational and national criminal organizations and enterprises,
- Combat major white-collar crime,
- Combat significant violent crime,
- Support federal, state, county, municipal, and international partners,
- Upgrade technology to successfully perform the FBI's mission.

FBI investigations and operations are conducted through a network of 56 major field offices, over 400 smaller field offices (resident agencies), and four information technology centers located throughout the United States; the FBI Academy and engineering complex at Quantico, Virginia; a fingerprint identification and criminal justice information services center in Clarksburg, West Virginia; over 50 foreign liaison posts; and FBI Headquarters in Washington, D.C.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs and by other Federal agencies for certain investigative services, such as pre-employment background inquiries and fingerprint and name checks. The FBI also is authorized to conduct fingerprint and name checks for certain non-federal agencies.

For 2010 the FBI proposes 372 million in program enhancements and \$101 million to support overseas contingency operations. These enhancements support national security, intelligence, information technology, information sharing, and infrastructure needs. Highlights of these initiatives include: (1) enhanced national security and intelligence capabilities, to include training; (2) enhanced surveillance capabilities; (3) enhanced information sharing capabilities; and (4) improved information technology.

The Drug Enforcement Administrations (DEA's) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact upon drug availability in America. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target (CPOT) list, which represents the "Most Wanted" drug supply and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply. DEA places

a high priority on targeting the financial infrastructure of major drug trafficking organizations and members of the financial community who facilitate the laundering of their proceeds. From FY 2005 to FY 2008 DEA denied to drug traffickers more than \$9 billion in revenue. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national security, border security, and immigration.

The resources requested in FY 2010 will allow DEA to build upon its recent accomplishments. According to DEA's analysis of cocaine seizures, DEA's efforts have had a significant impact on the domestic drug market. From January 2007 to December 2008, the price per pure gram of cocaine has increased 104 percent while purity decreased 35 percent. Factors contributing to these favorable results include DEA's Drug Flow Attack Strategy; DEA-led operations such as Operation All Inclusive; Mexico's increased pressure on traffickers; extraditions from Mexico and Colombia; DEA coalitions with host nation counterparts; and the denial of drug trafficking revenue.

DEA's activities are divided into three main decision units:

Domestic Enforcement—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This activity contains most of DEA's resources, including domestic enforcement groups, state and local task forces, other federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. Strategic objectives have been established as follows:

- Identify and target the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

- Systematically disrupt or dismantle targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

- Work with international offices to dismantle domestic organizations directly affiliated with international cartels.

International Enforcement—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. Strategic objectives include:

- Identify, prioritize, and target the most significant international drug and chemical trafficking organizations;

- Disrupt and dismantle the networks, financial infrastructures, operations, and the resource bases of targeted international drug and chemical trafficking organizations; and,

- Prevent drug trafficking organizations from funding terrorist organizations and activities.

State and Local Assistance—DEA responds to clandestine laboratory training requirements, hazardous waste cleanup, and cannabis eradication/suppression needs of the U.S. law enforcement community. DEA supports State and local law enforcement with methamphetamine-related assistance and training, which allows State and local agencies to better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for Americas citizens. By teaching and assisting others in the techniques of clandestine laboratory drug enforcement, hazardous waste cleanup, and cannabis eradication/suppression, DEA is able to expand drug enforcement across the United States in a very cost-effective manner. The strategic objectives are to:

- Provide clandestine methamphetamine laboratory training to state and local law enforcement officers;

- Assist state and local law enforcement with efforts to clean up hazardous waste from clandestine methamphetamine laboratories; and,

- Assist local efforts to control the production of cannabis.

DEA also receives funding through reimbursable agreements. The primary reimbursements to DEA are for the Interagency Crime and Drug Enforcement Task Force program and the Department of Justice Assets Forfeiture Fund.

For FY 2010, \$24,075,000 is requested to expand and reinforce DEA operations on the Southwest Border and its ability to disrupt and dismantle violent Mexican drug cartels. The Southwest Border enhancement includes an increased border presence to interrupt the flow of drugs to Mexican drug rings operating within the U.S., as well as additional positions across the nation to support DEA's Southwest Border investigations. Southwest Border investigations frequently involve drug trafficking organizations operating in U.S. cities far from the border. The enhancement will also support Special Field Intelligence Programs that focus on Mexican drug trafficking organizations operating in the U.S. and Mexico.

For FY 2010, \$10 million is requested to continue initiatives funded in the FY 2008 Supplemental Appropriations Act (PL 110-252). This includes DEA's narco-terrorism initiative coordinated by the Special Operations Division, financial investigations, and the operation and maintenance of the helicopter provided for the Western Hemisphere Foreign-deployed Advisory and Support Teams (FAST).

DEA's general long-term goal supports the Department of Justice's efforts to reduce illegal drug availability. DEA accomplishes its general long-term goal by disrupting or dismantling identified PTOs. The measures below reflect DEA's focus on PTOs and those PTOs linked to organizations on the Attorney General's CPOT list.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. Investigations conducted by DEA's Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. Strategic objectives include:

- Identify and targeting those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cyber crime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

- Support the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support and assistance from the regulated industry;

- Educate the public on the dangers of prescription drug abuse and taking proactive enforcement measures to combat emerging drug trends; and,

- Ensure an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

For FY 2010, DEA is requesting \$2,706,000 for 11 additional chemists to support the Diversion Control Program. These additional 11 chemists will be placed throughout the DEA Laboratory system. Between FY 2006 and FY 2007, DEA added 161 Special Agents to the Diversion Control program. Additional chemists are required to analyze the exhibits submitted by these Special Agents during diversion investigations.

This appropriation will provide for the custody and care of an average daily population of 208,414 offenders and for the maintenance and operation of 115 penal institutions, 6 regional offices, and a central office located in Washington, D.C. The appropriation also finances the incarceration of sentenced Federal prisoners in State and local jails and other facilities for short periods of time. An average daily population of 37,255 sentenced prisoners will be in contract facilities in 2010.

The Federal Prison System (FPS) receives reimbursements for the daily care and maintenance of State and local offenders, for utilities used by Federal Prison Industries, Inc., for staff housing, and for meals purchased by FPS staff at institutions.

Inmate Care and Programs.—This activity covers the costs of all food, medical supplies, clothing, welfare services, release clothing, transportation, gratuities, staff salaries (including salaries of Health Resources and Services Administration commissioned officers), and operational costs of functions directly related to providing inmate care. This decision unit also finances the costs of education and vocational training, drug treatment, religious programs, psychological services, and other inmate programs such as Life Connections.

Institution Security and Administration.—This activity covers costs associated with the maintenance of facilities and institution security. This activity finances institution maintenance, motor pool operations, powerhouse operations, institution security and other administrative functions.

Contract Confinement.—This activity provides for the confinement of sentenced Federal offenders in Government owned, contractor-operated facilities and State, local, and private contract facilities, and for the care of Federal prisoners in contract community residential centers and assistance by the National Institute of Corrections to State and local corrections. This activity also covers costs associated with management and oversight of contract confinement functions.

Management and Administration.—This activity covers all costs associated with general administration and provides funding for the central office, six regional offices, and staff training centers. Included are oversight functions of the executive staff and regional and central office program managers in the areas of: budget development and execution; financial management; procurement and property management; human resource management; inmate systems management; safety; legal counsel; research and evaluation; and systems support.

For 2010, the BOP is requesting an enhancement to further implement an Inmate Skills Development Initiative to unify inmate programs and services into a comprehensive reentry strategy. The process includes an assessment of an inmate's strengths and skill deficits upon admission, the development of an individualized plan to address skill deficits, and the monitoring of skill enhancements throughout incarceration. This requirement is part of the Second Chance Act. Also in 2010, the BOP budget includes \$102,120,000 for the activation of FCI McDowell in West Virginia and FCI Mendota in California.

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mis-

FEDERAL PRISON INDUSTRIES, INCORPORATED—Continued

sion is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI strives to provide additional industrial employment opportunities at existing and planned institutions.

Budget program.—Federal Prison Industries, Inc., operations are entirely self-sustaining, and no appropriations are required for its operations. The amounts used by the Corporation for administrative expenses are subject to a congressional limitation. Information regarding this limitation is provided separately following this account.

Financing program.—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay accident compensation.

Operating results.—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$82 million of retained income in excess of the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The Office of Justice Programs (OJP) is requesting \$225 million in FY 2010 for the Justice Assistance appropriation. This appropriation includes programs that provide grants, contracts, and cooperative agreements for research, development and evaluation; development and dissemination of quality statistical and scientific information; victim services for children; and nationwide support for law enforcement agencies.

Through leadership, funding, and technical support, OJP plays a significant role in the research and evaluation of new technologies to assist law enforcement, corrections personnel, and courts in protecting the public, and guides the development of new techniques and technologies in the areas of crime prevention, forensic science, and violence and victimization research. The research and statistical data compiled by OJP staff are used at all levels of government to guide decision making and planning efforts related to law enforcement, courts, corrections, and other criminal justice issues. Grants, technical assistance, and national leadership provided by OJP supported the establishment of the Regional Information Sharing System, which has emerged as one of the Nation's most important law enforcement intelligence sharing networks. OJP continues to support efforts to expand and improve information sharing among the Nation's federal, state, local, and tribal law enforcement and criminal justice agencies.

JUSTICE ASSISTANCE—Continued

Research, Evaluation, and Demonstration Program. The National Institute of Justice (NIJ) serves as the research and development agency of the Department of Justice, as authorized by 42 U.S.C. 3721-3723. The mission of NIJ is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety by providing objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the state and local levels. NIJ research, development, and evaluation (RD&E) efforts support practitioners and policy makers at all levels of government.

NIJ focuses its resources in program areas where federal assistance will generate the greatest benefit in order to successfully address the wide range of mandates assigned to it by Congress. During strategic and budgetary planning, NIJ emphasizes RD&E activities in the following major program areas: (1) State and Local Law Enforcement; (2) Forensic Science; (3) Crime Prevention; (4) Violence and Victimization; and (5) Corrections and Courts.

RD&E efforts funded by NIJ concentrate on practical and effective approaches to improving crime and delinquency prevention, crime control, and the administration of justice. NIJ research funding supports the development of new standards, and tools for criminal justice practitioners; testing of innovative concepts, equipment, and program models in the field; development of new knowledge through research on crime, justice systems, violence and victimization issues; and evaluation of existing programs and responses to crime. Information generated by NIJ research activities is actively disseminated to numerous targeted audiences across the United States, including policymakers, program partners, and Federal, state, local, and tribal justice agencies.

In FY 2010, in addition to continuing its important work in forensic sciences (including DNA) in support of effective crime investigation and prosecution, NIJ plans to make research investments aligned with administration priorities, including: Preventing youth violence through research, development, testing, and evaluation; Combating illicit drugs and crime; Improving the justice system, including problem-solving courts; crime prevention; Maintaining effective support programs for ex-offenders through community corrections and prisoner reentry; Addressing electronic crime; Addressing crime and security at Americas borders; Preventing delinquency and building effective justice processes for youthful offenders; and Improving law enforcement, including effective information-sharing technologies and strategies. The FY 2010 Budget proposes \$48,000,000 for this program.

Criminal Justice Statistics Program. The Bureau of Justice Statistics (BJS) serves as the primary statistical arm of the Department of Justice, as authorized by 42 U.S.C. 3721-3735, and assists state, local, and tribal governments in collecting and analyzing justice statistics. It disseminates quality information and statistics to inform policy makers, researchers, criminal justice practitioners, and the general public. The Criminal Justice Statistics Program collects, analyzes and publishes data on a wide range of criminal justice topics, including: (1) Victimization; (2) Law Enforcement; (3) Prosecution; (4) Courts and Sentencing; (5) Corrections; (6) Tribal Justice; (7) Justice Expenditure and Employment; (8) International justice systems; and (9) Drugs, alcohol, and crime.

In addition to research activities, BJS administers the State Justice Statistics Program for the Statistical Analysis Centers (SACs). SACs have been established in all states and most territories to centralize and integrate criminal justice statistical functions. Through financial and technical assistance to the state

SACs, BJS promotes efforts to coordinate statistical activities within the states and conducts the research as needed to estimate the impact of legislative and policy changes. The SACs also serve in a liaison role, assisting BJS with data gathering from respondent agencies within their states.

Further, the Criminal Justice Statistics Program will expand upon its base of research in FY 2010 with research in a number of areas including: Victimization via the redesign the National Criminal Victimization Survey (NCVS), which is the sole continuous source of national information for the many topics of concern to the Administration and Congress; Law Enforcement; Adjudication and Sentencing; Corrections; Recidivism and Reentry; and Studying American Indians in the criminal justice system. The FY 2010 Budget proposes \$60,000,000 for the Criminal Justice Statistics program, of which \$15,000,000 is requested for NCVS redesign work.

Victim Notification System. The Statewide Automated Victim Information Notification Program, administered by the Bureau of Justice Assistance (BJA), provides funds to implement statewide automatic victim notification programs, which provide victims of domestic violence and other violent crimes access to information about the custody status of offenders. This program is authorized by 42 U.S.C. 10601. The FY 2010 Budget proposes \$12,000,000 for this program.

Regional Information Sharing System (RISS). This program, authorized by 42 USC 3796h(d) and administered by the Bureau of Justice Assistance (BJA), is the only national criminal intelligence system operated by and for state and local law enforcement agencies. Six regional intelligence centers operate in mutually exclusive geographic regions that include all 50 states, the District of Columbia, and U.S. territories, with some member agencies in Canada, Australia, and England. These regional centers facilitate information sharing to support member agency investigative and prosecution efforts by providing state-of-the-art investigative support and training, analytical services, specialized equipment, and secure information-sharing technology. The centers also provide secure encrypted e-mail and communications capabilities to over 6,000 municipal, state, county, and federal law enforcement agencies nationwide.

RISS initially supported state and local law enforcement. However, the regional information sharing concept has expanded from efforts in combating drug trafficking and organized criminal activity to intelligence sharing across jurisdictional boundaries. Section 701 of the USA PATRIOT Act authorized RISS to operate secure information sharing systems to enhance the investigative and prosecutorial abilities of participating law enforcement agencies in addressing terrorism. The FY 2010 Budget proposes \$45,000,000 for this program.

Missing and Exploited Children Program. This program, authorized by the Missing Childrens Assistance Act of 1984 (42 USC 5771 as amended) and administered by the Office of Juvenile Justice Delinquency (OJJDP), supports the efforts to prevent the abduction and exploitation of children. The FY 2010 Budget proposes \$60,000,000 for this program, including funding for the Internet Crimes Against Children and AMBER Alert Programs.

The Office of Justice Programs (OJP) is requesting \$728 million for the State and Local Law Enforcement Assistance appropriation. This appropriation account includes programs that establish and build on partnerships with state, local, and tribal governments, and faith-based and community organizations. These programs provide federal leadership on high-priority criminal justice concerns such as violent crime, criminal gang activity, illegal drugs, information sharing, and related justice system issues. OJP's formula and discretionary grant programs, coupled with training and technical assistance activities, assist law enforcement agencies, courts, local community partners, and other components of the criminal justice system in preventing and addressing violent crime, protecting the public, and ensuring that offenders are held accountable for their actions.

For FY 2010, funding requested for this account will support the following initiatives:

Byrne Justice Assistance Grants (JAG). The Byrne Justice Assistance Grants program awards grants to state and local governments to support a broad range of activities to prevent and control crime based on local needs and conditions, including: law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The FY 2010 Budget proposes \$519,000,000 for this program.

Byrne Competitive Grants. The Byrne Competitive Grants program awards grants to state, local, and tribal government agencies, for-profit and non-profit organizations, and faith-based and community organizations to improve the functioning of the criminal justice system and assist victims of crime. The FY 2010 Budget proposes \$30,000,000 for this program, including \$10,000,000 for SMART Office activities.

Southwest Border Prosecutor Initiative. This initiative provides funding for local prosecutor offices in the four border states, including California, Texas, Arizona, and New Mexico. It provides payments to support approved prosecution and pre-trial detention costs for cases formally referred to local prosecutors by the U.S. Attorneys Offices and cases diverted from federal prosecution by law enforcement pursuant to a locally negotiated agreement. The FY 2010 Budget proposes \$30,000,000 for this program.

Victims of Trafficking. The primary goal of the Victims of Trafficking program is to empower local law enforcement to better identify and rescue trafficking victims. An important secondary goal is the interdiction of trafficking in its various forms, whether it is forced prostitution, indentured servitude, peonage, or other forms of forced labor. The FY 2010 Budget proposes \$10,000,000 for this program.

Residential Substance Abuse Treatment (RSAT). The Residential Substance Abuse Treatment program for state prisoners helps states and units of local government develop, implement, and improve residential substance abuse treatment programs in correctional facilities, and establish and maintain community-based aftercare services for probationers and parolees. Ultimately, the program's goal is to help offenders become drug-free and learn the skills needed to sustain themselves upon return to the community. The FY 2010 Budget proposes \$30,000,000 for this program.

Drug, Mental Health, and Problem Solving Courts. This initiative will assist state, local, and tribal governments in developing and implementing problem solving courts strategies that can serve as successful alternatives to the prosecution and incarceration of offenders with drug, mental health, and special needs. The initiative will provide grants, training, and technical assistance to help state, local, and tribal grantees develop and implement drug, mental health, and other problem solving courts. The FY 2010 Budget proposes \$59,000,000 for this program.

Prescription Drug Monitoring Program. The purpose of the Harold Rogers Prescription Drug Monitoring Program (PDMP) is to enhance the capacity of regulatory and law enforcement agencies to collect and analyze controlled substance prescription data. The FY 2010 Budget proposes \$7,000,000 for this program.

Prison Rape Prevention and Prosecution Program. This program oversees a comprehensive statistical review and analysis of the incidence and effects of prison rape. It supports the development of a national set of measures describing the circumstances surrounding incidents of sexual assault in correctional institutions. The data collections provide facility-level estimates of sexual assault for a 12-month period. The FY 2010 Budget proposes \$12,500,000 for this program.

Capital Litigation Improvement Program. The Capital Litigation Improvement Program provides grants for the training of defense counsel, state and local prosecutors, and state trial judges, with the goal of improving the quality of representation and the reliability of verdicts in state capital cases. The training focuses on investigation techniques; pretrial and trial procedures, including the use of expert testimony and forensic science evidence; advocacy in capital cases; and capital case sentencing-phase procedures. The FY 2010 Budget proposes \$5,500,000 for this program.

Indian Country Assistance Initiatives. The initiatives supported include the Indian Country Prison Grants Program, the Tribal Courts Assistance Program, and the Indian Alcohol and Substance Abuse Program. The FY 2010 Budget proposes \$25,000,000 for these initiatives.

The Office of Justice Programs (OJP) is requesting \$317 million for the Juvenile Justice Programs appropriation. This appropriation account includes programs that support state, local and tribal community efforts to develop and implement effective and coordinated prevention and intervention juvenile programs. Such programs are designed to: reduce juvenile delinquency and crime, and improve the juvenile justice system so that it protects public safety, holds offenders accountable, and provides treatment and rehabilitative services tailored to the needs of juveniles and their families.

America's youth are facing an ever changing set of problems and barriers to successful lives. As a result, OJP is constantly challenged to develop enlightened policies and programs to address the needs and risks of those youth who enter the juvenile justice system. OJP remains committed to leading the nation in efforts addressing these challenges, which include: preparing juvenile offenders to return to their communities following release from secure correctional facilities; dealing with the small percent-

age of serious, violent, and chronic juvenile offenders; helping states address the disproportionate confinement of minority youth; and helping children who have been victimized by crime and child abuse.

Part B: Formula Grants. Supports state, local, and tribal efforts to develop and implement comprehensive state juvenile justice plans. Funds may be used for research, evaluation, statistics and other informational activities, and training and technical assistance. Funding is also available for training and technical assistance to help small, non-profit organizations, including faith-based organizations, with the federal grants process. The FY 2010 Budget proposes \$75,000,000 for this program.

Youth Mentoring. Funds support faith- and community-based, nonprofit, and for-profit agencies in the enhancement and expansion of existing mentoring strategies and programs; as well as assistance to develop, implement, and pilot test mentoring strategies and programs designed for youth in the juvenile justice, reentry, and foster care systems. In addition, OJJDP supports training and technical assistance to the sites to assist with adapting existing mentoring approaches to meet the needs of the target populations and to identify and maintain partnerships. The FY 2010 Budget proposes \$80,000,000 for this program.

Title V Local Delinquency Prevention Incentive Grants Program. Funds provide resources through state advisory groups to units of local government for a broad range of delinquency prevention programs and activities to benefit youth who are at risk of having contact with the juvenile justice system. The FY 2010 Budget proposes \$62,000,000 for this program, including \$25,000,000 each for the Tribal Youth and Underage Drinking Laws Programs, as well as \$10,000,000 for a Gang Education Program.

Victims of Crime Act (VOCA). Improving Investigation and Prosecution of Child Abuse Program. Funds support training and technical assistance to professionals involved in investigating, prosecuting, and treating child abuse. This program also supports the development of Children's Advocacy Centers and/or multi-disciplinary teams designed to prevent the inadvertent revictimization of an abused child by the justice and social service systems in their efforts to protect the child. The FY 2010 Budget proposes \$20,000,000 for this program.

Community-Based Prevention Initiatives. Based on the violence reduction work of several cities and public health research of the last several decades, OJP will provide funding for community-based strategies that focus on street-level outreach, conflict mediation, and the changing of community norms to reduce violence, particularly shootings. The FY 2010 Budget proposes \$25,000,000 for this program.

The Office of Justice Programs is requesting \$69.1 million for the Public Safety Officers Benefits (PSOB) appropriation. This appropriation account supports one mandatory and two discretionary programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a forty-year partnership among the Department of Justice; national public safety organizations; and state, local, and tribal public safety agencies.

Public Safety Officers Benefits. Created in 1976, the PSOB program oversees three types of benefits:

Death Benefits. The Death Benefits program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

Disability Benefits. The Disability Benefits program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty. The FY 2010 Budget proposes \$5,000,000 for this discretionary program.

Education Benefits. This program provides financial support for higher education expenses to the eligible spouses and chil-

dren of public safety officers killed or permanently disabled in the line of duty. The FY 2010 Budget proposes \$4,100,000 for this discretionary program.

Programs supported by the Crime Victims Fund focus on providing compensation to victims of crime and survivors; supporting appropriate victims' services programs and victimization prevention strategies; and building capacity to improve response to crime victims' needs and increase offender accountability. The Fund was established to address the need for victim services programs, and to assist State, local, and tribal governments in providing appropriate services to their communities.

The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2010 Budget proposes to provide \$700 million from collections and balances for crime victim compensation, services, and related needs.

Enacted in 1998, the Workforce Investment Act (WIA) is the primary authorization for this appropriation account. WIA authorization expired on September 30, 2003. The Act is intended to revitalize the Nation's job training system to provide workers with the information, advice, job search assistance, and training they need to get and keep good jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and substantial advance appropriation amounts are provided.

Adult employment and training activities.—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

Dislocated worker employment and training activities.—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment.

Youth activities.—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer jobs. The program links academic and occupational learning with youth development activities.

Green Jobs.—These funds will support research, labor exchange, and job training projects that help prepare workers for careers related to renewable energy and energy efficiency.

Reintegration of Ex-Offenders.—Supports activities authorized under the Second Chance Act to help individuals exiting prison make a successful transition to community life and long-term employment through mentoring, job training, and other services. The Department of Labor will coordinate closely with the Department of Justice in carrying out this program.

Native Americans.—Grants to Indian tribes and other Native American groups to provide training, work experience, and other employment-related services to Native Americans.

Migrant and Seasonal Farmworkers.—Grants to public agencies and nonprofit groups to provide training and other employability development services to economically disadvantaged youth and families whose principal livelihood is gained in migratory and other forms of seasonal farmwork.

National programs.—Provides program support for WIA activities and nationally administered programs for segments of the population that have special disadvantages in the labor market. National activities conducted under the Pilots, Demonstrations, and Research authority will include projects to demonstrate and evaluate transitional job models, which combine short-term subsidized or supported employment with intensive case management services to help populations with barriers to employment succeed in the labor market.

Career Pathways Innovation Fund.—A competitive grant program for community college-led partnerships to develop or expand career pathway programs. These programs will have clear sequences of coursework and credentials, each leading to a better job in a high-demand or emerging industry.

Workforce Data Quality Initiative.—Competitive grants to support the development of longitudinal data systems that integrate education and workforce data to provide timely and accessible information to consumers, policymakers, and others.

2006 (P.L. 109-365), is a federally-sponsored community service employment and training program that targets unemployed low-income older individuals who want to enter or re-enter the workforce. Participants must be 55 years of age or older with incomes no more than 125 percent of the Federal poverty level. The program, known as the Senior Community Service Employment Program (SCSEP), offers participants work-based community service training at non-profit or governmental agencies so that they can gain on-the-job experience and prepare to enter or re-enter the workforce. The dual goals of the program are to foster individual economic self-sufficiency and to provide useful opportunities in community service activities.

This account funds the Trade Adjustment Assistance (TAA) for Workers program, which provides weekly cash benefits, training, job search and relocation allowances, and employment and case management services to certain workers displaced by international trade. The account also funds the Alternative Trade Adjustment Assistance (ATAA) and the Reemployment Trade Adjustment Assistance (RTAA) programs that provide wage insurance payments for certain older workers who become reemployed at lower wages than the wages paid in their pre-layoff employment.

The TAA for Workers program was reauthorized and substantively amended through December 31, 2010, under the Trade and Globalization Adjustment Assistance Act of 2009, which was enacted as part of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5). Under the amendments, workers covered by petitions for the TAA program filed before May 18, 2009, will continue to receive the benefits and services, including ATAA, in accordance with the TAA provisions that were in effect prior to these amendments (see Section 1891(b) of the Trade and Globalization Adjustment Assistance Act of 2009). Petitions filed on or after May 18, 2009 are considered under expanded group eligibility provisions (e.g., workers in the service sector will be eligible) and the covered workers may be eligible for enhanced services and benefits, including additional weeks of cash benefits while in training and for the RTAA program.

(Legislative proposal, subject to PAYGO)

The Administration will propose legislation for later transmittal to reauthorize and extend the Trade Adjustment Assistance (TAA) for Workers program. The American Recovery and Reinvestment Act of 2009 (Public Law 111-5) amended TAA to expand eligibility to service workers, increase the funds available for training, and make other program changes, but it sunset this expanded coverage for petitions filed after January 1, 2011.

Unemployment compensation.—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-service-members as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and related activities designed to assess and reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or with non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administration resulting from increases in the number of claims filed and claims paid. The appropriation automatically provides additional funds whenever unemployment claims workload increases above levels specified in the appropriations language.

The request for additional funding for in-person reemployment and eligibility assessments of claimants of unemployment compensation builds upon the success of a number of States in reducing improper payments and speeding reemployment using these assessments. Because most unemployment claims are now filed by telephone or Internet, in-person assessments conducted in the One-Stop Career Centers can help determine continued eligibility for benefits and adequacy of work search, verify the identity of beneficiaries where there is suspicion of possible identity theft, and provide referral to reemployment assistance to those who need additional help. The \$50 million requested for reemployment and eligibility assessments is estimated to provide benefit savings of \$204 million. It is important that this integrity initiative and other new enforcement investments be fully funded. To ensure full funding of reemployment and eligibility assessments, the Administration proposes to protect the dollars requested for these activities in the appropriations process through allocation adjustments, a mechanism that has been used by past administrations

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE
OPERATIONS—Continued

and Congresses. Allocation adjustments are increases in the ceiling or allocation for annual appropriations, but these increases would be granted only if the base level for reemployment and eligibility assessments was funded at \$10 million and if the use of the funds was clearly restricted to the specified purpose. The maximum allowable adjustment to the) allocation for this program would be \$50 million for 2010 (see explanation on pages 40-41 of the budget document, *A New Era of Responsibility*).

Employment service.—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by State grants distributed under a demographically formula based funding formula in large part on unemployment data. Employment service allotments are funded on a program year basis running from July 1 through June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

Years are program years running from July 1 of the year indicated through June 30 of the following year.

Foreign Labor Certification.—This activity provides for the administration of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and that there would be no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural and temporary highly skilled worker visas. The account is divided into Federal and state activities.

Federal Administration.—Formerly funded in the Employment and Training Administration's Program Administration account, Federal Administration provides leadership, policy, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

State grants.—Provides grants to state labor agencies in 54 states and U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Includes State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for

prevailing wage determinations for the permanent and temporary programs, state processing of H-2A agricultural and H-2B non-agricultural temporary labor certification applications, state safety inspection of housing provided by employers to workers, and state development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area

One-stop career centers.—These funds are used to support the joint Federal-State efforts to improve the comprehensive One-Stop system created under WIA. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. Under the Emergency Unemployment Compensation law enacted in P.L. 102-164, as amended, there continues to be general fund financing for administrative costs related to any extended benefits paid under the optional, total unemployment rate trigger created in that law. This account is also used to make general fund reimbursements for some or all of the benefits and administrative costs incurred under the new Emergency Unemployment Compensation program (first enacted in P.L. 110-252, expanded in P.L. 110-449, and extended in P.L. 111-5). These funds are transferred to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs or to the Extended Unemployment Compensation Account in the UTF for benefit costs.

This account makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account provides repayable advances to the Black Lung Disability Trust Fund (BLDTF) whenever its balances prove insufficient to make payments from that account. These repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This account also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for Federal employees, and to the Federal Unemployment and Benefits Account (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance for Workers (TAA) program. Advances were needed for the FUBA account in fiscal 2008, and advances to FECA are anticipated in fiscal 2010 to cover the unemployment benefit costs of temporary workers on the decennial Census.

In light of economic conditions, there could be a very significant increase in the need for advances to the EUCA and FUA during fiscal year 2010 to pay for unemployment benefits. In addition to the economic conditions, legislation has recently been enacted to significantly expand both eligibility for TAA and the benefits and services under that program, which could also increase the need for advances to FUBA. The BLDTF is not expected to need advances in fiscal 2010 because its debt was restructured as part of the Energy Improvement and Extension Act of 2008.

To address the potential need for significant advances to certain accounts, the previous appropriations language for the Advances account has been amended to appropriate such sums as needed for advances to all of the accounts for the entire fiscal year. Cur-

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS—Continued

rently, the "such sums" language is only applicable to the BLDTF after September 15 of the fiscal year.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited in the Trust Fund and invested in Government securities until needed for benefit payments or administrative expenses. The portion of the Trust Fund funded with Federal taxes provides repayable advances (loans) to the States when the balances in their individual State accounts are insufficient to pay benefits. The Trust Fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended unemployment benefits.

State payroll taxes pay for all regular State unemployment benefits. During periods of high State unemployment, there is a stand-by program of extended benefits (EB), financed one-half by State unemployment taxes and one-half by the Federal unemployment payroll tax, which are also paid out of the Trust Fund. The American Recovery and Reinvestment Act (Public Law 111-5) has temporarily made EB 100 percent federally financed. In addition, the Federal unemployment tax pays the costs of Federal and State administration of the unemployment insurance system, veterans employment services, surveys of wages and employment, and about 97 percent of the costs of the Employment Service.

The Federal Employees Compensation Account (FECA) provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. Any additional resources necessary to assure that the FECA account can make the required payments to States will be provided from the Advances to the Unemployment Trust Fund and Other Funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment Trust Fund, and receipts from a tax on railroad payrolls are deposited into the Trust Fund to meet expenses.

UNEMPLOYMENT TRUST FUND

(Legislative proposal, subject to PAYGO)

The Administration will propose legislation for later transmittal to make the Unemployment Insurance (UI) program a more responsive and effective social safety net and economic stabilizer. While the regular State-funded UI programs respond readily to rising unemployment, the same cannot be said of the permanent Extended Benefits (EB) program, which provides additional weeks of benefits when unemployment in a State is high and rising. The Budget proposes to make the EB program more responsive to changing economic conditions. These program changes will make benefits available more quickly to long-term unemployed workers and avoid the delays associated with enactment of legislation to create special, temporary unemployment programs.

This wholly owned government corporation administers mandatory insurance programs to prevent loss of pension benefits under covered private, defined-benefit pension plans if single-employer plans terminate or if multiemployer plans are unable to pay benefits.

Single employer benefit payment.—The single-employer program protects about 33.8 million participants. Under this program, a company may voluntarily seek to terminate its plan, or Pension Benefit Guaranty Corporation (PBGC) may seek termination under certain circumstances. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits may be ended by a "distress" termination, but only if the employer meets tests proving severe financial distress, for example, the likelihood that continuing the plan would force the company to shut down. If the terminated plan cannot pay at least the PBGC-guaranteed benefits, the PBGC uses its funds to ensure guaranteed benefits are paid.

In a "standard" termination, plan assets must be sufficient to pay all benefits before the plan is allowed to end. That payment is in the form of an annuity purchased from an insurance company or a lump sum payment. After the payment is made, the PBGC guarantee ends.

	2008 actual	2009 est.	2010 est.
Government trusteeships at end of year	3,850	3,950	4,050
Participants in government trusteeships owed benefits	1,152,000	1,217,000	1,277,000
Retirees receiving monthly benefits	640,240	665,850	692,484

Multi-employer financial assistance.—The multiemployer insurance program protects about 10.0 million participants. The

number of plans decreased from 1,530 in 2007 to 1,500 in 2008. Multiemployer pension plans are maintained under collectively bargained agreements involving unrelated employers, generally in the same industry. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance to continue paying guaranteed benefits, ordinarily in the form of a loan to the plan.

Pension insurance activities.—Includes premium collections, premium investments, pre-trusteeship work, and pension insurance program protection activities.

Pension plan termination.—Includes all activities related to trusteeship; plan asset management, investment and accounting; and benefit administration services.

Operational support.—Includes the administrative, information technology infrastructure, and other shared program support for both PBGC's insurance and plan termination activities.

Without sufficient assets	74	110	110
Average time between trusteeship and issuance of final benefit levels	3.0 yrs	4.0 yrs	4.0 yrs

Financing.—The primary source of financing is annual premiums paid by sponsors of ongoing covered plans, which vary according to the plans' funding level. Other sources of financing include assets from terminated plans, investment income, and amounts due PBGC from the sponsors of terminating plans.

Operating results.—The following tables show the status of PBGC's trust funds and PBGC's operating results.

Enforcement of wage and hour standards.—The Wage and Hour Division works to obtain and encourage compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act, certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act, and the Employee Polygraph Protection Act. Prevailing wages are determined and employment standards are also enforced under various Government contract wage standards. In 2010, approximately 300,000 persons are expected to be aided under the FLSA through securing agreements with firms to pay back wages owed to their workers. In government contract compliance actions, about 35,000 persons will be aided through securing agreements to pay wages owed to workers. Under MSPA, approximately 1,400 investigations will be completed. In the course of all on-site investigations, investigators will routinely check for employer compliance with child labor standards, and over 1,300 targeted child labor investigations will be conducted. In all "directed" (non-complaint) investigations, investigators will also routinely check for compliance with the employment eligibility verification record-keeping requirements of the INA.

Federal contractor equal employment opportunity (EEO) standards enforcement.—The Office of Federal Contract Compliance Programs (OFCCP) enforces equal employment opportunity and nondiscrimination requirements of Federal contractors and subcontractors. In particular, OFCCP enforces: Executive Order 11246, which prohibits employment discrimination on the basis

of race, sex, religion, color, and national origin; Section 503 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (through a memorandum of understanding with the Equal Employment Opportunity Commission), which prohibit employment discrimination against individuals with disabilities; and the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended, which prohibits employment discrimination against certain protected veterans. OFCCP programs cover close to 100,000 work-sites with a total workforce of 12 million persons. OFCCP monitors contractors' compliance through compliance evaluations, with a focus on systemic discrimination cases, and reporting requirements. In 2010, approximately 2,500,000 individuals will be covered through 5,000 compliance evaluations, 175 complaint investigations, and 2,400 other compliance actions. OFCCP also ensures that Federal contractors and subcontractors are provided linkages to recruitment sources for hiring and advancement of minorities, women, protected veterans and individuals with disabilities, and will conduct 600 compliance assistance events in FY 2010. OFCCP also honors Federal contractors and other organizations through the Secretary of Labor Opportunity Awards and the EVE/EPIC program for their outstanding compliance initiatives.

Labor-management standards.—The Office of Labor-Management Standards (OLMS) receives and discloses reports of unions and others in accordance with the Labor Management Reporting and Disclosure Act (LMRDA), including union financial reports; audits union financial records and investigates possible embezzlements of union funds; conducts union officer election investigations; supervises reruns of union officer elections pursuant to voluntary settlements or after court determinations that elections were not conducted in accordance with the LMRDA; and administers the statutory program to certify employee protection provisions under various Federally-sponsored transportation programs. In 2010, OLMS plans continued efforts to advance union transparency and financial integrity protections, primarily through union audits and compliance assistance efforts. OLMS will ensure that grants are processed in a timely manner providing requisite protection to employees against adverse impacts as a result of federal assistance.

Federal programs for workers' compensation.—The Office of Workers' Compensation Programs (OWCP) administers the Federal Employees' Compensation Act, the Longshore and Harbor Workers' Compensation Act, the Energy Employees Occupational Illness Compensation Program Act, and the Black Lung Benefits Act. These programs ensure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled.

Program direction and support.—The Program Direction and Support (PDS) activity provides centralized leadership, policy, coordination, and essential administrative support in the areas of human resources, information technology; budget and financial management; strategic planning; performance reporting; legislative and regulatory analysis; employee safety and health; labor relations; equal employment opportunity enforcement, and general support services to all Employment Standards Administration program components.

Federal Employees' Compensation Act benefits.—The Federal Employees' Compensation Act program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). In 2010, 131,000 injured Federal workers or their survivors are projected to file claims; 49,000 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

Energy Employees' Compensation Act benefits.—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act. Administrative expenses for Part E are covered through indefinite, mandatory appropriations provided in P.L. 108-767.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled from coal workers' pneumoconiosis (black lung) and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107-275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Employment Standards Administration, Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and pursuant to an annual assessment of the industry, for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

Safety and health standards.—This activity provides for the development, promulgation, review and evaluation of feasible occupational safety and health standards and guidance. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the

standard is economically and technologically feasible when compared with alternative regulatory proposals providing equal levels of protection. Regulatory reform efforts include consensus-based rulemaking, development of common sense regulations, rewriting existing standards so they are understandable to those affected by them, and regulatory and non-regulatory process improvements.

Federal Enforcement.—This activity provides for the enforcement of workplace standards promulgated under the Occupational Safety and Health (OSH) Act of 1970, through the physical inspection of worksites, and by fostering the voluntary cooperation of employers and employees. Programs are targeted to the investigation of claims of imminent danger and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to specific high hazard industries and worksites.

State programs.—This activity assists states in assuming responsibility for administering occupational safety and health programs under State plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to fifty percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs which are at least as effective as the associated Federal program. State programs, like their Federal counterparts, provide a mix of enforcement, outreach, training and compliance assistance activities.

Technical support.—This activity provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational health nursing, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

Compliance assistance-Federal.—This activity supports a range of cooperative programs, training, and outreach that provide compliance assistance in improving workplace safety and health, with particular emphasis on small business. OSHA works with employers and employees through Voluntary Protection Programs that recognize and promote effective safety and health management partnerships that focus on the development of extended cooperative relationships and alliances that commit organizations to collaborative efforts with OSHA. Federal agencies are assisted in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including the Internet.

State consultation grants.—This activity supports 90 percent Federally funded cooperative agreements with designated State agencies to provide free on-site consultation to employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments. These projects offer a variety of services, including safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

Training grants.—This activity supports safety and health training grants to organizations that provide training and education and develop educational materials for employers and employ-

SALARIES AND EXPENSES—Continued

ees. Grants address safety and health education needs related to specific topics and industries identified by the agency.

Safety and health statistics.—This activity supports the information technology infrastructure, management information, and statistical basis for OSHA's programs and field operations. These are provided through an integrated data network, and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

Executive direction and administration.—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

Enforcement.—The enforcement strategy in 2010 will be an integrated approach that links all actions to preventing occupational injuries and illnesses. These include inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to lower fatality and injury rates in our Nation's mines.

Assessments.—This activity assesses and collects civil monetary penalties for violations of safety and health standards.

Educational policy and development.—This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining industry. States provide mine health and safety training materials, and provide technical assistance through the State Grants program.

Technical support.—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act and the MINER Act. Technical support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents.

Program evaluation and information resources (PEIR).—This activity provides program evaluation and information technology resource management services for the agency.

Program administration.—This activity performs general administrative functions and is responsible for meeting the requirements of the Government Performance and Results Act (GPRA), developing MSHA's performance plan, and Annual Performance Report.

The Office of Job Corps supports the administration and management of the Job Corps program, which helps at-risk youth who need and can benefit from intensive education and training services to become more employable, responsible, and productive citizens. The program operates in a group setting at 122 centers, both residential and non-residential in 48 states, the District of Columbia and the Commonwealth of Puerto Rico. A new center in Florida is scheduled to open in 2009, and four new centers are currently under design or construction in Wisconsin, Iowa, New Hampshire and Wyoming.

The program serves economically disadvantaged youth, aged 16-24, who must also be one or more of the following: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment. The program serves more than 60,000 individuals per year. The authorizing statute for the Job Corps program is the Workforce Investment Act of 1998 (P.L. 105-220, Title 1, Subtitle C, section 141).

Jobs for Veterans State grants.—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans within the State workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, resources are alloc-

ated to States to support Disabled Veterans Outreach Program (DVOP) specialists and Local Veterans' Employment Representatives (LVERs).

Disabled Veterans Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOPs place maximum emphasis on helping economically or educationally disadvantaged veterans. Priority of service (38 U.S.C. 4215) is given to special disabled veterans, other disabled veterans, and other eligible veterans.

Local Veterans' Employment Representatives (38 U.S.C. 4104) conduct outreach to employers as well as assist veterans in gaining employment by conducting job search workshops and establishing job search support groups. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including One-Stop Career Centers. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

The State grants budget activity also supports the Transition Assistance Program (TAP). VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition assistance to military servicemembers separating from active duty. TAP is implemented worldwide and provides labor-market and employment-related information and other services to separating servicemembers and their spouses. The goal of TAP is to expedite and facilitate the transition from military to civilian employment.

Federal management.—VETS' Federal management budget activity carries out programs and develops policies to provide veterans the maximum employment and training opportunities (38 U.S.C. 4102-4103A) and to investigate complaints received under the Uniformed Services Employment and Reemployment Rights Act (USERRA) (38 USC 4322). Veterans' Preference activities, which are intended to assist veterans obtain Federal employment (39 U.S.C. 4214), are also supported under this activity.

Resources under this activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 USC 4102A), the Homeless Veterans Reintegration Program (Section 738 of the Stewart B. McKinney Homeless Assistance Act (MHAA) of July 1987, and amended by Section 5 of the Homeless Veterans Comprehensive Assistance Act (HVCAA of 2001), and the Veterans Workforce Investment Program (Section 168, Workforce Investment Act, P.L. 105-220). This budget activity supports field activities and personnel who provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

This budget activity also supports the oversight and development of policies for the Transition Assistance Program (10 USC 1144 and 38 USC 4113). The activity funds outreach and education efforts, such as job fairs, that raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 USC 4110) also are supported. The REALifeLines initiative facilitates timely and comprehensive employment services to our Nation's severely wounded and injured veterans.

National Veterans' Employment and Training Services Institute.—The National Veterans' Training Institute (NVTI) supplies competency-based training to Federal and State providers of

services to veterans (38 U.S.C. 4109). NVTI also provides training for Veterans Employment and Training Service personnel. NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

Homeless Veterans' Reintegration Program.—The Homeless Veterans' Reintegration Program (HVRP) (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grant awards enable grantees to operate employment programs to reach out to homeless veterans and help them become employed. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

Veterans' Workforce Investment Program.—The Veterans' Workforce Investment Program (VWIP) (Section 168 of P.L. 105-220) provides competitive grants geared toward training and retraining to create employment opportunities for veterans in high-skill occupations, and to meet employer demands.

The program described below is financed by this appropriation, by fees for services, and by reimbursements from other agencies that are provided with administrative services overseas by the Department of State. In FY 2010, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP). As in previous years, WSP funding is to remain available until expended. The FY 2010 request for this account also includes full funding request for State Department operations in Iraq and Afghanistan that are supported by the Diplomatic and Consular Programs (D&CP) account. In all of these programs, responsibilities range from policy setting to planning and design, implementation, operations and maintenance.

The funds requested for this account are subdivided into the following categories:

Human Resources.—This activity supports all American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. The professional development and training

activity is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (particularly the recruitment of qualified minorities, including Hispanics and African Americans) and Foreign Service National staff.

Overseas Programs.— This activity provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for fiscal year 2010 will support 267 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. These resources also fund the conduct of U.S. diplomatic policy through political and multilateral affairs, economic and social affairs, international budgetary and management affairs, and participation in and hosting of various international conferences. Resources in this appropriation support the conduct of international informational, educational, cultural and exchange programs of the United States and advising the President and National Security Council on these matters. The resources in this activity are used to define, explain and advocate U.S. policies abroad and to seek to increase knowledge and understanding among foreign audiences of U.S. society and its values. Department posts also administer exchange-of-persons programs and conduct informational and cultural activities. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Services are provided in Washington, D.C. as well as at missions worldwide, covering more than 90,000 employees, dependents and local hires. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity.

Diplomatic Policy and Support.— This activity supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. This also encompasses overseas and American citizen services; the issuance of passports to U.S. citizens both here and abroad; and implementation of a coordinated strategy to improve consular systems and processes in support of U.S. border security, including sharing data with the Department of Homeland Security, the Department of Justice, the Intelligence Community, the Treasury Department, and the law enforcement community. Visa services involve: the issuance, denial, and adjudication of immigrant and non-immigrant visas; refugee processing; and visa fraud detection and investigation. American

citizen services include the issuance of passports, and emergency and other assistance to American citizens abroad. Passport services include the issuance of passports in the United States and U.S. missions abroad and passport fraud detection and investigation. The information management activity in D&CP identifies resources that are used for the effective and efficient creation, collection, processing, transmission, dissemination, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Its requirements are driven by the informational needs of the President, the Secretary of State, the Department and its 267 missions, and approximately fifty Government agencies. Components of the information management activity include: telecommunications; classified information handling; unclassified data and word processing; pouch, mail, and publishing services; administration of an electronic and archival records management program; document classification and declassification; information security; information technology capital planning; and provision of information management services, as appropriate, to all branches of the Government and to the public. The Department manages large computer and communications centers to provide administrative, consular, economic, and political information. The computer systems support worldwide consular applications, financial management systems, management of building programs, and intelligence research systems. Administration and staff activities are also included in this area. These activities include normal domestic and overseas administrative services directly related to Department programs, such as:

—The direction and control of administration and management operations, representing and negotiating U.S. Government administrative matters with foreign officials, and reviewing and setting resource levels and priorities for various programs and bureaus financed by this appropriation.

—The budgeting, financial planning, and fiscal operations for bureaus and offices financed by this appropriation and most federal agencies resident abroad.

—The contracting and procurement of services and supplies, maintenance and repair of equipment and property (including the operation and routine maintenance of property directly leased or owned by the Department), vehicle operation, and shipping and customs services.

—Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave, and separation of the Department's personnel and dependents.

—Rental payments to the General Services Administration for domestic space occupied by the Department.

Security Programs.—This activity provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Covered in this activity are: security operations; engineering services, which related to the technical defense of U.S. Government personnel and establishments against electronic and physical attack; homeland security related activities; protection of dignitaries; and physical security operations.

This appropriation provides for the conduct or supervision of all audits, investigations, and inspections of the Department's programs and operations as mandated by the Inspector General Act of 1978, as amended, and the Foreign Service Act of 1980, as amended. The objectives of the Office of the Inspector General are to: improve the economy, efficiency, and effectiveness of the Department's operations; detect and prevent fraud, waste, abuse, and mismanagement; and evaluate independently the formulation, applicability, and implementation of security standards at all U.S. diplomatic and consular posts. The Office also assesses the implementation of U.S. foreign policy, primarily through its inspection of all overseas posts and domestic offices on a cyclical basis. The State Department's Inspector General also serves as Inspector General of the Broadcasting Board of Governors, as mandated by law.

This appropriation also funds the Office of the Special Inspector General for Afghanistan Reconstruction (SIGAR) and the Office of the Special Inspector General for Iraq Reconstruction (SIGIR). SIGAR and SIGIR provide oversight of programs and operations funded with amounts appropriated or otherwise made available for the reconstruction of Afghanistan or Iraq, respectively. SIGAR and SIGIR oversight is accomplished via independent audits, field inspections, and criminal investigations into potential fraud, waste, and abuse in coordination with, and receiving the cooperation of, the Inspector Generals of the Department of State, Department of Defense, and the United States Agency for International Development. SIGAR and SIGIR report directly to, and are under the general supervision of, the Secretaries of State and Defense. In addition, they provide mandated quarterly reports directly to the U.S. Congress.

The total amount requested for the Office of Inspector General includes \$23 million for SIGAR and \$30 million for SIGIR. Detailed budget information for SIGAR and SIGIR are available on their websites, www.sigar.mil and www.sigir.mil.

EMBASSY SECURITY, CONSTRUCTION, AND MAINTENANCE—Continued
planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2010, the Department will collect charges for the sixth year of the Capital Security Cost Sharing Program. The Capital Security Cost Sharing Program has two main goals: accelerating the construction of approximately 150 new safe, secure and functional embassy and consulate compounds over fourteen years (2005-2018), at a cost of approximately \$17.5 billion, and providing an incentive for all United States Government agencies to right-size their presence overseas.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas or in the United States, including the renovation of the Main State building where required.

This is a retirement fund for Locally Employed Staff (LES) employed by the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government contributions for end-of-service benefits for LES at overseas U.S. missions where it has been determined that participation in the local social security system is not in the public interest. This fund, authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis, certain administrative services, such as printing and reproduction, editorial material, motor pool operations and dispatch agencies operations, inter-agency cooperative administrative support services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under section 204(f) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4304(f)).

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

This appropriation provides the U.S. share of operating expenses for ten treaty-based international fisheries commissions and organizations, two international marine science organizations, one whaling commission, and the Antarctic Treaty Secretariat, as well as funding regional sea turtle conservation, and travel expenses of non-government U.S. commissioners and their advisors. These international fisheries and whaling commissions coordinate scientific studies of shared fish stocks and other living marine resources and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy. The 2010 request includes \$15 million to meet U.S. obligations to Canada under the Pacific Salmon Treaty.

The Global Health and Child Survival account is requested for the first time in FY 2010 to provide a more comprehensive approach to global health programming. This account combines the Child Survival and Health, and Global HIV/AIDS Initiative accounts. The Global Health and Child Survival account funds health-related foreign assistance for the Department of State and the U.S. Agency for International Development (USAID).

Global Health and Child Survival - State: The President's Emergency Plan for AIDS Relief (PEPFAR) supports the fight against global HIV/AIDS and TB. The 2010 Budget requests \$5.259 billion in the Global Health and Child Survival State Department (GHCS-S) account which forms the bulk of PEPFAR funding (\$6.6 billion in total). PEPFAR is led by the Office of Global AIDS Coordinator in the State Department, which partners with agencies such as the U.S. Agency for International Development (USAID) and the Department of Health and Human Services. Within PEPFAR-supported prevention, treatment, and care programs, activities focus on improving existing programs

in the second five years of PEPFAR. Programs work by expanding partnerships and building capacity for effective, innovative, and sustainable services; creating a supportive and enabling policy environment for combating HIV/AIDS; and implementing strong monitoring and evaluation systems to identify best practices, determine progress toward goals, and ensure compliance with PEPFAR policies and strategies. PEPFAR programs support scaling up HIV/AIDS services within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages, in order to effectively implement HIV/AIDS prevention, treatment, and care programs. In addition, PEPFAR is linking its efforts to important programs in other areas of global health and development, including the Millennium Challenge Corporation, the President's Malaria Initiative, the Peace Corp, and other activities in the areas of education, women's justice and empowerment, and economic development.

Global Health and Child Survival - USAID: USAID uses these funds to promote transformational development in the developing world by working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships. Funding includes activities that promote family planning/reproductive health, child survival and maternal health, including polio, micronutrients and iodine deficiency, as well as activities directed at vulnerable children, and reducing HIV transmission and the impact of the HIV/AIDS pandemic in developing countries. Funding is also requested to address the threat of other infectious diseases of major public health importance such as tuberculosis, malaria, Avian Influenza, and neglected tropical diseases, to reduce antimicrobial resistance, and for surveillance. The 2010 request includes \$585 million for the President's Malaria Initiative which will continue to operate in fifteen high-burden African countries.

Overseas Assistance.—The majority of the Migration and Refugee Assistance (MRA) account is used to address the protection and assistance needs of refugees, migrants, and conflict victims worldwide. Funds are used primarily to support the programs of international organizations, including the United Nations High Commissioner for Refugees (UNHCR), the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), the International Organization for Migration (IOM), and the International Committee of the Red Cross (ICRC), as well as non-governmental organizations. When possible, funds are used to resolve refugee situations through repatriation or local integration.

Humanitarian Migrants to Israel.—These funds provide a grant to the United Israel Appeal to assist humanitarian migrants resettling in Israel.

U.S. Refugee Admissions.—MRA funds overseas processing, transportation, and initial placement for refugees and certain other categories of immigrants resettling in the United States. These activities are carried out primarily by U.S. private voluntary agencies, UNHCR and IOM.

Administrative Expenses.—These funds finance the salaries and operating expenses in Washington, D.C. and overseas for the Bureau of Population, Refugees, and Migration. (Note: Funds for the salaries and support costs of the six positions dedicated to international population policy and coordination are requested under the Department of State's Diplomatic and Consular Programs appropriation.)

The Millennium Challenge Account (MCC) is an independent U.S. Government corporation that has the specific strategic goal of reducing poverty through growth in some of the poorest countries in the world. The MCC was established on January 23, 2004, and in the past five years MCC has signed 18 compacts totaling over \$6.3 billion. These investments will help foster stability through economic growth and poverty reduction in these U.S. strategic partners. MCC encourages policy reforms by working with only those countries that have already created the conditions for growth by ruling justly, investing in their people, and encouraging economic freedom, with a particular emphasis on anti-corruption. Recognizing that development is achieved by a country's own efforts, policies, and people, MCC gives selected countries the opportunity to identify their own priorities for achieving sustainable economic growth and poverty reduction. Countries develop their poverty reduction proposals in broad consultation with their own society as well as with the MCC, which works in partnership to help countries develop a program which will address the key constraints to poverty reduction and sustainable economic growth. MCC compacts specifically define the implementation responsibilities of partner countries, including financial accountability and transparent and fair procurement

This account supports U.S. foreign policy objectives by providing economic assistance to allies and countries in transition to democracy, supporting Middle East peace negotiations, and financing economic stabilization programs, frequently in a multi-donor context. Key objectives include:

1) Supporting strategically significant friends and allies through assistance designed to increase the role of the private sector in the economy, reduce government controls over markets, enhance job creation, and improve economic growth.

2) Developing and strengthening institutions necessary for sustainable democracy. Typical areas of assistance include technical assistance to administer and monitor elections, capacity-building for non-governmental organizations, judicial training, and women's participation in politics. Assistance is also provided to support the transformation of the public sector to encourage democratic development, including training to improve public administration; promote decentralization; and strengthen local

governments, parliaments, independent media and non-governmental organizations.

3) Strengthening the capacity of partner governments to manage the human dimension of transitions out of instability and to help sustain the neediest sectors of the population during the transition period.

This account also includes funding for alternative development programs in Colombia and Afghanistan.

The Foreign Military Financing Direct Loan Program (FMFDLP) Account is a program account established pursuant to the Federal Credit Reform Act (FCRA) of 1990, as amended, to provide the funds necessary for the subsidy element of loans. As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from direct loans for foreign military financing obligated in 1992

and after. The foreign military financing credit program provides loans that finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. The amounts in this account are a means of financing and are not included in budget totals. Expenditures from this account finance the subsidy element of direct loan disbursements and are transferred into the Foreign Military Financing Direct Loan Financing (FMFDLP) Account to make required loan disbursements for approved FMS or commercial sales. The FMFDLP is a financing account used to make disbursements of Foreign Military Loan funds for approved procurements and for subsequent collections for loans after September 30, 1991. The account uses permanent borrowing authority from the U.S. Treasury combined with transfers of appropriated funds from the Foreign Military Financing Direct Loan Program (FMFDLP) Account to make required disbursements to loan recipient country borrowers for approved procurements. Receipts of debt service collections from borrowers are used to repay borrowings from U.S. Treasury.

The Foreign Military Loan Liquidating Account (FMLLA) is a liquidating account that records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103-87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRFA buys a portfolio of loans from the FMLLA, thus transferring the loans from the FMLLA Account to the MDRF Account.

The greenhouse gas emissions of developing economies are rising more rapidly than the emissions of developed countries, and will soon surpass them. If major developing countries like China and India do not take action to cut emissions growth, domestic U.S. climate actions will have a limited effect on cutting overall greenhouse gas concentrations in the atmosphere. The Clean Technology Fund (CTF) is a new multibillion dollar effort to reduce the growth of emissions in developing countries by catalyzing large-scale private sector investments through financing the additional costs of commercially available cleaner technologies over dirtier, cheaper alternatives. By funding the extra cost of the cleaner technology, the CTF will incentivize cleaner projects that will leverage development bank financing, and attract new investor capital into low carbon sectors.

The CTF, one of two Climate Investment Funds located at the World Bank, will leverage the capital bases and country program expertise of the multilateral development banks. Efforts to create the fund were led by the United States, the United Kingdom, and Japan, with considerable input from potential recipient countries, including China, India, and Brazil. The FY 2010 Budget

provides \$500 million to the CTF. As part of this initiative, the Administration will seek authorizing legislation.

The United States' international climate policy must effectively balance the necessities of economic development on the one hand, and climate change mitigation and adaptation on the other. The Strategic Climate Fund (SCF) is an important vehicle for achieving that balance as its programs promote low-carbon and climate-friendly economic growth in developing countries. The SCF is a suite of new programs to pilot innovative approaches and scaled-up activities aimed at specific climate change-related challenges in developing countries. These activities include climate adaptation and climate resilience in national development planning; deforestation, forest degradation and the promotion of sustainable forest management; and the development of low carbon energy pathways for the world's poorest countries. The SCF, one of two Climate Investment Funds located at the World Bank, will leverage the capital bases and country program expertise of the multilateral development banks. These programs have received broad and enthusiastic support from developed and developing countries alike. The FY 2010 Budget provides \$100 million to the SCF. As part of this initiative, the Administration will seek authorizing legislation.

The International Bank for Reconstruction and Development (IBRD or World Bank) provides financing and technical assistance to support infrastructure investment and policy reform. The IBRD operations are designed to promote sustainable economic growth, reduce poverty, and raise living standards, including through targeted investments in infrastructure, basic human needs, private-sector development, and core policy reforms.

During 2008, the IBRD made new commitments of \$13.5 billion and gross disbursements of approximately \$10.5 billion. In 2009, the IBRD is poised to almost triple its commitments to more than \$35 billion to meet increased demand for financing during the financial crisis. Since its establishment in 1945, the IBRD has made loans totaling \$447 billion. No request is being made for IBRD capital in 2010.

The IBRD acts as a trustee for the Global Environment Facility (GEF) Trust Fund. The GEF provides partial funding for developing country projects designed to provide global environmental benefits by reducing greenhouse gas emissions, protecting international waters, promoting biodiversity conservation, reducing persistent organic pollutants and ozone depleting substances, and preventing and controlling desertification and deforestation. With its highly specific focus on global environmental issues, where both costs and benefits are shared across international borders, the GEF occupies an important niche in the system of international development institutions. Its basic mission is to support capacity building and innovative and cost-effective in-

vestments whose design and environmental benefits can be duplicated (and financed) elsewhere. Since its inception in 1991, the GEF has allocated over \$6 billion in grants, leveraging over \$20 billion in co-financing, to support more than 1,700 projects in over 160 countries.

In 2006, donor governments agreed to the fourth replenishment of the GEF, pledging total resources of \$3,130 million over four years. The U.S. commitment totals \$320 million, to be paid in four equal installments of \$80 million from FY 2007 through FY 2010. During the replenishment negotiations, the United States achieved important policy reforms to improve the GEF's overall effectiveness, particularly with regard to project quality, portfolio management, resource allocations, transparency, and anticorruption efforts. The 2010 request includes \$80 million for the fourth installment of GEF-4 and \$6.5 million for a portion of U.S. arrears to the GEF, for a total request of \$86.5 million. In March 2009, GEF donors began discussion on the fifth replenishment of the GEF, which are expected to conclude in early 2010.

The International Development Association (IDA) is a member of the World Bank Group and provides development financing on highly concessional terms and grant terms to the world's poorest nations. These countries are primarily in Sub-Saharan Africa and South Asia, but also in Latin America, Eastern Europe, and the former Soviet Union. IDA's primary goal is to help recipient countries achieve sustained economic growth and poverty reduction, and particularly to meet the exceptional development challenges faced by Africa within its broad commitment to support all the world's poor countries. IDA is the single largest source of multilateral lending extended on concessional terms to developing countries. Projects have to meet the same economic, financial, and environmental standards as other World Bank projects. IDA resources for new lending are provided primarily by new donor contributions through periodic replenishments, and are augmented by earnings and payments of existing loans.

During 2008, IDA made new commitments of \$11.2 billion. Since its establishment, IDA has made commitments totaling \$192 billion. The largest regional share of IDA resources, 50%, went to Africa.

Under the fifteenth replenishment (IDA-15), IDA will provide total resources for prospective new commitments of \$41.6 billion over the 2009-2011 period. In 2009, IDA will accelerate the approval process for \$2 billion in loans and grants to help developing countries address the impact of the financial and economic crisis. Through the IDA-15 replenishment negotiations, U.S. leadership secured a number of commitments for reform. These include an expanded results measurement system which will increase the effectiveness of IDA's development projects and programs, improvements to the operational framework and financing arrangements for World Bank engagement in fragile/post-conflict states, specific measures to enhance debt management capacity building, continued use of grant financing for countries experiencing debt distress, and progress toward greater transparency.

IDA-15 will provide between 20-30 percent of its total resources to the world's poorest and debt vulnerable countries as grants. Grant eligibility will be determined on the basis of debt sustainability with 40 countries (out of 64 IDA-only eligible countries) receiving grants in 2009. Consistent with its IDA-15 commitment, IDA has also enhanced efforts to improve country debt management capacity, introduced disincentives to prevent grant and debt relief recipients from borrowing non-concessionally, and conducted extensive outreach among the multilateral development banks, donors, and external creditors to enhance the use of the joint World Bank-IMF Debt Sustainability Framework. IDA has also been working to improve the effectiveness of its operations and ensure development results on the ground. IDA's result-oriented approach includes: 1) country outcomes tracked by fourteen country outcome indicators, including indicators such as primary school completion rates, and 2) output indicators measuring IDA's contribution to country outcomes for specific outputs such as the number of teachers trained and facilities built. Over the duration of IDA-15, IDA will work to improve the quality of data for outcome and output indicators through efforts to build country statistical capacity and development of a standardized list of select indicators across four to five sectors in order to produce a more accurate indicative aggregation of sector-specific outputs.

In addition, IDA will develop a better measure of private sector development as well as an indicator to measure the quality of public financial management in IDA countries. The 2010 Budget consists of \$1.235 billion for the second of three scheduled installments under IDA-15 and \$85 million to pay a portion of outstanding U.S. arrears. The U.S. pledge is \$3.705 billion over three years and is based on the reform commitments described above.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group. MIGA is designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against noncommercial risks and carrying out investment promotion activities.

During World Bank fiscal year 2008, MIGA issued 38 guaranteed contracts, with a maximum aggregate contingent liability of \$2.1 billion. Since MIGA's inception, estimated foreign direct investment facilitated totals more than \$80 billion.

Negotiations on MIGA's first General Capital Increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years. The agreement included commitments from MIGA on a range of policy issues of substantial importance to the United States, including environment, information disclosure, labor, and creation of an inspection function for greater accountability and transparency. In 2000, the Administration sought and received congressional authorization for the United States' full participation in the MIGA GCI. The U.S. currently has outstanding arrears of \$6.9 million.

No request is being made for MIGA for 2010.

The Inter-American Development Bank (IDB) promotes sustainable economic growth and productivity, poverty reduction, private sector development, and good governance in Latin America and the Caribbean through loans and technical assistance.

During 2008, IDB approved \$11.2 billion in loans. Since its inception, the IDB has approved a total of \$166 billion.

IDB provides financing through: 1) the Ordinary Capital window that lends at market-based rates, and 2) the Fund for Special Operations (FSO), which provides financing on concessional terms to the region's poorest nations.

No request is being made for the IDB or FSO in 2010.

The Inter-American Investment Corporation (IIC), established in 1984, is a member of the Inter-American Development Bank Group, whose purpose is to promote development of private small and medium sized enterprises (SMEs) in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the Inter-American Development Bank itself. Through direct loans and equity investments in SMEs as well as through lending to private financial intermediaries, IIC helps SMEs in the region to access the medium/long-term capital necessary to start-up, expand, or modernize their operations.

During 2008, IIC approved 64 projects totaling \$300.6 million. Since its inception, the IIC has approved 562 projects for a total amount of \$3.3 billion.

For FY 2010, the Administration is requesting \$4.67 million to clear 10% of U.S. arrears to the IIC.

The Asian Development Bank (AsDB) promotes broad-based sustainable economic growth and development, poverty alleviation, and cooperation in the Asia/Pacific region. The AsDB has two main financing windows: 1) the ordinary capital resources window, and 2) the Asian Development Fund (AsDF) which lends at concessional rates to the region's poorest nations.

AsDF resources are derived in part from donor contributions through periodic "replenishments." In the most recent replenishment, AsDF-10, the United States successfully negotiated a comprehensive package of policy reforms and pledged \$461 million over four years, the same contribution as that pledged during the last replenishment. Negotiations concluded in May 2008.

AsDF-10 put in place a number of significant reform measures of high priority to the United States. The AsDF established a grants window, following the example of the International Development Association and the African Development Fund. During the AsDF-10 period, grants are expected to reach \$2.75 billion, or 25% of total AsDF-10 operations. The AsDF continues to strengthen the use of the performance-based allocation system in determining resource levels to borrowing countries. Other key achievements include commitments to strengthening the AsDF's safeguards practices, professionalizing human resources, and ensuring adequate resources for U.S. foreign policy priorities in the region. Internal governance has become more transparent through improved information disclosure and public communication policies. The AsDF launched a new Governance and Anti-Corruption Action Plan to improve anti-corruption efforts at the institutional and country levels, and significantly increased the resources available for anticorruption activities. The AsDF continues to be strongly engaged in Afghanistan and has substantially increased its assistance for private sector development. Finally, the AsDF is taking dramatic action to institutionalize the use of development results in its operations.

In 2008, the AsDB lent roughly \$8.7 billion from its ordinary capital resources and extended an estimated \$2.6 billion in AsDF loan and grant resources. Since its founding in 1966, the AsDB has committed approximately \$140 billion in loans. In addition, the AsDB has made cumulative private sector loans, guarantees, and equity investments of over \$9.9 billion. In 2008, the AsDB extended \$1.5 billion in private sector assistance in the form of loans, equity investments, and guarantees.

No request is being made for the AsDB in 2010. The 2010 request for the AsDF is \$115.25 million for the first of four scheduled contributions under AsDF-10.

The African Development Bank group is composed of 1) the African Development Bank (AFDB), which lends at prevailing rates, and 2) the African Development Fund (AFDF), which provides grants and concessional loans to the poorest African countries. In 2008, the AFDB approved 59 new projects and programs amounting to about \$1.8 billion. Since its first operations in 1967, AFDB has financed 2,240 projects and programs amounting to about \$37.9 billion.

The AFDF approved \$1.6 billion for 59 projects and programs in 2008. Since its first operations in 1974, cumulative AFDF financing totals an estimated \$29.07 billion for 1,122 development projects and programs.

The 2010 request for the African Development Bank Group includes \$156.055 million for the second of three installments of the U.S. contribution to the eleventh replenishment (AFDF-11) covering the period from FY 2009 to FY 2011 plus \$3.83 million for a portion of U.S. arrears to the Fund, for a total request of \$159,885,000.

In December 2007, the United States and other donor countries reached agreement on AFDF-11 which included a number of key U.S. policy objectives: 1) management for results agenda that emphasizes measures to strengthen the focus on delivering positive development results on the ground and the institutional management policies and procedures required to deliver them — a two-tiered results measurement framework is in place to

measure, monitor, and report on outcomes and outputs at the country, regional and institutional levels; 2) maintaining the centrality of performance in the allocation of the Fund's resources while improving the implementation of the Performance Based Allocation (PBA) system; 3) enhanced engagement in fragile states through a new fragile states facility that will better address the needs or emerging opportunities in post-conflict and transition countries, such as Liberia; 4) scaling up the Funds' regional operations, focusing on infrastructure projects that promote regional integration; and 5) greater support for governance issues at the regional, country, and sector levels, as well as in fragile states, in order to fight corruption, increase transparency, and improve accountability. Grants will continue to be extended to recipient countries based on their debt vulnerability. In 2008, grants were 28% of AFDF assistance.

The European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism through predominately private sector lending and investments in the nations of Central and Eastern Europe and the former Soviet Union. The United States and other shareholders signed the articles of agreement of the EBRD on May 29, 1990, and the Bank officially began operating on April 15, 1991. In April 1996, shareholders approved a doubling of the EBRD's capital base from EUR 10 billion to EUR 20 billion (approximately \$24 billion) which went into effect in April 1997.

As of December 31, 2008, approximately 73 percent of the Bank's portfolio was in the private sector. Since its inception, the EBRD has provided over \$58 billion in financing for nearly 2,600 operations, contributing to investments in the region worth over \$182 billion.

No request is being made for the EBRD for FY 2010.

The North American Development Bank (NADBank) provides financing for environmental infrastructure projects in the U.S.-Mexico border region. A portion of its capital also finances NAFTA-related community adjustments and investment projects in both countries. Under NADBank's charter, the United States and Mexico contributed equally to NADBank's capital, a total contribution of \$450 million in paid-in capital and \$2.55 billion in callable capital. The final U.S. installment was appropriated in 1998, and there is no paid-in request for 2010.

NADBank finances environmental infrastructure projects that have been certified by the U.S.-Mexico Border Environmental Commission (BECC), an institution designed to assist States and local communities in coordinating border projects.

As of December 2008, NADBank had approved \$335.3 million in loans for 50 projects and \$88.8 million in grants for 38 projects. The Bank has also administered \$543.9 million in EPA funded grants to 78 projects in Mexico and the United States. The total investment value of all the projects to which it provides or administers funding is approximately \$2.7 billion.

In March 2002, former President Bush and former Mexican President Fox agreed to a set of proposals to improve the performance of NADBank and BECC in fulfilling their missions. These include measures to improve the affordability of NADBank financing, expand the geographic area of operations in Mexico, create a single Board of Directors for both institutions, and conduct a review of the project cycle.

The Multilateral Investment Fund (MIF), administered by the Inter-American Development Bank, provides grants and loans to support private-sector development and finance and labor sector reforms in Latin America and the Caribbean. Special consideration is given to reforms that encourage private foreign direct investment and promote privatization. Grants and loans are used for technical assistance to identify and resolve investment constraints, for investment in human capital, and for business infrastructure and development.

During 2008, the MIF approved 139 projects totaling \$166 million. Since its inception in 1992, the MIF has approved 1,196 projects, of which the MIF contribution totaled more than \$1.6 billion.

The United States made a commitment to the MIF in 1992 amounting to \$500 million. Negotiations were completed in early 2005 for the first replenishment of MIF with a United States commitment of \$150 million to be paid in six equal annual installments. The United States achieved its key objectives in these negotiations: a strengthened commitment to measurable results, increasing efficiency, maintaining a focus on grants, allocating resources to maximize innovation, reforming Inter-American Development Bank procurement, and instituting a sunset clause. Grant funding will be about 75 percent of all funding approvals.

For 2010, \$25 million is requested for the third installment of the replenishment.

CONTRIBUTIONS TO THE INTERNATIONAL FUND FOR AGRICULTURAL
DEVELOPMENT—Continued

The International Fund for Agricultural Development (IFAD) was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development in poorer countries. IFAD's specific mandate is to assist rural small-scale producers and subsistence farmers to increase their productivity and incomes, improve food security, and help integrate them into larger markets.

The 2010 request for the IFAD is \$30 million, the first of three scheduled contributions under IFAD's eighth replenishment (IFAD-8). In December 2008, negotiations were concluded on IFAD-8 and the U.S. pledged a total of \$90 million over the three-year replenishment period 2010-2012. The U.S. exercised leadership to achieve key objectives, including a commitment for IFAD to develop a graduation policy along the lines of other multilateral development banks; human resources reform to improve the institution's staff profile and increase the proportion of operational staff; continued application of a strong performance-based allocation system; a four-tiered results framework modeled on the Asian Development Fund; clear measures to enhance the independence of the internal audit function including consultation on hiring and removal of the internal auditor; and a commitment for IFAD to develop a comprehensive environment and natural resources policy.

This account provides technical assistance to other countries in support of U.S. foreign policy objectives and in support of the responsibilities of the U.S. Treasury Department to formulate, conduct and coordinate the international financial policies of the United States. Technical assistance provided through this account facilitates key short- and medium-term reforms in the policy and management areas of budget, revenue, government debt, financial institutions and financial enforcement.

The proposed appropriation will fund full-time technical assistance advisors, including program-related administrative costs and intermittent experts in support of the resident advisors. The appropriation will support approximately 70 technical assistance programs worldwide: in Asia, the Middle-East, Africa, South America, and the Caribbean. It will enable continued technical assistance in the areas of anti-terrorism and anti-money laundering and provide resources for technical assistance to countries that are being affected by the international financial crisis. The Treasury Department will continue to coordinate activities with international financial institutions and with USAID, the Department of State, and other relevant U.S. Government agencies when determining where its technical assistance program can have the greatest positive impact.

The Global Fund to Fight AIDS, Tuberculosis and Malaria (Global Fund) account exists to obligate and disburse U.S. contributions to the Global Fund which come from appropriations within the Departments of Health and Human Services and State. The United States was a driving force in the creation of the Global Fund, a public-private partnership developed to finance country-led effort to fight the three diseases, and the U.S. government made the founding contribution of \$200 million to the Global Fund in May 2001. The Global Fund became a non-profit foundation under Swiss law in January 2002, and held its first grant competition in April of that year.

The purpose of the Global Fund is to attract, manage, and disburse resources through a public-private partnership that make a sustainable and significant contribution to the reduction of infections, illness and death, thereby mitigating the impact of HIV/AIDS, tuberculosis and malaria in countries in need. The Global Fund pursues an integrated and balanced approach to prevention, treatment, care and support. The innovative Global Fund model finances programs developed by the recipient countries themselves in line with national strategic health plans and priorities. The requirement that all areas of society with a stake in public health be involved in the proposal development process, including civil society and private sector, ensures strong and comprehensive programs. The Global Fund works through efficient, effective disbursement mechanisms, based on grant performance, minimizing transaction costs and operating in a transparent and accountable manner based on clearly defined responsibilities.

Approximately \$19.1 billion has been pledged to the Global Fund thus far from industrialized and developing country governments, corporations, foundations, and private individual contributions. The U.S. government is the largest donor to the Global Fund, having pledged a total of \$4.4 billion through 2009. The U.S. Government has provided a total of \$3.3 billion through 2008. The 2010 request includes \$300 million within the National Institutes of Allergy and Infectious Diseases account and \$600 million within the Global Health and Child Survival account for the Global Fund.

In addition to its assessed payments, the United States contributes to voluntary funds of many international organizations and programs involved in a wide range of sustainable development, humanitarian, scientific, environmental and security activities. In January 2009 the President announced he would work with Congress to restore U.S. funding support for the United Nations Population Fund (UNFPA) to "reduce poverty, improve the health of women and children, prevent HIV/AIDS and provide family planning assistance to women in 154 countries."

- (2) have documented and demonstrated their commitment to redirect their budgetary resources from international debt repayments to programs to alleviate poverty and promote economic growth that are additional to or expand upon those previously available for such purposes:

Provided further, That any limitation of subsection (e) of section 411 of the Agricultural Trade Development and Assistance Act of 1954 shall not apply to funds appropriated under this heading: *Provided further*, That none of the funds made available under this heading in this or any other appropriations Act shall be made available for Sudan or Burma unless the Secretary of the Treasury determines and notifies the Committees on Appropriations that a democratically elected government has taken office. Debt Reduction. The Administration requests \$110.63 million for debt restructuring programs, including \$90.63 million for bilateral Heavily Indebted Poor Country (HIPC) and poorest country debt reduction and HIPC Trust Fund programs, and \$20 million for the Tropical Forest Conservation Act program.

Multilateral Debt Reduction Programs for the Poorest. For the poorest countries, debt reduction provides an incentive to implement macro-economic and structural reforms necessary to improve economic performance and creditworthiness. Debt relief, economic reform and poverty reduction contribute to economic growth and social development, which can mean expanded opportunities for trade and investment for the United States. For the poorest and most heavily indebted countries, the United States will continue support for the Paris Club of official creditors and provide additional relief complementary to the enhanced HIPC Initiative. The Administration requests a total of \$90.63 million in funding for the cost of debt restructuring programs, including bilateral HIPC and poorest country debt reduction and the HIPC Trust Fund. The United States has pledged a total of \$150 million to meet the additional financing needs of the HIPC Trust Fund consistent with commitments at the 2002 G-8 Summit in Kananaskis, Canada, to fund a share of HIPC financing shortfalls.

The United States contributed \$74.6 million towards this pledge in fiscal year 2006.

Tropical Forest Debt Relief. The Tropical Forest Conservation Act (TFCA) received strong bipartisan support and was signed into law in 1998. Modeled after the Enterprise for the Americas Initiative (EAI), P.L. 105-214, as amended, it allows the Administration to reduce outstanding concessional U.S. Agency for International Development and P.L. 480 debt stocks to support conservation of endangered tropical forests and promote economic reforms in eligible countries. Debt relief, debt swaps, or buybacks in eligible countries will leverage payment of local currency resources to support programs to conserve tropical forests. TFCA debt reduction agreements have been concluded with twelve countries: Bangladesh, Belize, El Salvador, Peru (two agreements), the Philippines, Colombia, Jamaica, Panama (two agreements), Paraguay, Guatemala, Botswana, and Costa Rica. In total, these agreements will generate over time more than \$188 million to support forest conservation.

ient countries] *Provided further, That funds made available for alternative development programs may be made available notwithstanding section 660 of the Foreign Assistance Act of 1961. (Department of State, Foreign Operations and Related Programs Appropriations Act, 2009.)*

For an additional amount for "Development Assistance", \$200,000,000, for assistance for developing countries to address the international food crisis notwithstanding any other provision of law, which shall become available on October 1, 2008, and remain available through September 30, 2010: *Provided, That such assistance should be carried out consistent with the purposes of section 103(a)(1) of the Foreign Assistance Act of 1961: Provided further, That not more than \$50,000,000 should be made available for local or regional purchase and distribution of food: Provided further, That the Secretary of State shall submit to the Committees on Appropriations not later than 45 days after enactment of this Act, and prior to the initial obligation of funds appropriated under this heading, a report on the proposed uses of such funds to alleviate hunger and malnutrition, including a list of those countries facing significant food shortages.* (Supplemental Appropriations Act, 2008.)

DEVELOPMENT ASSISTANCE PROGRAM—Continued

Development Assistance Programs. U.S. Agency for International Development (USAID) uses these funds to promote transformational development in developing countries working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships. These programs enable our foreign partners to implement the often difficult political, economic and other systemic changes that must occur to achieve sustainable development. These programs help a country become more self reliant by sustaining economic and social progress.

— Promoting economic growth: Funding supports trade and investment programs to increase the capacity of developing countries to participate effectively in the global trading system, comply with trade agreements, improve business climates, and raise productivity. Development Assistance programs also support economic reforms, help create new job opportunities, expand access to market information, improve the knowledge and skills of entrepreneurs and workers, and support robust agricultural and natural resource management programs.

— Ruling justly and democratically: Funding supports countries to strengthen their rule of law and respect for human rights, encourage open and competitive political processes, promote the development of a politically active civil society, and encourage more transparent and accountable government institutions.

— Investing in people: Funding helps to develop human capital through programs such as improved and expanded access to basic education, especially for girls and women, and higher education and training to expand the skilled human capital base that is needed for development.

The Child Survival and Health Programs account funded activities that promote family planning/reproductive health, child survival and maternal health, including the primary causes of morbidity and mortality, polio, micronutrients and iodine deficiency, as well as activities directed at vulnerable children, and reducing HIV transmission and the impact of the HIV/AIDS pandemic in developing countries. Funding for HIV/AIDS was appropriated in the Global HIV/AIDS Initiative account for this purpose through 2007. Beginning in 2008, funds were appropriated in the Global Health and Child Survival account, and will be requested in that account for the first time in 2010.

Beginning in 2009, the Assistance for Europe, Eurasia and Central Asia (AEECA) account merges the authorities and appropriations for the Assistance for Eastern Europe and the Baltic States account and the Assistance for the Independent States of the Former Soviet Union account. Programs will focus on integrating Southeast Europe into the Euro-Atlantic community and institutions, while promoting democracy, rule of law, individual freedom and economic growth. AEECA funding will support programs that fight international crime, trafficking, and corruption; build regional integration and socio-economic bridges among ethnic communities; and consolidate democratic and economic progress in the regions. In Eurasia, United States assistance programs support a long-standing U.S. policy aimed at encouraging the emergence of democratic countries with market-based economies in the region. Eurasian countries interested in joining Euro-Atlantic institutions should of course be allowed to pursue that goal, and U.S. assistance can help facilitate the process by helping them to meet the standards and other criteria required by those institutions. In the Central Asia region, where good relations play an important role in supporting our military and civilian efforts to stabilize Afghanistan, AEECA funding is prioritized for the Kyrgyz Republic and Tajikistan.

The International Disaster Assistance (IDA) account provides funds for the management of humanitarian relief, rehabilitation, and transition to development assistance to foreign countries affected by natural and man-made disasters, and for disaster prevention, preparedness and mitigation. The request funds relief programs such as emergency health and nutrition interventions, provision of safe drinking water, and emergency shelters. This includes the purchase of commodities including temporary shelter, blankets, supplementary and therapeutic food, potable water, medical supplies, and agricultural rehabilitation aid, including seeds and hand tools. Beneficiaries of IDA programs include disaster victims, conflict victims, and internally displaced persons (IDPs), a group made more vulnerable by their lack of recognized status. The request includes \$50 million for continued humanitarian assistance to Iraq IDPs.

The request also includes \$300 million for emergency food security, which will be used for local and regional purchase of food, and other interventions, such as cash voucher and cash transfer programs to facilitate access to food.

\$126 million is requested in the Transition Initiatives (TI) account to address opportunities and challenges facing conflict-prone countries and those making the transition from the initial crisis stage of a complex emergency to the path of sustainable development. \$50 million will support fast, flexible, short-term assistance to advance peace and democracy in high foreign policy priority countries through the U.S. Agency for International Development (USAID) Office of Transition Initiatives (OTI) in close collaboration with the Department of State, the National Security Council, the Department of Defense, USAID regional bureaus, and USAID country missions. These efforts include reintegration of ex-combatants, community self-help programs that reduce tensions and promote grass-roots democratic media, and conflict resolution measures.

\$76 million is requested for a new Rapid Response Fund (RRF) to respond quickly to unforeseen opportunities through existing mechanisms to support new and fragile democracies. The RRF will leverage all rapid response tools available in USAID and other USG departments and agencies with proven rapid response mechanisms. The RRF will address urgent issues facing conflict-prone countries and countries in transition by assuring rapid response to opportunities to help societies heal, address divisive issues, establish collaborative democratic processes and institutions, reconcile competing interests, and set a common agenda in collaboration with institutions and NGOs to assure the provision of basic services and support economic activity.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service provider missions and for technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account records, for the Development Credit Authority, the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2010, the U.S. Agency for International Development (USAID) will use the Development Credit Authority (DCA) transfer authority to support DCA projects in every region of the globe and every economic sector targeted by USAID. DCA augments grant assistance by mobilizing private capital in developing countries for sustainable development projects. Credit assistance under DCA is principally intended for use where a development activity is financially viable, where borrowers are creditworthy, and where there is true risk sharing with private lenders.

In 2010, the request for \$25 million in DCA transfer authority will support financing of water and sanitation facilities. DCA will continue to promote the flow of credit to microfinance institutions, small and medium enterprises, agribusinesses, energy-

efficiency projects, housing projects, and municipalities in USAID-assisted countries.

The Overseas Private Investment Corporation encourages the participation of United States private sector capital and skills in the economic and social development of developing countries and

emerging market economies. Its credit program is investment financing through loans and guaranteed loans.

As required by the Federal Credit Reform Act of 1990, the Program Account records the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

The Peace Corps will provide direct and indirect support to Americans serving as Volunteers in approximately 75 countries worldwide in 2010, including the necessary safety and security provisions for Volunteers, trainees, and staff. The FY 2010 budget increases Volunteer numbers, recruitment efforts and the entry of the Peace Corps into new countries in order to have 9,000 Americans enrolled in the Peace Corps by the end of FY 2012 and 11,000 by the end of FY 2016. The Volunteers help fill the trained manpower needs of developing countries and encourage self-sustaining development of skilled manpower. The Peace Corps also promotes mutual understanding between the peoples of the developing world and the United States and focuses the attention of the American people on the benefits of community service. Peace Corps Volunteers work primarily in the areas of agriculture, business development, education, environment, health and HIV/AIDS, and youth.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The Inter-American Foundation (IAF) funds grassroots development initiatives designed by the organized poor in Latin America and the Caribbean. The IAF has carried out its mandate by responding with grant support to the most creative ideas for self-help received from grassroots groups and non-governmental organizations. The IAF uses objective indicators to gauge the results of its grants in improving the quality of life in poor communities and disseminates the experiences to a broad audience that includes private and public sector donors, development professionals, academics, and other interested parties. In 2010, the IAF will strive to leverage additional resources for its grant program from local governments, private sector, beneficiary populations, and other donors as well as through an IAF-initiated network of Latin American businesses and corporate foundations committed to funding grassroots development.

Development Grants.—Grants are awarded directly to non-governmental organizations in Latin America and the Caribbean to carry out development projects. In 2010, the IAF plans to award

approximately 80 new grants and to supplement with additional funds approximately 20 grants awarded in previous years.

Leveraging of Resources.—IAF grantees are required to contribute to their projects, encouraged to partner with local governments, and urged to mobilize funds to sustain their impact after the grant period. RedEAmerica, a network of the hemisphere's corporate foundations that have adopted the IAF's bottom-up approach, invests its funds in self-help programs. RedEAmerica members that are parties to the IAF cooperative agreements match IAF funding two-to-one; the entire network raises contributions from a variety of sources. Additionally, U.S based migrant associations are joining the IAF to support grassroots development in their home communities.

Evaluations and Other Activities.—Each year the progress of all IAF grantees is routinely assessed and a sample of completed projects undergoes comprehensive evaluation. The IAF also produces and distributes regularly scheduled publications on its projects, on trends in development, and on other topics of interest to the development profession.

Program Management and Operation.—The IAF also manages resources that cover salaries and benefits, travel, reimbursable service agreements with other U.S. government agencies, rent, service contracts, and other support costs.

The African Development Foundation (ADF), a public corporation, is an independent agency of the U.S. Government, established to support African-designed and African-driven initiatives to address grassroots economic and social problems, alleviate poverty, and promote sustainable development. ADF provides grants of up to \$250,000 directly to community groups, agricultural cooperatives, and small enterprises. These grants help organizations create tangible benefits such as increasing or sustaining the number of jobs in a community, improving income levels, and addressing social development needs. ADF also funds African NGOs in each country to provide technical assistance to improve project outcomes.

In 2010, ADF will provide grants to recipients in 20 African countries, directly to small farmer and agricultural cooperatives, other grassroots groups, and small, African-owned enterprises. These investments will be focused at the marginalized end of the economic and social spectrum to promote two strategic goals:

1) Advance community-based, sustainable development and empowerment of the poor in Africa. ADF will promote smallholder agricultural development and micro and small enterprise to generate income and employment. ADF will increase participation of producer groups and African-owned small enterprises to promote economic development, including trade and investment.

2) Expand local capacity to promote and support grassroots development. ADF will build local community development Partner Organizations that provide technical assistance and support to grassroots groups. ADF will develop and replicate new models for community reinvestment. ADF will continue to leverage additional funding through strategic partnerships with national and local governments, other donor agencies, and the local private sector. ADF will encourage African governments

and other donors to increase utilization of grassroots development "practices".

¹These are not net disbursements to the IMF; rather they reflect a change in valuation of the U.S. reserve position at the IMF.

The United States quota at the International Monetary Fund (IMF) is presently SDR 37,149,300,000 (about \$54.7 billion as of mid-March 2009). Quotas are the metric used by the Fund to assign voting weights, to determine contributions to the IMF's general resources, and to determine access to IMF financing.

Realigning IMF quotas is part of a larger effort to reform the Fund's governance structure to ensure that country voting weights reflect the rapid growth and increasing significance of dynamic emerging economies. Because the Fund's overall quota resources will be expanded to facilitate the realignment, an increase in the U.S. nominal quota is necessary to keep the U.S. voting share constant at 16.7 percent of total voting power in the Fund, and thus maintain our leadership role and our ability to shape the future of the institution.

Consistent with the budgetary treatment recommended by the President's Commission on Budget Concepts in 1967, the U.S. transactions with the IMF under the quota subscriptions are monetary exchanges that would not increase the deficit in any year. Therefore, the impacts are shown in the Federal Government Financing and Debt Summary Table and not in the Appendix schedules.

LOANS TO INTERNATIONAL MONETARY FUND

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. GAB members agreed in early 1983 to increase their financial commitments to GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time),

with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$6.3 billion as of mid-March 2009).

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB) to further supplement resources available to the IMF to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. NAB became effective on November 17, 1998. As of 2008, twenty-six countries and institutions participate in NAB through a set of credit arrangements with the IMF totaling SDR 34 billion (about \$48 billion on the date of establishment), of which the U.S. share is approximately SDR 6.6 billion (about \$9.7 billion as of mid-March 2009). Although GAB continues to exist, the sum of loans advanced under NAB and GAB cannot exceed SDR 34 billion. The sum of U.S. loans advanced under both arrangements cannot exceed the U.S. share of NAB.

The present financial crisis demonstrates that, in a world of globalization and substantial international capital flows, the magnitude of crises can be larger than in earlier decades. The IMF does not have sufficient resources to cope with the problems facing member countries in today's world. The G-20 has called for a very substantial increase in the NAB and the expansion of NAB membership to more G-20 countries.

Consistent with the budgetary treatment recommended by the President's Commission on Budget Concepts in 1967, the U.S. transactions with the IMF under the NAB are monetary exchanges that would not increase the deficit in any year. Therefore, the impacts are shown in the Federal Government Financing and Debt Summary Table and not in the Appendix schedules.

In December 2004, a devastating tsunami and earthquake affected a number of countries in southeast Asia. The United States responded with a quick infusion of emergency assistance, followed by funding for rehabilitation and reconstruction. Assistance provided in the supplemental was designed for rebuilding communities and infrastructure, helping individuals return to their original livelihood, training individuals, particularly women, to

develop new skills, and supporting host government-led reconstruction and early warning/disaster preparedness efforts. Funds were also used to reimburse other accounts obligated for relief and rehabilitation efforts in the immediate aftermath of the tsunami. The largest amounts of funding went to assistance for Indonesia and Sri Lanka, with smaller programs in India, Thailand, and the Maldives. Funds were also provided to support regional programs, such as development of an early warning and disaster preparedness system for the Indian Ocean, and to support prevention and preparations against avian influenza.

【SEC. 7013. (a) PROHIBITION ON TAXATION.—None of the funds appropriated under titles III through VI of this Act may be made available to provide assistance for a foreign country under a new bilateral agreement governing the terms and conditions under which such assistance is to be provided unless such agreement includes a provision stating that assistance provided by the United States shall be exempt from taxation, or reimbursed, by the foreign government, and the Secretary of State shall expeditiously seek to negotiate amendments to existing bilateral agreements, as necessary, to conform with this requirement.

(b) REIMBURSEMENT OF FOREIGN TAXES.—An amount equivalent to 200 percent of the total taxes assessed during fiscal year 2009 on funds appropriated by this Act by a foreign government or entity against commodities financed under United States assistance programs for which funds are appropriated by this Act, either directly or through grantees, contractors and subcontractors shall be withheld from obligation from funds appropriated for assistance for fiscal year 2010 and allocated for the central government of such country and for the West Bank and Gaza program to the extent that the Secretary of State certifies and reports in writing to the Committees on Appropriations that such taxes have not been reimbursed to the Government of the United States.

(c) DE MINIMIS EXCEPTION.—Foreign taxes of a de minimis nature shall not be subject to the provisions of subsection (b).

(d) REPROGRAMMING OF FUNDS.—Funds withheld from obligation for each country or entity pursuant to subsection (b) shall be reprogrammed for assistance to countries which do not assess taxes on United States assistance or which have an effective arrangement that is providing substantial reimbursement of such taxes.

(e) DETERMINATIONS.—

(1) The provisions of this section shall not apply to any country or entity the Secretary of State determines—

(A) does not assess taxes on United States assistance or which has an effective arrangement that is providing substantial reimbursement of such taxes; or

(B) the foreign policy interests of the United States outweigh the purpose of this section to ensure that United States assistance is not subject to taxation.

(2) The Secretary of State shall consult with the Committees on Appropriations at least 15 days prior to exercising the authority of this subsection with regard to any country or entity.

RESERVATIONS OF FUNDS

SEC. 【7014】7010. (a) Funds appropriated under titles II through VI of this Act which are specifically designated may be reprogrammed for other programs within the same account notwithstanding the designation if compliance with the designation is made impossible by operation of any provision of this or any other Act or other compelling foreign policy reason: *Provided*, That any such reprogramming shall be subject to the regular notification procedures of the Committees on Appropriations: *Provided further*, That assistance that is reprogrammed pursuant to this subsection shall be made available under the same terms and conditions as originally provided.

(b) In addition to the authority contained in subsection (a), the original period of availability of funds appropriated by this Act 【and administered by the United States Agency for International Development】 that are specifically designated for particular programs or activities by this or any other Act shall be extended for an additional fiscal year if the 【Administrator of such agency】 *Secretary of State* determines and reports promptly to the Committees on Appropriations that the termination of assistance to a country or a significant change in circumstances makes it unlikely that such designated funds can be obligated during the original period of availability: *Provided*, That such designated funds that continue to be available for an additional fiscal year shall be obligated only for the purpose of such designation.

(c) Ceilings and specifically designated funding levels contained in this Act shall not be applicable to funds or authorities appropriated or otherwise made available by any subsequent Act unless such Act specifically so directs: *Provided*, That specifically designated funding levels or minimum funding requirements contained in any other Act shall not be applicable to funds appropriated by this Act.

(c) For the purposes of providing the executive branch with the necessary administrative flexibility, none of the funds made available under titles II through V in this Act under the headings "Global Health and Child Survival", "Development Assistance", "International Organizations and Programs", "Trade and Development Agency", "International Narcotics Control and Law Enforcement", **["Andean Counterdrug Programs"],** "Assistance for Europe, Eurasia and Central Asia", "Economic Support Fund", **["Democracy Fund"],** "Peacekeeping Operations", "Capital Investment Fund", "Operating Expenses", "Office of Inspector General", "Nonproliferation, Anti-terrorism, Demining and Related Programs", "Millennium Challenge Corporation", "Foreign Military Financing Program", "International Military Education and Training", and "Peace Corps", **[and "Migration and Refugee Assistance,"]** shall be available for obligation for activities, programs, projects, type of materiel assistance, countries, or other operations not justified or in excess of the amount justified to the Committees on Appropriations for obligation under any of these specific headings unless the Committees on Appropriations are **[previously]** notified 15 days in advance: *Provided*, That the President shall not enter into any commitment of funds appropriated for the purposes of section 23 of the Arms Export Control Act for the provision of major defense equipment, other than conventional ammunition, or other major defense items defined to be aircraft, ships, missiles, or combat vehicles, not previously justified to Congress or 20 percent in excess of the quantities justified to Congress unless the Committees on Appropriations are notified 15 days in advance of such commitment: *Provided further*, That this subsection or any similar provision of this Act or any other Act shall not apply to any reprogramming for an activity, program, or project for which funds are appropriated under titles II through IV of this Act of less than 10 percent of the amount previously justified to the Congress for obligation for such activity, program, or project for the current fiscal year.

[(d)] Notwithstanding any other provision of law, funds transferred by the Department of Defense to the Department of State and the United States Agency for International Development, and funds made available for programs authorized by section 1206 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163), shall be subject to the regular notification procedures of the Committees on Appropriations, and the agency receiving the transfer or allocation shall perform periodic program financial audits of the use of such funds and such funds may be made available for the cost of such audits. **]**

[(e)] *d* The requirements of this section or any similar provision of this Act or any other Act, including any prior Act requiring notification in accordance with the regular notification procedures of the Committees on Appropriations, may be waived if failure to do so would pose a substantial risk to human health or welfare: *Provided*, That in case of any such waiver, notification to the Congress, or the appropriate congressional committees, shall be provided as early as practicable, but in no event later than 3 days after taking the action to which such notification requirement was applicable, in the context of the circumstances necessitating such waiver: *Provided further*, That any notification provided pursuant to such a waiver shall contain an explanation of the emergency circumstances.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for services provided by the FAA to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Act permanently appropriated the first \$50 million of such fees for the Essential Air Service program and rural airport improvements. To the extent that fee collections fall below \$50 million, the law requires the difference to be covered by Federal Aviation Administration funds. The Administration intends to work with Congress to develop a more sustainable program model that will fulfill its commitment to maintaining small communities' access to the National Airspace System while enhancing convenience for travelers and improving cost effectiveness.

Through 1997, this program was funded from the Airport and Airway Trust Fund. Starting in 1998, the FAA reauthorization funded it as a mandatory program supported by overflight fees under the Essential Air Service and Rural Airport Improvement Fund. In addition to mandatory funding supported by overflight fees, direct appropriations from the Airport and Airway Trust Fund to Payments to Air Carriers have been enacted every year beginning in FY 2002 to meet the needs of the essential air service program. For FY 2010, \$125 million in Budget Authority is requested from the Airport and Airway Trust Fund for Payments to Air Carriers.

For 2010, the Budget requests \$9,336 million for FAA operations. These funds will be used to continue to promote aviation safety and efficiency. The Budget provides funding for the Air Traffic Organization (ATO) which is responsible for managing the air traffic control system. As a performance-based organization, the ATO is designed to provide cost-effective, efficient, and, above all, safe air traffic services. The Budget also funds the Aviation Safety Organization (AVS) which ensures the safe operation of the airlines and certifies new aviation products. In addition, the request also funds regulation of the commercial space transportation industry, as well as FAA policy oversight and overall management functions.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for air traffic control and related services provided by the FAA to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Budget estimates that \$56 million in overflight fees will be collected in 2010.

The fund provides direct support for the aviation insurance program (chapter 443 of title 49, U.S. Code). Income to the fund is derived from premium collections for premium insurance coverage issued, income from authorized investments, and binder fees for nonpremium coverage issued. The binders provide aviation insurance coverage for U.S. air carrier aircraft used in connection with certain Government contract operations by the Department of Defense and the Department of State.

The Homeland Security Act of 2002 (P.L. 107-296) required the Secretary to provide additional war risk insurance coverage (Hull Loss and Passenger and Crew Liability) to air carriers insured for Third-Party War Risk Liability as of June 19, 2002, as authorized under existing law. Continuation of this coverage was subsequently directed by several appropriations and authorization acts, the last being the Federal Aviation Administration Extension Act of 2009, which extended the requirement to provide insurance coverage through September 30, 2009. The Budget contains no policy recommendation for the aviation insurance program and displays baseline funding for the program in 2010.

The Secretary is authorized to limit an air carrier's third party liability to \$100 million, when the Secretary certifies that the loss was from an act of terrorism. The FAA insurance policy covers: (i) hull losses at agreed value; (ii) death, injury, or property loss to passengers or crew, the limit being the same as that of the air carrier's commercial coverage before September 11, 2001; and (iii) third party liability, the limit generally being twice that of such coverage.

In 1997, the Federal Aviation Administration established a franchise fund to finance operations where the costs for goods and services provided are charged to the users on a reimbursable basis. The fund improves organizational efficiency and provides better support to FAA's internal and external customers. The activities included in this franchise fund are: training, accounting, payroll, travel, duplicating services, multi-media services, information technology, materiel management (logistics), and aircraft maintenance.

Funding in this account provides for the deployment of communications, navigation, surveillance, and related capabilities within the National Airspace System (NAS). This includes funding for several activities of the Next Generation Air Transportation System, a joint effort between the FAA, NASA, and the Departments of Defense, Homeland Security and Commerce to improve the safety, capacity, security, and environmental performance of the NAS. As the organization primarily responsible for air traffic infrastructure, the Air Traffic Organization receives and manages 95 percent of the funding in this account. The funding request for FY 2010 supports FAA's comprehensive plan for modernizing, maintaining, and improving air traffic control and airway facilities services.

FEDERAL HIGHWAY ADMINISTRATION

The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), was enacted August 10, 2005 and expires on September 30, 2009. In 2010, the Federal Highway Administration continues to provide significant grant funding to support highway programs.

The Administration is developing a comprehensive approach for surface transportation reauthorization. Consequently, the Budget contains no policy recommendations for programs subject to reauthorization, including highway programs. Instead, the Budget displays baseline funding levels for all surface transportation programs.

In summary, the 2010 Budget consists of \$41,883 million in new budget authority and \$53,448 million in outlays. The following table reflects the total funding for all Federal Highway Administration programs.

The Emergency Relief program receives \$100 million annually in mandatory funds from the Highway Trust Fund in the Federal-aid highways account. SAFETEA-LU authorized the program to receive additional General Fund discretionary funding as needed. These funds are provided through this account starting in 2006.

In 2008, \$195 million was appropriated for the repair and reconstruction of the Interstate 35W bridge located in Minneapolis, MN, that collapsed on August 1, 2007, as authorized under Public Law 110-56. Public Law 110-329 provided an additional \$850 million for the program. No appropriation was enacted for this account in 2009 and no further appropriation is requested for this account in 2010.

Unless other legislation is enacted that authorizes a change that results in a positive cash balance in the Highway Trust Fund, projected through the end of fiscal year 2010, an appropriation is provided as follows: For necessary expenses for Federal-aid highways and highway safety construction programs, as authorized by title 23, United States Code, \$36,107,000,000, which shall be derived from the General Fund, to remain available until expended.

The Administration is developing a comprehensive approach for surface transportation reauthorization. Consequently, the Budget contains no policy recommendations for programs subject to reauthorizations including Federal Aid Highways. Instead, the Budget conservatively displays baseline funding levels for all surface programs.

To reflect the growing imbalance between projected Highway Trust Fund (HTF) revenues and baseline spending in the most transparent manner, the Budget shows only the HTF funding that can be supported while maintaining positive annual cash balances in the HTF. The remaining spending compared to the baseline for the program is shown as discretionary budget authority from the General Fund. Specifically, for 2010 the Budget includes \$5.0 billion in new contract authority and obligation limitation in the existing Federal-aid Highways account and \$36.1 billion in a new General Fund share account. Again, this presentation does not represent the Administration's recommended funding levels or a budgeting approach for the upcoming reauthorization. Rather, it is intended to accurately depict the condition of the HTF and recognize that, under current law, maintaining baseline spending would require support from the General Fund.

The Federal-Aid Highway Act of 1968 authorized the establishment of a right-of-way revolving fund. This fund was used to make cash advances to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs.

This program was terminated by TEA-21 but will continue to be shown for reporting purposes as loan balances remain outstanding. The purchase of right-of-way is an eligible expense of the Federal-aid program.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General Fund to the Highway Trust Fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs as specified by law.

The following Status of Funds table presents the status of the Highway Trust Fund. The rule governing most trust funds is that the legal authority to incur obligations against the receipts estimated to be collected by the fund cannot exceed the cash balances of the fund, i.e., the actual receipts estimated to be collected in that year. The laws governing the Highway Trust Fund provide an exception to this rule. The legal authority to incur obligations against the Highway Trust Fund can exceed the actual cash balances up to the receipts anticipated to be collected in the following four years.

Cash balances.—The Status of Funds table begins with the unexpended balance on a "cash basis" at the start of the year. The table shows the amount of cash invested in Federal securities at par value and the amount of cash on hand, i.e., uninvested balance. Next, the table provides the amounts of cash income and cash outlays during each year to show the cash balance at the end of each year.

The following table shows the annual income and outlays of programs funded by the Highway Account of the Highway Trust Fund.

The Federal-Aid Highways (FAH) program is designed to aid in the development, operations and management of an intermodal transportation system that is economically efficient, environmentally sound, provides the foundation for the Nation to compete in the global economy, and moves people and goods safely.

To date, all programs included within FAH have been financed from the Highway Trust Fund, and most are distributed via apportionments and allocations to States. Liquidating cash appropriations are subsequently requested to fund outlays resulting from obligations incurred under contract authority.

The Administration is developing a comprehensive approach for surface transportation reauthorization. Consequently, the Budget contains no policy recommendations for programs contained in the reauthorization legislation, including Federal-Aid Highways. The Budget displays baseline funding levels for all surface transportation programs.

To reflect the growing imbalance between projected Highway Trust Fund (HTF) revenues and baseline spending in the most transparent manner, the Budget shows only the HTF funding that can be supported while maintaining positive annual cash balances in the HTF. The remaining spending compared to the baseline for the program is shown as discretionary budget authority from the General Fund. Specifically, for 2010 the Budget includes \$5.0 billion in new contract authority and obligation limitation in the existing Federal Aid Highways account and \$36.1 billion in a new General Fund share account. Again, this presentation does not represent the Administration's recommended funding levels or a budgeting approach for the upcoming reauthorization. Rather, it is intended to accurately depict the condition of the HTF and recognize that, under current law, maintaining baseline spending would require support from the General Fund.

(B) distribute \$2,000,000,000 for section 105 of title 23, United States Code;

(5) distribute the obligation limitation provided for Federal-aid highways, less the aggregate amounts not distributed under paragraphs (1) and (2) and amounts distributed under paragraph (4), for each of the programs that are allocated by the Secretary under the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users

and title 23, United States Code (other than to programs to which paragraphs (1) and (4) apply), by multiplying the ratio determined under paragraph (3) by the amounts authorized to be appropriated for each such program for such fiscal year; and

(6) distribute the obligation limitation provided for Federal-aid highways, less the aggregate amounts not distributed under paragraphs (1) and (2) and amounts distributed under paragraphs (4) and (5), for Federal-aid highways and highway safety construction programs (other than the amounts apportioned for the equity bonus program, but only to the extent that the amounts apportioned for the equity bonus program for the fiscal year are greater than \$2,639,000,000, and the Appalachian development highway system program) that are apportioned by the Secretary under the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users and title 23, United States Code, in the ratio that—

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION

The Federal Motor Carrier Safety Administration (FMCSA) was established within the Department of Transportation by the Motor Carrier Safety Improvement Act (P.L. 106-159) in December 1999. Prior to this legislation, motor carrier safety responsibilities were under the jurisdiction of the Federal Highway Administration.

FMCSA's mission is to promote safe commercial motor vehicle operation and reduce truck and bus crashes. The agency also is charged with reducing fatalities associated with commercial motor vehicles through education, regulation, enforcement, and research and innovative technology, thereby achieving a safer and more secure transportation environment. Additionally, FMCSA is responsible for ensuring that all commercial vehicles entering the United States along its southern and northern borders comply with Federal motor carrier safety and hazardous materials regulations.

The Administration is working to develop a comprehensive approach for surface transportation reauthorization. Consequently, the Budget contains no policy recommendations for surface programs subject to reauthorizations, including Motor Carrier Safety Grants. Instead, the Budget conservatively displays baseline funding levels for all surface programs.

Motor Carrier Safety Grants are used to support State compliance reviews; identify and apprehend traffic violators; conduct roadside inspections; and support safety audits on new entrant carriers. State safety enforcement efforts at the southern and northern borders ensure that all points of entry into the U.S. are fortified with comprehensive safety measures. In addition, the FMCSA oversees State commercial driver's license (CDL) oversight activities to prevent unqualified drivers from being issued CDLs. The Performance and Registration Information Systems and Management (PRISM) program links State motor vehicle registration systems with carrier safety data in order to identify unsafe commercial motor carriers. FMCSA is deploying Commercial Vehicle Information Systems and Networks Deployment

MOTOR CARRIER SAFETY GRANTS—Continued

(CVISN) to improve safety and productivity of commercial vehicles and drivers; improving the accuracy, timeliness, and completeness of commercial motor vehicle safety data; and modernizing its Commercial Driver's License Information System (CDLIS).

The Administration is working to develop a comprehensive approach for surface transportation reauthorization. Consequently, the Budget contains no policy recommendations for surface programs subject to reauthorizations, including NHTSA's Operations and Research. Instead, the Budget conservatively displays baseline funding levels for all surface programs.

NHTSA's Operation and Research programs fund a broad range of initiatives, including promulgation of Federal motor vehicle safety standards for motor vehicles and safety related equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act, as amended by the Energy Independence

and Security Act of 2007; international harmonization of vehicle standards; and consumer information on motor vehicle safety, including the New Car Assessment Program.

NHTSA conducts compliance programs for motor vehicle safety and automotive fuel economy standards; investigations of safety-related motor vehicle defects; enforcement of Federal odometer law; support of enforcement of State odometer law; and safety recalls when warranted.

Motor vehicle safety research and development supports all NHTSA programs, including the collection and analysis of crash data to identify safety problems; development of alternative solutions; and assessments of costs, benefits, and effectiveness. Research continues to concentrate on improving vehicle crash-worthiness and crash avoidance, with emphasis on increasing safety belt use, decreasing alcohol involvement in crashes, decreasing the number of rollover crashes, improving vehicle-to-vehicle crash compatibility. NHTSA also continues to improve data systems.

NHTSA provides research, demonstrations, technical assistance, and national leadership for highway safety programs conducted by State and local governments, and various safety associations and organizations. This program emphasizes alcohol and drug countermeasures, vehicle occupant protection, traffic law enforcement, emergency medical and trauma care systems, traffic records and licensing, State and community evaluation, motorcycle riders, pedestrian and bicycle safety, pupil transportation, young and older driver safety programs, and development of improved accident investigation procedures.

Implementation and operation of the Problem Driver Pointer System (PDPS) helps to identify drivers who have been suspended for or convicted of serious traffic offenses, such as driving under the influence of alcohol or other drugs.

The Administration is working to develop a comprehensive approach for surface transportation reauthorization. Consequently, the Budget contains no policy recommendations for surface programs subject to reauthorizations, including Highway Traffic Safety Grants. Instead, the Budget conservatively displays baseline funding levels for all surface programs. NHTSA grant programs provide funding for the following activities:

State highway safety programs designed to reduce traffic crashes and resulting deaths, injuries, and property damage.

Programs to reduce deaths and injuries from riding unrestrained or improperly restrained in motor vehicles.

Enactment and enforcement of laws requiring the use of safety belts in passenger motor vehicles.

Adoption and implementation of effective programs to improve the timeliness, accuracy, completeness, uniformity, integration, and accessibility of State data that is needed to identify priorities for national, State, and local highway and traffic safety programs

Adoption and implement effective programs to reduce traffic safety problems resulting from individuals driving while under the influence of alcohol.

Enforcement of laws which impose child restraint requirements that meet Federal criteria under section 3 of Anton's Law (49 U.S.C. 30127 note; 116 Stat. 2772).

Reduction of the number of single and multi-vehicle crashes involving motorcyclists through motorcyclist safety training and motorcyclist awareness programs, including improvements to training curricula, delivery of training, recruitment or retention

of motorcyclist safety instructors, and public awareness and outreach programs.

High-visibility traffic safety law enforcement campaigns to achieve one or both of the following objectives: (1) reduce alcohol-impaired or drug-impaired operation of motor vehicles; and/or (2) increase the use of safety belts by occupants of motor vehicles.

Administrative activities related to carrying out Chapter 4 of Title 23, United States Code, as well as supporting the National Occupant Protection User Survey (NOPUS) and Highway Safety Research programs.

Funds are used to redevelop the Pennsylvania Station in New York City, which involves also renovating the James A. Farley Post Office building. Funding for this project was included in the Grants to the National Railroad Passenger Corporation appropriation in 1995 through 1997, and the Northeast Corridor Improvement Program in 1998. In 2000, an advance appropriation of \$20 million was provided for 2001, 2002, and 2003. In 2001, Congress specified that the \$20 million advance appropriation provided in 2000 for the Farley Building, was to be used exclusively for fire and life safety initiatives. No funds are requested in 2010.

A Capital Grant Program encourages state participation in its passenger rail service. Under this program, a State or States may apply for grants for up to 50 percent of the cost of capital investments necessary to support improved intercity passenger rail service that either requires no operating subsidy or for which the State or States agree to provide any needed operating subsidy. To qualify for funding, States would have to include intercity passenger rail service as an integral part of Statewide transportation planning as required under 23 U.S.C. 135. Additionally, the specific project would have to be on the Statewide Transportation Improvement Plan at the time of application.

FEDERAL TRANSIT ADMINISTRATION

The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), was enacted August 10, 2005 and expires on September 30, 2009. In 2010, the Federal Transit Administration continues to provide significant grant funding to support transit programs. The Administration is developing a comprehensive approach for surface transportation reauthorization. Consequently, the Budget contains no policy recommendations for programs subject to reauthorization, including transit programs. Instead, the Budget displays baseline funding levels for all surface transportation programs.

The table below presents actual funding enacted for 2008 and 2009 together with baseline funding levels displayed in the Budget for 2010 for all Federal Transit Administration accounts. Additional detail is provided in the program budget schedules that follow.

Unless other legislation is enacted that authorizes a change that results in a positive cash balance in the Highway Trust Fund, projected through the end of fiscal year 2010, an appropriation is provided as follows: For necessary expenses for Formula and Bus Grants programs, as authorized by section 53 of title 49, United States Code, \$3,343,171,000, notwithstanding section 5338(b)(1) of title 49, United States Code.

To reflect the growing imbalance between projected Highway Trust Fund (HTF) revenues and baseline spending in the most transparent manner, the Budget shows only the HTF funding that can be supported while maintaining positive annual cash balances in the trust fund. The remaining spending compared to the baseline for the program is shown as discretionary budget authority from the General Fund. Specifically, for 2010 the Budget includes \$5 billion in contract authority and obligation limitation in the existing Formula and Bus Grant account and \$3.3 billion in a new Formula and Bus Grants, General Fund Share account. Again, this presentation does not represent the Administration's recommended funding levels or a budgeting approach for the upcoming reauthorization. Rather, it is intended to accurately depict the condition of the HTF and recognize that, under current law, maintaining baseline spending would require support from the General Fund.

To reflect the growing imbalance between projected Highway Trust Fund (HTF) revenues and baseline spending in the most transparent manner, the Budget shows only the HTF funding that can be supported while maintaining positive annual cash balances in the trust fund. The remaining spending compared to the baseline for the program is shown as discretionary budget authority from the General Fund. Specifically, for 2010 the Budget includes \$5 billion in contract authority and obligation limitation in the existing Formula and Bus Grants account and \$3.3 billion in a new Formula and Bus Grants, General Fund Share account. Again, this presentation does not represent the Administration's recommended funding levels or a budgeting approach for the upcoming reauthorization. Rather, it is intended to accurately depict the condition of the HTF and recognize that, under current law, maintaining baseline spending would require support from the General Fund.

The Pipeline and Hazardous Materials Safety Administration (PHMSA) has a responsibility for advancing the safe and secure transportation of hazardous materials. PHMSA's program is focused on five principal areas. First, PHMSA provides comprehensive regulations for the safe and secure transportation of hazardous materials. Second, through outreach, training and distribution of informational materials, PHMSA helps the hazardous materials community understand the regulations and how to comply with them. Third, PHMSA enforces the regulations to ensure compliance with safety and security standards by those subject to the regulations. Fourth, PHMSA assists the Nation's response community to plan for and respond to hazardous materials transportation emergencies. Finally, PHMSA builds on each of these principle areas to reduce overall transportation risk by establishing a sound and comprehensive technical and analytical foundation to ensure that the program's resources are effectively applied to minimize serious incidents and fatalities, mitigate the consequences of incidents that occur, and enhance safety.

Federal hazardous material law (49 U.S.C. 5101 et seq.), established a national registration program for shippers and carriers of hazardous materials. The law also established fees to be collected from registrants. These fees finance emergency preparedness planning and training grants, development of a training curriculum for emergency responders, and technical assistance to States, political subdivisions, and Indian tribes; publication and distribution of the Emergency Response guidebook; and costs for staff to administer the program.

The Oil Pollution Act of 1990 requires the preparation of oil spill response plans by pipeline operators to minimize the environmental impact of oil spills and to improve public and private sector response capabilities. The Pipeline and Hazardous Materials Safety Administration (PHMSA) is responsible for the review, approval and testing of these plans, and for ensuring that the public and the environment are provided with an adequate level of protection from such spills. PHMSA does this through data analysis, spill monitoring, pipeline mapping, environmental indexing, and advanced technologies to detect and prevent leaks.

The Research and Innovative Technology Administration (RITA) is responsible for coordinating, facilitating, and reviewing the Department's research and development programs and activities. Coordination and advancement of research and technology activities is led by the RITA Office of Research, Development and Technology and is funded through the General Fund. RITA also manages DOT's responsibilities for coordinating and developing Positioning, Navigation and Timing (PNT) technology, PNT policy coordination, and spectrum management. RITA is also the program manager for the Nationwide Differential Global Positioning System.

RITA also oversees and provides direction to the following programs and activities.

The Bureau of Transportation Statistics (BTS) manages and shares statistical knowledge and information on the Nation's transportation systems, including statistics on freight movement, geospatial transportation information, and transportation economics. BTS is funded by an allocation from the Federal Highway Administration's Federal-Aid Highways account.

The Intelligent Transportation Systems (ITS) Joint Program Office (JPO) facilitates the deployment of technology to enhance the safety, efficiency, convenience, and environmental sustainability of surface transportation. The ITS program carries out its goals through research and development, operational field testing, technology transfer, training and technical guidance. The ITS Research Program is currently funded through the Federal Highway Administration (FHWA) under SAFETEA-LU (Subtitle C).

The University Transportation Centers (UTC) advance U.S. technology and expertise in many transportation-related disciplines through grants for transportation education, research, and technology transfer at university-based centers of excellence. Funding has been transferred to RITA through interagency agreements; beginning in 2010, UTCs will be funded from an allocation from the Federal Highway Administration's Federal-Aid Highways account.

The John A. Volpe National Transportation Systems (Cambridge, MA) provides expertise in research, analysis, technology deployment, and other technical knowledge to DOT and non-DOT customers on specific transportation systems projects or issues, on a fee-for-service basis.

The Transportation Safety Institute develops and conducts safety, security, and environmental training, products, and ser-

vices for both the public and private sector on a fee-for-service and tuition basis.

This appropriation finances the cost of conducting and supervising audits and investigations relating to the programs and operations of the Department to promote economy, efficiency and effectiveness, and to prevent and detect fraud, waste, and abuse in such programs and operations. Congress also provided an appropriation of \$20 million in FY 2009 to the Office of Inspector General (OIG) for conducting audits and investigations of expenditures of funds made available to the Department in the American Recovery and Reinvestment Act of 2009. In addition, the OIG will receive reimbursable funding from the Federal Highway Administration, the Federal Transit Administration, the Federal Aviation Administration, and the National Transportation Safety Board.

The Surface Transportation Board was created on January 1, 1996, by P.L. 104-88, the ICC Termination Act of 1995 (ICCTA). The Board is specifically responsible for the regulation of the rail and pipeline industries and certain non-licensing regulation of motor carriers and water carriers.

Rail Carriers.—This regulatory oversight encompasses the regulation of rates, mergers and acquisitions, construction, and abandonment of railroad lines, as well as the planning, analysis and policy development associated with these activities.

Other Surface Transportation Carriers.—This regulatory oversight includes certain regulation of the intercity bus industry and surface pipeline carriers as well as the rate regulation of water transportation in the non-contiguous domestic trade, household-good carriers, and collectively determined motor rates.

2010 Program Request.—\$27.032 million is requested to implement rulemakings and adjudicate the ongoing caseload within the directives and deadlines set forth by the ICCTA. This includes a request for \$1.250 million from reimbursements from offsetting collections of user fees.

The following paragraph is presented in compliance with Section 703 of the ICCTA. It is presented without change or correction.

The Board's Request to OMB.—The Board had submitted to the Secretary of Transportation and the Office of Management and Budget a 2010 appropriation request of \$30.733 million and a request for \$1.250 million from reimbursements from the offsetting collection of user fees to operate at 165 FTEs. The offsetting collection of user fees is based on the costs incurred by the Board for fee-related activities and is commensurate with the costs of processing parties' submissions. In past fiscal years, the Board received both an appropriation and authorization for offsetting collections to be made available to the appropriation for the Board's expenses. The 2010 Budget request reflects offsetting collections as a credit to the appropriation received, to the extent that they are collected.

This level of funding is necessary to implement rulemakings and adjudicate the ongoing caseload within the deadlines imposed by ICCTA. The Board requires adequate resources to perform key functions under the ICCTA, including rail rate reasonableness oversight; the processing of rail consolidations, abandonments, and other restructuring proposals; and the resolution of non-rail matters. This request also includes \$2.165 million to implement the Board's expanded jurisdiction with respect to regulation of passenger rail service under the Passenger Rail Investment and Improvement Act of 2008, P.L. No. 110-432.

The appropriation for Operations and Training provides funding for staff at headquarters and gateway offices to administer and direct Federal maritime transportation programs. Maritime Administration operations include planning for coordination of U.S. maritime industry activities under emergency conditions; technology assessments calculated to achieve advancements in ship design, construction and operation; and port and intermodal development to increase capacity and mitigate congestion in freight movements. Maritime training programs include the operation of the U.S. Merchant Marine Academy and financial assistance to the six State maritime academies.

The total Operations and Training budget request of \$152.9 million, is distributed as follows: United States Merchant Marine Academy \$74.4 million, State maritime academies \$15.6 million and maritime operations \$62.8 million. The 2010 maritime operations request includes \$15 million to support integrated planning with the Department of Homeland Security for development and

modernization of intermodal freight infrastructure linking coastal and inland ports to highway and rail networks.

The Operating-Differential Subsidies (ODS) program provided resources to maintain a U.S.-flag merchant fleet to serve both the commercial and national security needs of the United States through operating subsidies to participating U.S.-flag ship operators to offset certain cost differences between U.S.-flag and foreign-flag vessel operations. This program has been replaced by the Maritime Security Program. The ODS account is inactive except for final settlement of open contracts and closing of financial accounts.

Ocean freight differential is the difference in cost incurred in the movement of ocean cargoes. In general, when applied to cargo preference policy implementation, it is the cost difference between using U.S flag carriers and foreign-flag carriers. Cargo preference provides a revenue source to help sustain a privately-owned U.S. flag merchant marine by requiring shippers of certain U.S. government-sponsored cargoes to use U.S. flag vessels. Public Law 99-108 amended the cargo preference requirement in Section 901 of the Merchant Marine Act by increasing the minimum required tonnage of certain government-sponsored food-aid shipments that must be shipped on U.S. flag vessels from 50 to 75 percent. The Maritime Administration is required to reimburse the U.S. government agencies that sponsor these food-aid shipments for

the increase in ocean freight differential associated with compliance with this expanded U.S. flag shipping requirement.

The Maritime Administration (MARAD) is authorized to reactivate, maintain, operate, and deactivate government-owned merchant vessels comprising the National Defense Reserve Fleet (NDRF) and the Ready Reserve Force (RRF), a subset of the NDRF. Resources for RRF vessel maintenance, preservation, activation and operation costs, as well as RRF infrastructure support costs and additional DOD/Navy-sponsored sealift activities and special projects, are provided by reimbursement from the Defense Sealift Fund. MARAD incurs similar obligations for government-owned merchant vessels outside the RRF fleet and for the charter of privately-owned merchant vessels, the cost of which is likewise provided by reimbursement from sponsoring Federal agencies.

In addition, the fund is used by MARAD to finance the acquisition, maintenance, preservation, protection and use of merchant vessels involved in mortgage foreclosure or collateral forfeiture proceedings instituted by the Federal Government and not financed by the Federal Ship Financing Fund or the Maritime Guaranteed Loan Program; and to finance the acquisition and disposition of merchant vessels under the Trade-In/Scrap Out program. Direct appropriations for the disposal of obsolete government-owned merchant vessels are provided to a separate account within the ship disposal program.

This program provides for a full faith and credit guarantee of debt obligations issued (1) by U.S. or foreign shipowners to finance or refinance either U.S.-flag vessels or eligible export vessels constructed, reconstructed or reconditioned in U.S. shipyards; and (2) by U.S. shipyards to finance the modernization of U.S. shipbuilding technology at shipyard facilities located in the United States.

As required by the Federal Credit Reform Act of 1990, this account also includes the subsidy costs associated with loan guarantee commitments made in 1992 and subsequent years, and the administrative expenses of the program. The subsidy costs are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

Funds for administrative expenses for the Title XI program are appropriated to this account, then transferred to and merged with the Operations and Training account.

No new funds for loan guarantees are requested for 2010.

of Domestic Finance and Tax Policy, as well as various management areas within the Department of the Treasury. In order to meet current and future economic challenges, Treasury staff must maintain vast expertise in an array of complex finance and government fields. The Budget supports this need, particularly in the areas of housing finance, capital markets, and tax administration. The Budget also provides resources for the Afghanistan Threat Finance Cell and covers administrative expenses associated with the tax credit exchange programs authorized in the American Recovery and Reinvestment Act of 2009.

The Office of Inspector General (OIG) conducts audits, evaluations, and investigations designed to: (1) promote economy, efficiency, and effectiveness and prevent and detect fraud, waste, and abuse in Departmental programs and operations; and (2) keep the Secretary and the Congress fully and currently informed of problems and deficiencies in the administration of Departmental programs and operations. This office is responsible for audit and investigative operations of all Treasury activities except tax administration.

In 2010 the OIG Office of Audit will continue, as a first priority, to address mandated requirements related to audits of the Department's financial statements, information security, and reviews of failed financial institutions regulated by the Office of the Comptroller of the Currency or the Office of Thrift Supervision resulting in material losses to the deposit insurance fund. The OIG will conduct audits of the Department's highest risk programs and operations. The Office of Audit expects to complete 100 percent of statutory audits by the required deadline, and to complete 70 audit products in 2010.

In 2010, the OIG Office of Investigations will continue to investigate all reports of fraud, waste and abuse and other criminal activity, such as financial programs where fraud and other crimes are involved in the issuance of licenses or benefits to citizens; will perform oversight or quality assurance reviews of Treasury's police operations at the Bureau of Engraving and Printing and the U.S. Mint; and will conduct proactive efforts to detect, investigate and deter electronic crimes and other threats to the Treasury's physical and cyber critical infrastructure. The Office of Investigations will continue current efforts to aggressively invest-

igate, close, and refer cases for criminal prosecution, civil litigation or corrective administrative action in a timely manner.

The Treasury Inspector General for Tax Administration (TIGTA) conducts independent audits and investigations of Treasury Department matters relating to the Internal Revenue Service (IRS), the IRS Oversight Board, and the IRS Office of Chief Counsel. TIGTA's oversight helps ensure that the IRS accomplishes its mission; improves its programs and operations; promotes economy, efficiency and effectiveness; and prevents and detects fraud, waste and abuse.

In 2010, TIGTA's investigative program will concentrate on three core areas: (1) employee integrity; (2) employee and infrastructure security; and (3) external attempts to corrupt tax administration. In 2008, TIGTA closed 3,662 investigations, including 1,659 cases involving employee misconduct referred for action and 179 cases accepted for criminal prosecution.

In 2010, TIGTA will administer an audit program that strikes a balance between statutory audit coverage and high-risk audit work. The statutory coverage will include audits mandated by the IRS Restructuring and Reform Act of 1998, as well as reviews that address computer security, taxpayer privacy and rights, and financial management. In addition, TIGTA will continue to address Congressional requests for audit coverage, and closely monitor the IRS' modernization efforts, its major management challenges, and its progress in achieving its strategic goals. TIGTA's 2008 highlights include issuing 179 audit, inspection, and evaluation reports, and identifying more than \$2.4 billion in potential financial benefits.

The Terrorism Risk Insurance Extension Act of 2007 (P.L. 110-160) reauthorized and revised the program established by the Terrorism Risk Insurance Act (TRIA) of 2002 (P.L. 107-297). The 2007 Act extended the Terrorism Insurance Program for seven years, through December 31, 2014. This extension of TRIA added

a requirement for commercial property and casualty insurers to make available coverage for losses from domestic as well as foreign acts of terrorism and extends TRIA coverage for those losses.

The Budget baseline includes the estimated Federal cost of providing terrorism risk insurance, reflecting the 2007 TRIA extension. Using market driven data, the Budget projects annual outlays and recoupment for TRIA. These estimates represent the weighted average of TRIA payments over a full range of scenarios, most of which assume no terrorist attacks (and therefore no TRIA payments), and some of which assume terrorist attacks of varying magnitudes. On this basis, the Budget baseline projects net spending of \$2.160 billion over the 2009-2013 period and \$3.069 billion over the 2009-2018 period.

The Administration proposes to lessen federal intervention in this insurance market and reduce the subsidy to private insurers (i.e., increase the private sector share of losses) beginning in 2011 after the economy is expected to stabilize. For more details, please see the Credit and Insurance chapter in the Budget's Analytical Perspectives volume. The Budget projects savings from this proposal of \$263 million over the 2010-2014 period and \$644 million over the 2010-2019 period.

Individual federal tax returns include an optional Federal income tax designation of \$3 that an individual may elect to be paid to the Presidential Election Campaign Fund (PECF). In recent years, approximately 10 percent of individuals have elected to make this designation, resulting in about \$50 million paid into the Fund annually. Approximately every four years, the Department of the Treasury makes distributions from the PECF (referred to as public funds, matching funds, or Federal funds) to qualified Presidential candidates and national party committees for use in the Presidential elections.

Money for the public funding of Presidential elections can only come from the PECF. If the PECF runs short of funds, no other general Treasury funds may be used.

The Federal Election Commission administers the public funding program, determining which candidates are eligible, the amount to which they are entitled, and auditing their use of funds. The Department of the Treasury collects the income tax designations and makes payouts to the campaigns.

Matching Funds for Presidential Primary Candidates.—Upon certification by the Federal Election Commission—based on demonstrating broad national support, adhering to spending limits, and other qualifications—every eligible Presidential primary candidate is entitled to receive \$250 in Federal matching funds for each eligible \$250 of private contributions received after the beginning of the calendar year immediately preceding the

election year through the end of the calendar year of the election. For the 2008 Presidential election, payouts to eligible candidates were possible beginning in January 2008 and all monies raised in 2007 or 2008 were potentially matchable.

Candidates for General Elections.— By statute, eligible candidates of each major party in a Presidential election are entitled to equal payments in an amount which, in the aggregate, shall not exceed \$20 million each, plus an inflation adjustment. In 2008, this amounted to \$84.1 million for each candidate, and only the Republican candidate received general election funding. Eligibility for this funding depends on meeting several criteria such as limiting spending to amounts specified by campaign finance laws. In addition, provision is made for new parties, minor parties, and non-major party candidates who may receive in excess of 5 percent of the popular vote and therefore, be entitled to a pro rata portion of the major party grant in the general election.

Nominating Party Conventions.— Upon certification by the Commission, payments may be made to the national committee of a major or minor political party that chooses to receive its entitlement. The total of such payments will be limited to the amount in the account at the time of payment. The national committee of each party may receive payments beginning on July 1 of the year immediately preceding the calendar year in which a presidential nominating convention of the political party is held. By statute, the two major parties receive \$4 million each, plus an inflation adjustment (over 1974). In 2007, the Republican and Democratic parties each received \$16.4 million for their nominating conventions. An additional \$464,000 was paid to each party in 2008 to reflect the fully adjusted grant for 2008.

Under the law creating the Exchange Stabilization Fund (ESF), 31 USC 5302, the Secretary of the Treasury, with the approval of the President, is authorized to deal in gold, foreign exchange, and other instruments of credit and securities, as the Secretary considers necessary, consistent with U.S. obligations in the International Monetary Fund (IMF) regarding orderly exchange arrangements and a stable system of exchange rates. All earnings and interest accruing to the ESF are available for the purposes thereof. Transactions in Special Drawing Rights (SDRs) and U.S. holdings of SDRs are administered by the fund. As required by Public Law 95-612, the fund is not available to pay administrative expenses.

The principal sources of the fund's income are earnings on investments held by the fund, including interest earned on fund holdings of U.S. Government securities.

The amounts reflected in the 2009 and 2010 estimates entail only projected net interest earnings on ESF assets. The estimates are subject to considerable variance, depending on changes in the amount and composition of assets and the interest rates applied to investments. In addition, these estimates make no attempt to forecast gains or losses on SDR valuation or foreign currency valuation.

On September 19, 2008, the Treasury Department announced the establishment of the Temporary Guarantee Program for Money Market Funds. The Program is designed to enhance market and investor confidence and address temporary disruptions experienced in the U.S. money market mutual fund industry and dislocations in credit markets. Under the Program, all publicly offered money market funds that had a policy of maintaining a stable net asset value or share price as of September 19, 2008, were regulated under Rule 2a-7 of the Investment Company Act of 1940, and registered with the Securities and Exchange Commission (SEC) were eligible to participate if they paid an up-front Program participation fee, met certain other eligibility criteria, and were accepted into the Program by the Treasury Department. Under the Program, the Treasury Department guarantees that individual investors will receive the stable share price for each share held in a participating money market fund (typically \$1 per share) up to the number of shares held as of the close of business as of September 19, 2008. In early 2009, Treasury purchased \$3.6 billion in assets from a liquidating money market mutual fund in order to preserve its net asset value at the least cost to the Government. The Program's guarantee is backed by funds from the Exchange Stabilization Fund (ESF). The Emergency Economic Stabilization Act of 2008 requires that the ESF be reimbursed for any losses under the Program from funds authorized under that Act. The Program is set to expire on September 18, 2009.

The Department of the Treasury was authorized to pilot a franchise fund under P.L. 103-356, the Government Management and Reform Act of 1994. The purpose of the franchise fund pilots was to bring about lower costs and higher quality for government and financial administrative services through greater competition. The Treasury Franchise Fund (The Fund) was established by P.L. 104-208, made permanent by P.L. 108-447 and codified as 31 U.S.C. 322, note.

The Fund is a revolving fund that is used to supply financial and administrative services to the Department of Treasury and other federal agencies on a fee-for-service basis. The Financial Management Administrative Support budget activity has been defined to include the services provided by the Bureau of the Public Debt's Administrative Resource Center (ARC). ARC has been providing competitively priced, high quality, value added services since joining the Fund in 1998 and has been designated a Center of Excellence as a federal shared service provider under both the Financial Management (FMLoB) and Information Systems Security Lines of Business (ISSLoB).

Section 1603 of the American Recovery and Reinvestment Act of 2009 authorizes and directs the Secretary of the Treasury to establish a grant in lieu of a tax credit for taxpayers that develop renewable energy facilities. This account presents the estimated disbursements for this program.

This program will provide grants for specified energy property (including qualified facilities that produce electricity from wind and certain other renewable resources; qualified fuel cell property; solar property; qualified small wind energy property; geothermal property; qualified microturbine property; combined heat and power system property; and geothermal heat pump property). Grants are available for property placed in service in 2009 or 2010. In some cases, if construction begins in 2009 or 2010, the grant can be claimed for property placed in service before 2013 for qualified wind facilities, 2014 for other qualified renewable energy facilities, and 2017 for other energy property. In general, projects that meet eligibility criteria for the energy property investment tax credit (ITC) (including qualified renewable energy facilities for which an election to claim the ITC can be made) are eligible for the grants. A person receiving a grant for specified energy property may not claim either the investment tax credit or the renewable energy production tax credit with respect to the same property.

Section 1602 of the American Recovery and Reinvestment Act of 2009 (Recovery Act) authorizes and directs the Secretary of the Treasury to establish grants to states for low-income housing projects in lieu of low-income housing tax credits (LIHTC). This account presents the estimated disbursements for this program.

The program will provide grants to State housing credit agencies to make sub-awards to finance the construction or acquisition and rehabilitation of qualified low-income housing in the same manner and generally subject to the same limitations as LIHTCs allocated under section 42 of the Internal Revenue Code (IRC). The Recovery Act specifies that the exchange of credits for grants applies only to the 2009 LIHTC ceiling under IRC 42(h)(3)(C), and that States may elect to exchange credits for cash grants subject to the requirements and limitations provided in Division B, sections 1404 & 1602 of the Recovery Act.

The Community Development Financial Institutions (CDFI) Fund provides equity investments, grants, loans, and technical assistance to community development banks, credit unions, loan and venture capital funds in order to expand the availability of retail banking services and affordable credit in distressed communities. The CDFI Fund also administers the New Markets Tax Credit (NMTC), which supports the development of commercial, industrial and community facilities in blighted areas.

The 2010 Budget proposes additional funding for the CDFI Fund's existing merit-based programs and a new grant program, the Capital Magnet Fund (CMF). CMF, authorized by the Housing and Economic Recovery Act of 2008 (P.L. 110-289), will expand financing for affordable housing and economic development projects in distressed areas. The Budget also includes funding to reform the Bank Enterprise Award program so that awards reach communities most in need. Further, while not requiring additional administrative resources in 2010, the Administration is considering further means to improve the effectiveness of the NMTC program, including the possibility of authorizing the NMTC to offset tax liability under the Alternative Minimum Tax system. Finally, the Budget includes two legislative proposals that will make it easier for the CDFI Fund to provide awards to highly qualified CDFIs.
