Important!
Passport Requirements Starting January 8, 2007

Effective January 8, 2007, all nationals, including U.S. citizens, will be required to hold a valid passport to enter the United States by air and by sea. This also applies when coming from Canada, Mexico, Central and South America, the Caribbean and Bermuda.

The new passport requirement means that all travelers, including U.S. citizens, who are departing the U.S. and intend to re-enter the United States are required to hold a valid passport upon departure from the U.S.

Be Sure to Ask About Dimensional Planner Included in CheckMate 10

Origin Webinar Session Scheduled October 31, 2006 – Dimensional Planner Basics	Origin Webinar Session Scheduled November 14, 2006 – Dimensional Planner Advanced

Topic: Dimensional Planner Basics

New Microsoft Internet Explorer Breaks Autodesk DWF, DWG Viewers	**Windows XP Font Tip**

Autodesk is reporting through its network of employee-bloggers that Microsoft Internet Explorer 7 (IE7) Release Candidate 1 breaks its DWF and DWG viewing programs. Users are being advised to avoid downloading IE7 until the problem is solved.

The following link takes you to detailed information on this issue.

http://aecnews.com/articles/2058.aspx

If you have already downloaded Microsoft Internet 7, the following link will take you to a fix.

http://news.zdnet.co.uk/software/applications/0,39020384,39284274,00.htm

Windows XP has ClearType - Microsoft's anti-aliasing font display technology - but doesn't have it enabled by default. It's well worth trying, especially if you were there for DOS and all those years of staring at a screen have given you the eyes of an astigmatic bat.

To enable ClearType, right click on the desktop, select Properties, Appearance, Effects, select ClearType from the second drop-down menu and enable the selection. Expect best results on laptop displays.

If you want to use ClearType on the Welcome login screen as well, set the registry entry HKEY_USERS/.DEFAULT/Control Panel/Desktop/FontSmoothingType to 2.
