**ISTREET SOLUTIONS, AN SAP HOSTING PARTNER, ANNOUNCES
ENGAGEMENT WITH NDB Accounting & Consulting LLC; MINIMIZES
CORPORATE RISK**

ORLADO, Fla. – May 5, 2007 – iStreet Solutions, LLC (iStreet) today announced it has formalized an engagement with the national accounting firm NDB Accounting & Consulting, LLC (formerly DuPont and Morgan) to be its auditor for corporate risk and governance best practices. Today's announcement was made at the SAPPHIRE® 2008 Orlando conference being held May 4-7.

NDB's audit team provides specialization in the data hosting environment. The review culminates with the awarding of the SAS-70 Type II certification, which indicates iStreet's business processes are monitored and approved over an extended period. SAS-70 is the Sarbanes-Oxley equivalent for data hosting companies, as published by the national accounting board, PCAOB (Public Company Accounting Oversight Board).

"We are extremely comfortable with iStreet and their excellent customer service for our global implementation of SAP® solutions," said Tony Costa, senior vice president and CIO of Bumble Bee Foods. "We are pleased iStreet is continuing its commitment to provide stable, reliable and secure hosting with the addition of the SAS-70 certification."

Protection of private information and financial data manipulation has been in the news since the Enron and WorldCom failures in the early 2000s. The Sarbanes-Oxley Act, passed by the U.S. Congress in 2004, has established new, rigorous standards for public companies. Though not legally required, iStreet has chosen to demonstrate its commitment to the high privacy standards embodied in the law by following Sarbanes-Oxley requirements.

Mark Richter, President of iStreet, emphasizes the importance of protecting information it maintains in its control: "Our customers create millions of transactions every year, involving other companies and consumers. iStreet is entrusted to safely secure this

information 24/7. Though we have always implemented best practices in our industry, we feel that a third-party review of our business can only help further that trust.”

Mark Richter founded iStreet in 2004 to be a Data Hosting Center for small and medium-sized companies that utilize SAP software solutions to run their businesses. iStreet has quickly become a certified SAP hosting partner for small and mid-sized companies looking for an enterprise level of service while lowering their total cost of ownership (TCO). iStreet underwent a rigorous review process by SAP in 2005, and again in 2007, receiving certification from SAP of its ability to deliver high-quality hosting services. For more information, contact iStreet Solution at 916-373-1933, visit the website at www.istreetsolutions.com, or stop by booth #E3 at SAPPHERE.
