

# Transform Your Building's **Performance**

## **UPGRADE LIGHTING**

Upgrade your building's old T12 florescent, incandescent, halogen, and HID lighting with energy efficient replacements and retrofits while also improving light quality.

## **IMPROVE CONTROLS**

Implement lighting, HVAC, and load management controls to further reduce costs and gain greater control over the operation of your building while creating a more comfortable environment.

## **REDUCE ENERGY EXPENSES**

We'll show you how your building's energy usage and demand can be reduced, saving your business as much as 70% off of its utility bills.

## **INCREASE PROFITS**

Stop giving your money away to utility providers. EZ-Integration will show you how to increase your building's efficiency and turn it into higher profit margins for your business.

## **RETURN ON INVESTMENT**

Our projects deliver a tangible return on investment for your business. On average clients reduce expenses by 40% with an ROI of 3 years.

## **AEP Cash Incentives Available Now! Lighting, HVAC, and Controls Qualify**

AEP is paying cash incentives to businesses which are changing out inefficient lighting, old HVAC equipment and thermostats, or installing energy efficiency controls that reduce energy use.

We will retrofit or replace your old, inefficient lighting and add controls, saving you big money on your monthly utility bills.

### **As registered AEP Solution Providers, we:**

- ✓ Survey your building
- ✓ Design an affordable, cost effective plan
- ✓ Maximize AEP incentives
- ✓ Install the most cost efficient lighting
- ✓ Install and commission lighting & HVAC controls
