

## **GSX Solutions Delivers Enhanced Domino Server Support**

*New GSX Server Guard v7.5.1 helps manage partitioned Domino 9 environments*

Orchard Park, NY – May 30, 2013 — [GSX Solutions](http://www.gsx.com) [www.gsx.com], the global leader in proactive, consolidated monitoring and reporting of enterprise collaboration environments, including [Microsoft Exchange](#), [Microsoft SharePoint](#), Blackberry Enterprise Server ([BES](#)) and [IBM Notes](#), today announced the release of GSX Server Guard v7.5.1, with support for partitioned Domino 9 environments and other enhancements.

GSX Server Guard helps maximize Domino server performance through unattended crash recovery and automated server maintenance. New features in Server Guard include:

- Domino 9 support.
- You can manage partitioned Domino environments.
- Windows 2008 Server R2 and Windows Server 2012 support.
- You can configure the launch of a task.
- A check for any conflicts is performed on Domino server reboot.

“We are delighted to announce the latest edition of our time honored Server Guard, with support for Domino 9 and other significant enhancements,” said Antoine Leboyer, CEO of GSX. “The product has a loyal customer following, and this latest upgrade comes in response to feedback on their evolving needs.”

Server Guard frees up memory lost to memory leaks and dead processes. It automatically detects problems and takes immediate action without manual intervention, including automatic restart if a process is hung on a server. It also lets you perform remote configuration and maintenance for Domino servers.
