iStreet Solutions LLC is an SAP hosting partner with over 15 years’ staff experience, providing highly available IT infrastructures. iStreet focuses its delivery objectives on the small- to midsize-business (SMB) market. Delivery objectives include lowering the client’s operational total cost of ownership (TCO) and minimizing the time to productive use of the SAP® software implementation.

System integrators (SIs) and SMBs can take advantage of iStreet Solutions’ software hosting capabilities for SAP software, which are certified by SAP.

The advantages of working with iStreet are as follows:

- SIs can utilize iStreet to offer a full-service solution to their SMB clients.
- iStreet has Tier IV data center resources and is certified by SAP for hosting SAP software environments.
- By partnering with iStreet, an SI can provide a fully certified solution offering to its customer. This approach helps the SI offer SAP software support services over the life of the SAP implementation, not just the initial implementation.

iStreet hosting solutions for SAP software range from full development, quality assurance, and production landscapes for the SAP ERP application to Internet Demonstration and Evaluation System (IDES) sandboxes. By partnering with multiple SIs, end users can have the best of breed for their specific implementation, while retaining the benefits of iStreet’s low TCO approach.

iStreet is known for its flexibility in building solution offerings for its clients, whether they are end users or SIs working on behalf of end users.
