

# FLEXA-BULL DURA-BULL DEPENDA-BULL NO BULL!

We asked professionals like you what they need in a water hose for demanding, everyday job-site use. Then we engineered one to exceed your specs: **tough outer jacket** that resists abrasion, **500+ psi burst strength** rating and **industrial couplings** that can **take abuse**. Then we took innovation a step further by engineering a compound that offers **flexibility and handling** unlike any hose you've ever used before.

Flexalloy: Engineered with you in mind.  
**Stop by Booth #N671 and check it out.**
