

PHOENIX
ENERGY TECHNOLOGIES

EnterpriseDX[®]

THE COMPLETE ENERGY MANAGEMENT SOFTWARE SUITE

EnterpriseDX[®]

EXPLORER

Real-time data analysis and trending

EVENTS

Prioritized alarm processing for faster response to critical anomalies

DASHBOARD

Interactive view of energy consumption and savings

REPORTS

Create configurable reports to perform demand analysis and track energy usage and spending

BILLING

Generate real-time billing reports

HOW IT WORKS

1 AUTOMATE

Automate the collection and commanding of critical data sources, schedules and set points using proprietary EnterpriseDX[®] software gateways (not hardware or on-site adjustments).

2 INTEGRATE

Integrate critical and contextual data sources into the centralized EnterpriseDX[®] platform for monitoring and analysis, allowing users to spend less time compiling data and more time extracting value from the data.

3 EVALUATE

Using EnterpriseDX[®] reporting features evaluate energy consumption and cost to diagnose opportunities and implement strategies for greater efficiency and savings.

4 DEMONSTRATE

Demonstrate ROI through material load reductions and cost savings through a proactive process that drives your Enterprise Energy Management strategy.
