OmniComm Systems, Inc. and Triumph Consultancy Services Announce a Strategic eClinical Partnership

Fort Lauderdale, FL, April 15, 2013 – OmniComm Systems, Inc. (OMCM), one of the fastest growing companies in the Electronic Data Capture (EDC) marketplace, and Triumph Consultancy Services (Triumph), a leading eClinical operations consulting firm, announced their new strategic partnership today. The partnership will allow OmniComm to offer their clients access to proven operational process optimization skills and extensive experience in clinical technology interoperability, while allowing Triumph to offer its clients access to one of the most intuitive and innovative EDC technology suites available on the market today.

"Triumph's proven reputation as key problem solvers and system integrators in clinical operations, combined with our clinical expertise, make this relationship a powerful package to the pharmaceutical and medical device marketplace." said Stephen Johnson, President & COO of OmniComm Systems, Inc. "Triumph brings a wealth of experience, with best-in-class rapid set up tools to the OmniComm ecosystem of partners."

Under the terms of the agreement, OmniComm will be able to access Triumph's professional services capabilities to help customers drive further efficiencies in their clinical process. Triumph will become a reseller of OmniComm TrialMaster and TrialOne suites, giving clients access to robust EDC platforms, and will be a study build services and support provider for OmniComm products.

"We are very excited to incorporate OmniComm's TrialMaster EDC into our technology portfolio - combined with our CTMS offerings, it allows us to significantly expand our footprint in supporting the end-to-end eClinical requirements of our client." said Duncan Hall, CEO of Triumph. "Having worked with many EDC systems to date, we see that OmniComm has developed a solid reputation, not just for the very latest technology in end-user interfaces, rapid study set up and interoperability, but also as a stable and trusted software provider in this market."

Given the large amount of aging EDC technology installed at pharmaceutical and biotech companies today, Triumph and OmniComm see this partnership as key to answering the concerns of many companies about upgrading their solution suites to absorb greater demands of regulatory compliance and increasing complexity of clinical study design and conduct.

About OmniComm

OmniComm Systems, Inc. (www.OmniComm.com) provides customer-driven Internet solutions to pharmaceutical, biotechnology, and medical device organizations that conduct life changing clinical trial research. OmniComm's growing base of satisfied customers is a direct result of the company's commitment to deliver products and services that ensure ease of use, faster study build, ease of integration and better performance. OmniComm Systems, Inc. has U.S. headquarters in Fort Lauderdale, FL and European headquarters in Bonn, Germany, with satellite offices in New Jersey and the United Kingdom, as well as sales offices throughout the U.S. and Europe.

About Triumph Consulting Services

Triumph Consultancy Services (http://www.triumphconsultancy.com/), established in 2002, and has been focused in improving clinical trials through the application of innovative business process, technology and change solutions ever since. Triumph takes a creative, pragmatic and results oriented approach to everything and are prepared to challenge the 'business as usual' approach which can be prevalent in the industry. Their consultants have all come from the Pharmaceutical and CRO industries and understand the challenges faced from management, end user, and regulatory perspectives. Triumph has offices in both the UK and the USA.
