

FOR IMMEDIATE RELEASE

TFS, Top Sweden-based Contract Research Organization, Selects OmniComm[®] TrialMaster[®] for Global Clinical Trial Research

TrialMaster selected to support global trial expansion

Fort Lauderdale, FL, July 21, 2014 - OmniComm Systems, Inc. (OTCQB: OMCM), a global leading provider of clinical data management technology, is pleased to announce that TFS International (TFS), the largest independent, global clinical contract research organization headquartered in Sweden, has selected TrialMaster electronic data capture (EDC) technology as its standard EDC solution for pivotal clinical trials. This whole process has been part of a company-wide initiative to provide TFS's clients around the globe with increased performance, functionality and better business decision making tools.

OmniComm Systems and TFS enjoy a long-standing strategic partnership providing their clients globally with exceptional services and superior functionality. The recent release of TrialMaster 4.2 was a primary reason for TFS' selection. TrialMaster includes over 300 new innovative productivity and functionality enhancements, including TrialMaster unique features like auto-redaction for faster and more efficient centralized and risked based monitoring, as well as major new automation features for exporting data utilizing OmniComm's award winning Export Utility.

Thea Wesseling, Executive Vice President, Global Clinical Development, commented, "As we continue to expand our geographic reach and services, at TFS we are always working to add value and enhance our services to our customers. We believe this collaboration will ensure we offer our customers a highly flexible EDC platform that is cost effective and extremely user-friendly. We believe our customers will really benefit from this new system's functionality and full 24/7 real-time transparency."

"Focused on growth, TFS requires a best-in-class solution that will extend its clinical data management and EDC capabilities," said Dr. Kuno van der Post, senior vice president business development, OmniComm Systems, Inc. "TFS selected TrialMaster as its core EDC solution to enable rapid trial set up, data accuracy, and clinical trial productivity enabling TFS to gain the trust of both local and global trial sponsors. We are glad to welcome TFS to the growing CRO community adapting TrialMaster as their core EDC solution."

TFS contracted OmniComm's Professional Services proven QuickStart[™] implementation methodology taking advantage of OmniComm's project management, training, QA support and extensive transformation implementing services, along with validation kits that accelerate study setup time and reduce overall cost. A growing number of eClinical Suite customers are moving to TrialMaster with the assistance of OmniComm's Professional and Transformation Services teams. OmniComm takes pride in the fact their implementations are based on standard, proven and trusted business processes that

reduce implementation time and cost. TFS will also utilize OmniComm's CDASH library of clinical case report forms (CRFs).
