

Coordinated Transit

Ecolane 

INTEGRATED SCHEDULING DONE RIGHT. FINALLY.

WWW.ECOLANE.COM

The Product

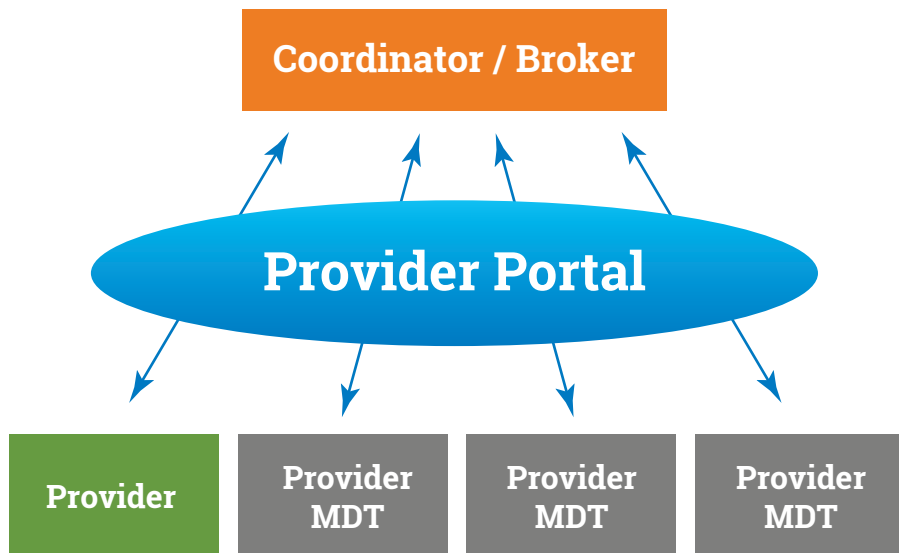

Ecolane's Coordinated Transit solution is built upon the same proven technology that distinguishes Ecolane's DRT product from everything else in the market. The software provides **transportation coordinators or brokers** the ability to **schedule effectively, identify public transportation solutions, and process claims within a single, unified interface.**

The solution **automates provider management, funding source compliance, and trip assignments** and presents coordinators with the operational freedom to focus on other aspects of their business. What sets Ecolane's technology apart is the ability to plan trips with continuous schedule optimization that automatically responds to changes in real-time. Over 40 standard

reports are included with the software to better enable transit providers to forecast, plan and make decisions. Need information exported to **Word, PDF, Excel or CSV** files for further processing? Not a problem. Ecolane DRT can handle that too.

Coordinated Transit Highlights

- Ability to schedule based on **least-cost provider, most efficient routing, or combination of the two**
- Integrated **SMS reminders**
- Real-time **system management dashboard**
- Automated **compliance checks**
- Real-time **schedule optimization**

Coordinated Transit Visualized in Steps

1. Coordinator/broker receives a trip request from a client
2. The coordinator software assigns trips to provider based upon pre-determined criteria such as price, funding source, and optimization preferences
3. Trips are reviewed in the Provider Portal and accepted or rejected by agency personnel
4. The transit provider manages customer transport manually, via third-party dispatch software or via real-time live dispatch Ecolane DRT
5. Providers using manual or third party methods record the trip planning outcome in the portal to make a claim (This step is done automatically for Ecolane DRT providers)

Additional Features & Highlights

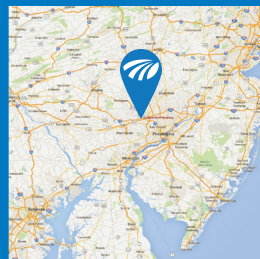

- **Online Trip Ordering**
 - Quick and accessible experience for customers
- **Reporting**
 - Built-in, easy-to-understand reports
 - Performance assessments to identify operational efficiencies and inefficiencies
- **Dashboard**
 - Provides transit operators increased transparency and compliance assurance
