

GSX Monitor & Analyzer

Streamline your business-critical messaging & collaboration environments

GSX Monitor & Analyzer

Microsoft Exchange

GSX Monitor & Analyzer is a powerful and intuitive monitoring and reporting solution that enables administrators and IT managers to ensure the performance and availability of Microsoft Exchange, SharePoint, BlackBerry Enterprise Server and IBM applications. It provides real time monitoring from a single user interface enabling issues to be quickly identified.

GSX Monitor tests the availability, the performance and the usage of all the Exchange roles: Hub, CAS, Mailbox as well as the DAG and the CAS Array to provide administrators with relevant alerts and real time overview of the services that their infrastructure is truly delivering to the business lines.

Working in tandem with **GSX Analyzer** you can use extensive analysis and reporting features to manage your Service Level Agreement (SLA) and gain valuable insights into the overall health of your infrastructure.

Product Highlights

- No agent required
- Monitor performance and availability of your Microsoft Exchange servers with user simulation metrics
- Trend, compare and forecast all the statistics you need to make reporting and capacity planning easy
- Intuitive dashboard that provides an “at a glance” view of Microsoft Exchange health
- Historical metrics enable trending and forecasting

System Requirements

GSX Monitor:

- Windows Server 2003, 2008 and 2012
- Windows XP, Vista, 7 and 8
- 32 or 64 bit workstations
- RAM 4 GB
- CPU 2 GHz Multicore
- Disk Space 2 GB free
- Microsoft .NET Framework 2 and Microsoft .NET Framework 4 (Full) must be installed on the monitoring station

GSX Analyzer:

- Windows Server 2003 SP3 and 2008
- Windows XP, Vista and 7
- Internet Information Services (IIS) 5.1 and later. For IIS 7 & 7.5, GSX Analyzer requires the IIS 6 Metabase Compatibility Component
- Microsoft .NET Framework 4 needs to be installed
- Internet Explorer 7 or above; Mozilla Firefox 4.0 or above; Chrome
- Adobe Flash Player 10.2 or later

All details of our Exchange Monitoring requirements are on the [GSX Support website](#).
