ISSUE: WINTER

FEBRUARY 2013

Dear Janet,

Well it looks like 2013 is turning out to be a promising year. Here at Origin, we have some interesting things coming your way that we hope you will find useful and time saving. It is always a good time to save money. So read on and as usual we would appreciate your comments or feedback.

ANNOUNCEMENT - CMM TRANSLATOR

New Pricing Structure

Origin is pleased to announce a revised price structure for Origin's CMM to CMM Translator. The new pricing has been created to allow the medium to smaller manufacturers an opportunity to **take advantage of this extremely useful time saving tool** for those working with different makes of CMMs, and we cover virtually all of them.

UNCERTAINTY IN CMM

In Day to Day Operations

For those of you who are hearing this topic come up more and more we have come up with a couple of references that you may find of value in gaining a better understanding of measurement uncertainty and how it applies to your day to day operation.

There are many definitions of this topic out there. However, "Uncertainty of measurement is the doubt that exists about the result of any measurement", as defined by Stephanie Bell in [A Beginner's Guide to Uncertainty of Measurement](#) is as good a place to start as any. For the layman or individuals wishing to gain a foothold of understanding in this field this guide provides a good starting point.

As for the majority of our readers the primary area of interest is how this all applies to coordinate metrology and the CMM in particular. The article, [Application of Simulation Software to Coordinate Measurement Uncertainty Evaluations](#) provides a more in depth study of how measurement uncertainty applies to your metrology environment and how applying the concepts in your daily operation could improve your measurement process.

COMING SOON...

Excel Reporting System...

Introducing Origin's new Excel Reporting System. If you create a CheckMate report in a Layout, CheckMate will insert all of the graphics from a viewport into the selected excel template. CheckMate reports such as ballooned labels, post inspection labels, or whiskers will be automatically recognized. Then, taking it a step further, CheckMate will automatically fill the selected excel template with the results data that belongs to the report in that viewport. Keep your eyes peeled for release dates !

New Excel Reporting System

CHECKMATE AFTER CLASS

Origin International provides webinars for CheckMate customers with an annual applications, procedures, advance commands that time does not allow in a standard training class.

These Webinar sessions are online training sessions that you can either: 1) register to view live or 2) download and view at your convenience.

If you missed the after class webinar [Click Here](#) to Download to view at your own convenience.

UPCOMING WEBINARS:

Making CheckMate Labels in any User Co-ordinate System

Date: Thursday, March 28, 2013
Time: 11:00 am, EST (GMT-04:00)

Description: With CheckMate's new Excel Reporting on the horizon, we will have the ability to fill an excel report template with whatever label data is in the chosen graphic. Knowing how to generate CheckMate Labels in any coordinate system will making the New Excel Reporting System even more powerful when it arrives.

[Click here](#) to register for the meeting.

Once the host approves your request, you will receive a confirmation email with instructions for joining the meeting.

Note: If you already registered for this meeting, you do not need to register again.

Reseller/Distributor Opportunity

Manufacturing process & inspection software/hardware

Attention resellers: In order to better serve industry needs, Origin is looking to expand it's software Reseller/Distributor organizations serving the automotive, aerospace and other metal and precision plastic industries in North America and Globally. Suggestions of organizations our customers may be familiar with are welcome. Reply to Janet.wiaderny@originintl.com

CHECKMATE 12.1 Update

CheckMate - 12.1 Phase II 269 Update

For customers who log in to our BBS. We have a new folder called CheckMate 12.1 for this new release and other information related to it. ie. updates, how to unblock the help file etc.

Hardware Requirements for CheckMate:

- 32 bit/64 bit capability - able to run Windows XP-32Bit, Vista or Windows 7
- Minimum 4 gigabytes of RAM
- Ability to do Windows XP hardware simulation
- Multiple Cores - Scanning software uses multiple cores to increase the performance

UPGRADING TO WINDOWS 7

Take Note of the Following:

- The new CheckMate release 12.1 supports both 32 bit and 64 bit.
- We recommend Windows 7 - 64 bit.
- You must have "Administrator" rights
- Change your "Shortcuts" to run as administrator

[Click Here](#) for the application note with more details

(requires a login to our BBS)

Origin International Inc. is focused on providing software solutions and consulting services to world class manufacturers, their suppliers and industry leading metrology solutions providers.

Manufacturers that choose Origin software solutions are industry leaders in innovation, quality and cost effectiveness within the Automotive, Aerospace, Transportation and Consumer Products industries.

If you would like more information, don't hesitate to contact us at 1-800-269-2509.

Sincerely,

Janet Wiaderny
