OmniComm Now Offering eCTMS Capabilities as a Bundled Component for The TrialMaster® Electronic Data Capture Suite

Integrated Partnership with PharmaPros Dataflow Manager enables new functionality

Fort Lauderdale, FL, June 25, 2012 – OmniComm Systems, Inc. (OTC: OMCM.OB), one of the fastest growing companies in the Electronic Data Capture (EDC) marketplace, today announced a new level of integration with PharmaPros that provides OmniComm customers with a solution offering next-generation CTMS capabilities for mid-sized organizations interested in a flexible, SaaS solution for clinical trials management. This new integrated solution provides capabilities for Site Management & Monitoring, Budget Tracking & Management, eTMF / Document Tracking, Metrics Portal & Real-time Reporting.

With access to these new tools, OmniComm customers can manage their clinical trial information in a more automated and scalable way. Connecting Trial Master EDC directly to Dataflow Manager through the OmniConnect web-based API eliminates the administrative burden of redundant data entry and reconciliation for clinical Sponsor and CRO organizations across a wide range of eClinical products, reducing trial costs, and providing significant workflow efficiencies.

"We are extremely pleased that OmniComm is now bundling Dataflow Manager's unique study management capabilities with their TrialMaster EDC product," said Brion Regan, Head of Strategic Development, PharmaPros. "We've already seen the benefits within our shared customer base, and have been impressed. OmniComm has proven to be a strong technology partner, with the ability to rapidly address the needs of their customers with value-driven solutions."

This integrated partnership enables OmniComm customers to add Dataflow Manager to their TrialMaster solution on an as-needed or per-trial basis. This flexibility gives customers the ability to quickly scale up or down, based on the needs of the trial, without costly and time-consuming implementations required by traditional CTMS solutions.

"We are excited about this new partnership and the benefits this marriage of EDC and CTMS will provide to our customers," said Stephen Johnson, President and COO of OmniComm. "This integrated partnership and solution is just one more example of how OmniComm is continuing to help our customers connect data across the eClinical spectrum."

About OmniComm

OmniComm Systems, Inc. (www.OmniComm.com) provides customer-driven Internet solutions to pharmaceutical, biotechnology, research and medical device organizations that conduct life changing clinical trial research. OmniComm's growing base of satisfied customers is a direct result of the company's commitment to deliver products and services that ensure ease of use, faster study build, ease of integration and better performance.
