

GSX Analyzer

Lotus Software ■ Traveler ■ Quickr ■ BES ■ Microsoft Exchange ■ Sharepoint

GSX Monitor is a solution that enables administrators to proactively manage an organization's entire collaboration environment. One part of this solution is **GSX Analyzer**, a powerful, executive dashboard that works in conjunction with **GSX Monitor**.

GSX Analyzer calculates industry best-practice statistics and generates sophisticated reports based on the vast array of data captured through **GSX Monitor**. These advanced reporting capabilities provide an insight into the usage and performance of your collaboration servers. **GSX Analyzer** can help you to understand key trends and performance metrics in your collaborative infrastructure and enable you to prioritize and ensure maximum efficiency with minimum overhead. Management reports can be run on demand or scheduled and delivered automatically to one or more recipients. **GSX Analyzer's** extensive reporting features and statistics allow IT Managers to identify trends, manage capacity requirements, forecast, and understand the overall health of your collaborative environment. The reports can be automated and customized to align with your organization's requirements; they are perfect for SLA and KPI reporting. **GSX Analyzer** provides consolidated reports across all of your collaboration portfolio components in one solution and provides consistent reporting irrespective of the technology in use.

GSX Analyzer: Dashboard Metrics and Reports

ANALYZER PROFILES

GSX Analyzer profiles enable administrators to filter, organize, manage, and distribute information. Profiles ensure that the right information is shared with the right people in a secure and structured manner.

Profiles can be used to filter information, by company, by customer, by location, by server, or by any other user-defined "tag".

Profile

Profile Name: GSX FR BES

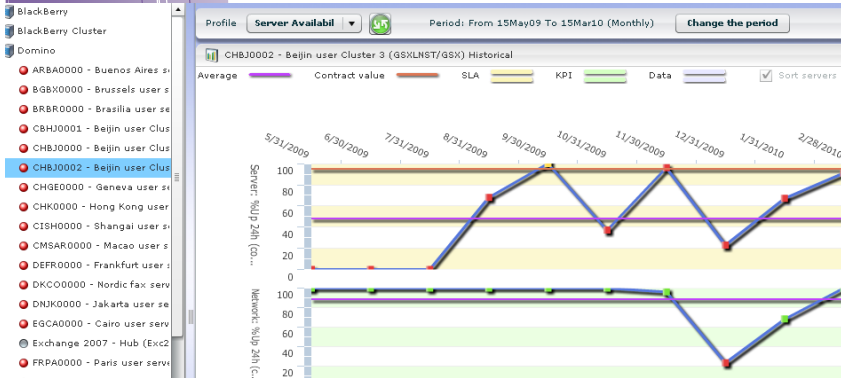

Profile Description: BES Data for GSX FR

Access Level: Advanced Users

Selected tags: Department (DEV, Marketing)

Select servers: Server name (GSXLNTEST/GSX, GSXLNTEST/GSX)

Environmental Health

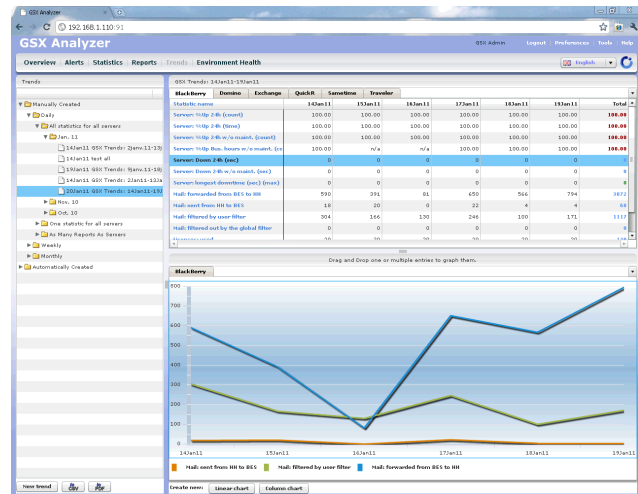

ENVIRONMENTAL HEALTH

GSX Analyzer's Environmental Health feature provides an overview of the health of your entire collaborative environment. Use Environmental Health to compare the performance of SLAs and KPIs across all the servers in your environment. With Environmental Health reports you can instantly and easily compare key metrics across all of your servers. This means that you can rapidly identify issues with servers and prioritize them for attention.

TRENDS

GSX Analyzer's trend reports enable administrators to track the performance of selected statistics over a period of time. Trend reports can be created on demand or scheduled and delivered automatically to one or more recipients.

Trend reports help administrators and managers to understand the past performance of the servers and services. By highlighting changes and patterns, Trend Reports enable managers to plan for the future.
